## Welcome to OSAS™

---

The OPEN SYSTEMS Accounting Software (OSAS) product line consists of several accounting applications. Each application addresses a different phase of your financial operations; together, they form a powerful accounting solution to your daily and periodic accounting needs.

### Customer Support

Open Systems has a strong commitment to customer service and product quality. If you have difficulty in using Open Systems products, consult the user's manual and other OSAS reference materials. If you need more information, consult a customer support representative.

### OSAS Overview

#### Resource Manager

The Resource Manager application is the foundation or shell of OSAS; it provides the operating environment that holds the other applications. Resource Manager also includes three powerful business features: Global Inquiry, Executive Information Summary (*EIS*) and Print Manager. With Global Inquiry, you can drill around your accounting data to find selected information throughout your system. With *EIS*, you can access company information quickly and view summaries of all aspects of a company or a group of companies. With Print Manager, when you print reports to file, your reports can be stored, sorted, printed, and searched for specific text.

#### Base Applications

Base applications are designed and produced with the largest possible number of industries in mind. They are most effective when you interface them with each other. Base applications are usually named after common accounting operations. Examples are: General Ledger, Accounts Payable, Purchase Order, Accounts Receivable, Sales Order, Payroll, and Inventory.

---

## **OSAS Versions 6.1 and Higher**

You can use OSAS versions 6.1 and higher in text (or character-based) mode on any supported operating system.

In Windows environments, you have the choice to use either the text version or the graphical version. While the interface is different in the two versions, the functions in both versions are the same in screen layout and in function. The OSAS user's manuals show screens in the graphical format. You can, however, apply the information shown in the graphical examples to the text version with ease.

For specifics on using the graphical version of OSAS, refer to page 1-21.

For specifics on using the text version, refer to page 1-43.

---

# The Payroll System

---

Use the Payroll system to automatically figure employee wages; federal, state, and local withholdings; and deductions. The Payroll system also tracks bonus pay and sick and vacation time and accumulates information for tax reporting. Finally, use the Payroll system to produce paychecks, reports, and employee W-2 forms.

## Menu Structure

The Payroll menu structure is similar to the structure of other OSAS applications: functions appear roughly in order of use.

### Codes Maintenance

Use the functions on the Codes Maintenance menu to set up such codes for your payroll system as earning codes, deductions, and withholdings.

### File Maintenance

Use the functions on the File Maintenance menu to set up and maintain information about your employees. For example, use the Employees function to establish and update information about your employees.

### Employee Inquiry

Use the Employee Inquiry functions to view (not change) information about employees. If you are running OSAS through a multiuser network, several people can look up the same information at the same time.

## Daily Work

Once you establish the employee records through the File Maintenance and Codes Maintenance functions, you can use the Daily Work functions to enter transactions for your employees. The kind of entries you make depends on how your employees are paid—whether the employee is paid by the hour or piece or whether the employee is salaried. You might not use the Daily Work functions every day; if your employees are paid monthly, for example, you might enter transaction information only once a month.

After you enter transactions, you can edit and review them. Then post the transactions so that you can produce paychecks.

## Payday Work

Use the Payday Work functions to calculate and/or enter, produce, and post checks. The system can automatically calculate an employee's pay (for example, if the employee is salaried), or you can manually enter checks (for example, if the employee is paid according to how many pieces he or she produced).

You can also void checks, adjust vacation and sick hours accruals, and produce several reports.

## Reports

Payroll offers two categories of reports: Payroll Reports and Personnel Reports. Both types summarize information from files. The Payroll Reports show information primarily from the history files. The Personnel Reports show information from the employee files.

Use the Reports functions as often as necessary to produce summarized information about transactions, tax information, employees' statuses, and salary history.

## Periodic Processing

After doing daily work and producing reports, you can use the Periodic Processing functions to produce monthly, quarterly, and annual reports for federal, state, and local tax authorities. You can also produce a worksheet that helps you fill out the 941 form, and you can produce employee W-2s. Finally, you can close last year's files in preparation for the new year.

## Master File Lists

Information that you enter in the File Maintenance functions is kept in major files. Use the Master File Lists functions to produce the contents of the files: details about employees, withholdings and deductions, and payroll formulas.

## File Information

The information you enter in Payroll functions is stored in files. Each file falls into one of four categories: employee files, attribute files, temporary files, and history files. (OSAS does not make a distinction between categories of files. The files are described in terms of categories to give you a better of idea of how each fits in.)

## Employee Files

The employee files serve as permanent sources of information: data stays in the files until you remove it.

The PAEGxxx (Employee General Information) file holds the following information, which you enter through the Employees function:

- employee ID, name, social security number, address, phone number and e-mail address
- equal employment opportunity code, vacation and sick accrual codes, and earning code
- department, group code, labor class, and payment type (hourly or salaried)
- salary and/or hourly pay rate
- pay periods per year
- job title
- accrued and taken sick and vacation time

The PAEPxxx (Employee Personnel) file holds the following additional employee information, which you enter through the Employees function:

- educational history
- pay change and bonus information
- ten user-defined dates
- comments

The PAESxxx (Employee Federal/State/Local Withholdings) file stores the federal, state and local withholding codes that an employee is set up to have money withheld for. A code is set up for each state or locality the employee works in.

## **Attribute Files**

The attribute files hold data that you can assign to each employee. These attributes often carry their own function names. These files serve as permanent sources of information: data stays in these files until you remove it.

The PACO (Payroll Codes) file stores information about federal, state, and local tax districts, which you enter through the Tax Authority Setup function. Each state or local code record contains the withholding code, tax table ID, and tax formula for the tax district. The file stores both employee- and employer-side withholding information.

The PADExxx (Employee Deductions) file stores information for each payroll deduction, which you enter through the Deductions function. Each deduction has a description and a general ledger account number; whether or not the deduction is deferred compensation, employer-paid, and calculated on gross or net pay is indicated. The PADExxx file also stores the employer liability account number for employer-paid withholdings and the override factors for deductions.

The PADDxxx (Company Deductions) file stores the payroll deduction codes and information relating to these codes, which you enter through the Deductions function.

The PADPxxx (Department) file stores general information for each department you set up: each earning code for the department, the employer-paid withholding and deduction, and pieces totals and total hours for the department. You enter this information through the Departments function.

The PADXxxx (Deduction Exclusion) file stores exclusions of earning codes from payroll deductions, which you enter through the Deductions function.

The PAECxxx (Earning Codes) file stores information that you use when entering time tickets or manual checks. Each earning code includes the following information, which you enter through the Earning Codes function:

- description
- whether or not the earning code is included in net pay and fixed withholding
- the earning type
- the general ledger account number
- the multiplier and add-to-base factor

The PAETxxx (Earnings Types) file stores earning codes information, which you enter through the Earning Types function. (Each earning code must be assigned an earning type.).

The PAEXxxx (Employee Exclusion) file stores withholding code exclusion records for employees and the override factors for each withholding code, which you enter through the Employees function.

The PAFMHDR (Formula Definitions) file stores the individual formula lines needed to process a function. Set up these formulas through the Formula Maintenance function.

The PAFMLIN (Formula Line Detail) file stores separate lines of a complete formula.

The PAGDxxx (Tax Group Detail) and the PAGHxxx (Tax Group Header) files store combinations of tax authorities and withholding codes for use in calculating tax withholdings for employees.

The PAINxxx (Payroll Information) file stores a variety of general information, which you enter through the Payroll Information function:

- records for state unemployment report
- company address
- bank account ID
- degree codes and descriptions

The PALCxxx (Labor Class) file stores the labor classes and their descriptions, which you enter through the Labor Classes function.

The PARExxx (Recurring Entries) file stores information about recurring time tickets, which you enter through the Recurring Entries function.

The PAWIxxx (Withholdings) file stores payroll information for federal, state, and local withholdings, which you enter through the Withholdings function. Each withholding has a description, a general ledger account number, a tax ID, and a fixed percentage (if appropriate); whether or not the withholding is employer-paid and the weeks worked limit are indicated. If the withholding is an employer-paid withholding, this file also holds the employer liability account.

The PAWXxxx (Withholding Exclusion) file stores the exclusions of deductions and earning codes from payroll withholding, which you enter through the Withholdings function.

## Temporary files

The temporary files store information created from an action you perform and send that information to a different file—usually a history file—when you post.

The PACDxxx (Checks Deductions) file stores the deductions taken for each employee paycheck.

The PACExxx (Checks Earning) file stores the earning codes for each employee paycheck.

The PACHxxx (Checks) file stores the latest batch of unposted checks that have been prepared for employees.

The PATPxxx (Transactions Post) file stores records that were posted after transactions were entered. Records are stored for each earning code, deduction code, and pieces (if you pay employees piece rates). Earnings can be split between paychecks if a sequence number is assigned to each transaction. The Calculate Checks function creates checks based on the information stored in this file. When you post checks, this file is cleared.

The PATRxxx (Transactions) file stores the detailed records of time tickets and miscellaneous payroll entries you make through the Payroll Transactions function. You can view the contents of the file by producing the Time Ticket Journal and the Miscellaneous Deductions Journal. The file is cleared when you post transactions.

The PACWxxx (Checks Withholdings) file stores the withholdings for each employee paycheck.

## History Files

The history files get information as a result of a post.

The PAEDxxx (Employee Deduction History) file stores month-to-date, quarter-to-date, and year-to date information about each employee's payroll deductions.

The PAEExxx (Employee Earnings History) file stores each employee's month-to-date, quarter-to-date, year-to-date earnings and hours worked—both gross and net pay amounts.

The PAEMxxx (Employee Miscellaneous History) file stores miscellaneous historical information for each employee: weeks worked, allocated tips, cost of GTLI, DCB, 457 and non-457 plans for each month, advance EIC payments, uncollected Medicare, and other information.

The PAEWxxx (Employee Withholding History) file stores month-to-date, quarter-to-date, and year-to date information about each employee's payroll withholdings.

The PAHCxxx (Check History) file stores general information (employee ID, department, check number) for each check you disburse for payroll expenses. Check records are deleted through the Periodic Maintenance function.

The PAHDxxx (Check Deductions History) file stores a record of the deductions taken from each check you disburse for payroll expenses. Check records (and the deductions associated with them) are deleted through the Periodic Maintenance function.

The PAHExxx (Check Earnings History) file stores a record of the earnings associated with each check you disburse for payroll expenses. Check records (and the earnings associated with them) are deleted through the Periodic Maintenance function.

The PAHWxxx (Check Withholdings History) file stores a record of the withholdings associated with each check you disburse for payroll expenses. Check records (and the withholdings associated with them) are deleted through the Periodic Maintenance function.

The PATHxxx (Transaction History) file stores the time tickets and miscellaneous payroll entries you make through the Payroll Transactions function. Transaction history is deleted through the Periodic Maintenance function.

The PAHVxxx (Leave Adjustment History) file stores the positive and negative adjustments you make to an employee's sick and vacation pay.

## **File Interaction**

### **Daily, Payday, and Periodic Work**

Once your Payroll system is set up, nearly all the new data in the system comes through the PATRxxx file. This file stores the detailed records of each transaction entry. To view the contents of the file, produce the Time Ticket Journal and the Miscellaneous Deductions Journal.

Periodically you post detailed information from the PATRxxx file to the PATHxxx, PATPxxx, and PADPxxx files. After the information is posted, the system prints the totals for the earning codes; the grand totals of all hours and wages; the totals for deductions and one-time contributions; and the grand totals of all deductions.

How often you post this information is up to you, but you must post it before you can calculate payroll checks. After the information is posted, the data from the PATRxxx file is deleted to make room for the next series of entries.

Here is a closer look at the relationship between the PATRxxx file and other files in the Payroll system.

### **Posting Payroll Transactions**

When you post payroll transactions, you can save the details of each transaction in the PATHxxx file. It keeps a record of all transactions so that you can analyze your payroll expenses. Posting payroll transactions also updates the PATPxxx file.

When you post payroll transactions, summary information is transferred to the PADPxxx, PATHxxx, and PATPxxx files. They store such information as the number of hours worked and pieces produced (if appropriate); hourly and premium wages; and vacation, sick leave, or other out-of-the-ordinary payroll transactions.

The information in the PADPxxx file is used when you print the Department Report and when you post labor expense to General Ledger. The information in the PATHxxx file is used when you print the Transaction History Report.

The information from the PAHDxxx, PAEDxxx, PAEExxx, PAEMxxx, PAEWxxx, PAHCxxx, PAHExxx, PAHWxxx, PATHxxx, PAEGxxx, and PAESxxx files is used to produce, for example,

- payroll checks
- the Quarterly Employer's Tax Report
- the Quarterly Withholding Report
- the Sick Leave and Vacation Report
- the Employee Detail List
- W-2 forms and magnetic media
- the Check History Register

### **Calculating Checks**

With the Payroll system you can calculate checks for 1, 2, 4, 12, 21, 24, 26, 27, 52 or 53 pay periods a year.

To calculate checks for hourly employees, the system uses the accumulated totals of the summary information posted from the PATRxxx file to the PATPxxx file since the last time you calculated checks. For salaried employees, the system reads the amount stored in the PAEGxxx file. For both, it reads the deduction and withholding information in the PADExxx, PAEMxxx, PAEWxxx, and PAESxxx files to calculate appropriate deductions, withholdings, and net pay, protecting against exceeding withholding limits or declining balance deductions. Check records are then stored in the PACDxxx, PACExxx, PACHxxx, and PACWxxx files.

If an employee is set up to receive more than one paycheck (for example, if the employee worked in different departments or is receiving a bonus), the system automatically calculates multiple checks for the employee. If you void one of the multiple checks, the system does not recalculate the remaining checks.

If you have produced manual checks, you can use the Manual Checks function to recalculate them.

Information from the PACDxxx, PACExxx, PACHxxx, and PACWxxx files is used to produce

- the Edit Register
- payroll checks
- the Check Register
- the Withholding Report
- the Employer's Tax Report

After you print the paychecks and the related reports, post the check detail to the PAHCxxx, PAHDxxx, PAHExxx, and PAHWxxx files. These files store the detail of the paychecks so that you can review checks when you need to investigate salary, deduction, or tax withholding questions. Information in these files appears in the Check History Register.

Posting checks transfers summary information to the PAEGxxx, PAEDxxx, PAEExxx, PAEMxxx, and PAEWxxx files. This information includes such things as the number of hours recorded for each employee and the type and amounts of pay each should receive for them. Specifically, it includes earning code entries from checks, tips, pieces completed, vacation and sick leave hours and pay, and deductions and withholdings from pay.

## Year-End Maintenance

At the end of each calendar year, do year-end maintenance to prepare your files for next year's entries. This procedure accomplishes the following things:

- clears out the quarter-to-date and year-to-date balances in the PADPxxx file
- removes history from the PATHxxx and PAHCxxx files previous to the date you specify (optional)
- clears out month-to-date and year-to-date balances and removes records of terminated employees from the PAEDxxx, PAEWxxx, PAEPxxx, PAEGxxx, PAEExxx, PAEMxxx, and PAEWxxx files
- creates last-year files

When you do year-end maintenance, files for the previous year are created with the extension *.LY*. You can begin processing in the new year while you are completing processing for the previous year. After you have produced your W-2s and backed up your files, you can use the Close Last Year function to delete last-year files and to make room for next year's entries.

---

**Note**

After you delete last-year files, you cannot produce W-2s unless you have backed up your files.

---

---

## Application Interaction

Payroll can be used as a standalone application, but you can get optimal use from it when you interface it with other applications.

Interfacing applications means that the information you enter in one application can be transferred to and used in other applications. So it reduces data entry time and the number of errors that might creep in along the way.

---

## Conventions

---

Your manual will help you to install OSAS on any standard machine within many popular operating systems and help you with your accounting software questions. In the manual, we use the term “Conventions”, or standards, to help describe complicated processes, new terms, and to help you use your OSAS applications.

### Manual Conventions

The *Payroll User's Manual* is divided into the following sections:

- “Introduction” provides an overview of this application and the OSAS system, and the basic functionality of the application including graphical and text-based application features, and function key references.
- “Application functions” explains the functions within the application: where each function fits within the application, and how to use each function to get the most out of the application.

### Mouse Conventions

The standard mouse has two buttons, left and right, each performing certain functions. In this manual, we use these terms for using the mouse: *click*, *right-click*, *double-click*, and *deselect*.

The *click* is a single press on the left mouse button. Place the cursor over the desired function, and press the left button to enable, or “select”, that function.

A *right-click* is a single press of the right mouse button.

To *double-click*, move the cursor over the desired function, and quickly press the left mouse button twice. If there is too long a pause between clicks, the computer may interpret your action as two separate clicks and may not perform the desired function.

---

To *deselect* an object, move the cursor off the icon or folder onto a blank space within the window and press the left mouse button.

**Note**

Some mouse manufacturers allow you to change the function of the mouse buttons for those who prefer (for example) to use the mouse with their left hand. In this case, reverse the commands when you use them. For example, a click refers to a single press of the right mouse button, while the term right-click refers to a single press of the left button, and so on.

---

## OSAS Conventions

Operations in OSAS follow conventions, or patterns. The conventions used in OSAS applications are presented below.

### Running OSAS

OSAS runs in an operating system supported by 150 megabytes of permanent storage and 4MB of RAM. You may need additional space or memory, depending on the size of your data files and the operating system you use. Consult your reseller for more information.

### Starting OSAS

To start OSAS on a computer running Windows, double-click the OSAS shortcut on the desktop or in the appropriate folder.

To start OSAS on an operating system other than Windows, enter **osas** at the operating system prompt.

The **osas** command can recognize three parameters: -t, -c, and -a.

---

The terminal ID (-t) is the identification code assigned to the terminal you are using to run OSAS. On multiuser systems, each terminal usually has a default ID that was assigned to it when the terminal was added to the system. Use the -t parameter only when you want to log on with an ID other than the default ID. The terminal parameter is valid only if you are using Resource Manager for LANs.

The company ID (-c) is the identification code assigned to a company. If your system carries two or more companies and you do not enter a company ID, the menu of the company entered by the last person who used the terminal appears.

The access code (-a) is your personal password. Refer to the *Resource Manager User's Manual* for information about assigning passwords.

The most general expression for getting into OSAS takes all the parameters into account. For example, if you are on terminal 2, you want to work with company B, and the password is *selena*, specify that information to enter the system:

```
osas -t T2 -c B -a selena
```

In UNIX you can enter the parameters in any order, and you can use any combination. You must leave a space between the parameter mark (-t, -c, or -a) and the parameter itself.

In Windows you can click on the shortcut's properties and, in the Target field, enter your access code and your company ID. For example, using *selena* as your access code and *H* as your company ID, enter

```
C:\osas\progRM\osastm.exe -m4096 -tT00 -nT00 -aselena -cH
```

In the Windows icon properties, the parameter marks (-m, -t, or -n) can be entered in any combination but must be before the separation dash. The access code and company ID commands (-a and -c) must be entered *after* the separation dash.

## GUI/Text Command Conventions

When you see the phrase “use the **Proceed (OK)** command” in the user's manuals, you can press the **PgDn** key in either text or graphical mode. In graphical mode, clicking the **OK** button has the same effect as pressing the **PgDn** key.

---

## Menu Conventions

When you start OSAS, the Main menu, which presents the applications you can use, appears. If you are using the Resource Manager for UNIX or Linux, the Text menu appears.

If you are using the Resource Manager for Windows, you can choose between the Text menu, the Graphical menu, or the Start-style menu. In Windows, use the Workstation Configuration Defaults function (see the *Resource Manager User's Manual*) to select the style of menu you want displayed by default, or you can press Shift-F5 to toggle between the menu styles from any menu. You can use any of the menus regardless of whether you use the text or graphical modes for the OSAS functions.

### Favorites Menu

The Favorites menu operates in any of the menu formats. The Favorites menu allows quick and easy access to the OSAS functions you use most, allowing you to add selections for entire menus or particular functions.

With the Favorites menu, you save time in no longer switching to and from commonly accessed applications. For example, if you perform tasks in several applications, such as Transactions and Cash Receipts in Accounts Receivable, GL Account maintenance in General Ledger, and Price and Item Inquiry functions in Inventory, you can set up a Favorites menu rather than moving between each application's menus. Once you have set up your Favorites menu, you can open a function for use with one press of the **Enter** key or the click of a mouse button.

#### Favorites Menu: Graphical Style

For a sample of the Start-style favorites menu, see page 1-31. For a sample of the text favorites menu, see page 1-45.

---

## OSAS Graphical

---

In a Windows environment, you can choose from two types of graphical-style menus. The standard Graphical menu features application selections that resemble many Windows functions. The Start-style menu is named because of its functional resemblance to the Start menu in Windows 95, 98, NT and 2000.

Both graphical menus provide pull-down menus, convenient tool buttons and easy access to your installed applications and their functions using either the mouse or keyboard. The two graphical menus provide you with a visual choice in your interaction with OSAS and your data.

When you select an application in either graphical OSAS menu, the application's main menu, presenting several related functions, is displayed beside the OSAS menu. Selecting a function leads you to either a function screen or another menu.

Several commands are available within the menu to perform various tasks such as changing the system date, entering access codes, switching between sample data and live data, and so on. You can perform these menu commands in these ways (if a button or pull-down menu selection is muted or gray, it is not available for use):

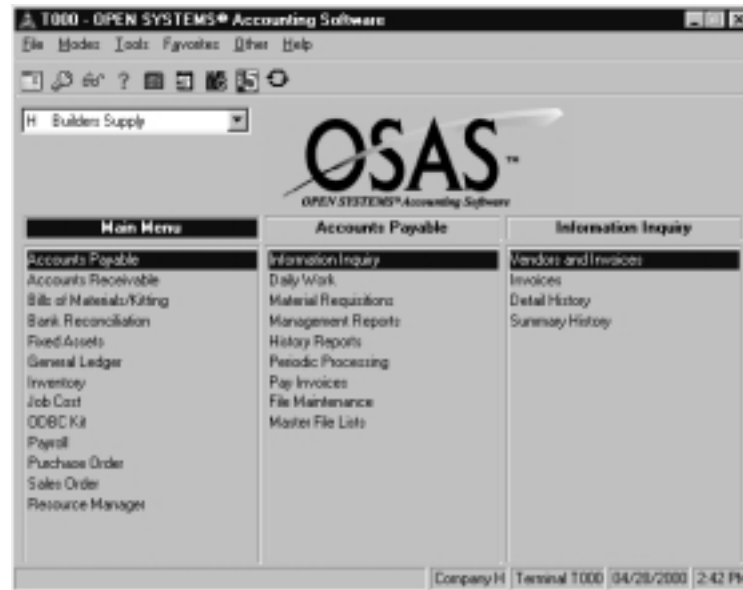

- click the appropriate graphical tool button
- select the command from a pull-down menu
- press the associated keyboard hot key

If you use the graphical menu, you can select application menus and functions by clicking the function or menu name on the menu, or by highlighting your choice and pressing **Enter**.

If you choose the Start menu you can select applications from the Main menu by using the arrow keys to highlight your choice and pressing **Enter**, by clicking the selection, or by holding the mouse cursor over the selection until the menu appears.

From any application menu, you can select a button from the previous menu to move directly to that menu. If you are several menu levels away from the Main menu, you can return to the Main menu by clicking items on the previous menus.

## Graphical Main Menu

You can exit from a Graphical menu in these ways:

- select a button from a previous menu
- press the **Tab** key to go to the OSAS menu
- click the Close box in the upper right hand corner of the window to close OSAS
- use the **Exit (F7)** command to close OSAS
- select **Exit** from the pull-down File menu to close OSAS

## Start Main Menu

You can exit from a menu in these ways:

- press the left arrow key to go to the previous menu (one menu up)
- hold the mouse over a different menu choice
- press the **Tab** key to go to the OSAS menu
- click the Close box in the upper right hand corner of the window to close OSAS
- use the **Exit (F7)** command to close OSAS
- select **Exit** from the pull-down File menu to close OSAS

---

## Special Commands in Graphical Menus

In either graphical menu, you can right-click on a menu selection to display the Special Commands menu, which allows you to perform these special tasks:

From the standard menus:

- add a function or menu to the Favorites menu
- change to the Favorites menu
- change from live to sample data and vice versa
- display information about a function
- perform special application setup

From the Favorites menu:

- remove a function or menu
- change to the Main menu
- change from live to sample data and vice versa
- display information about a function
- perform special application setup

## Menu Keys

Keyboards have a set of function keys (labeled with the letter *F* and a number), which can be used to perform certain functions within OSAS. In OSAS menus, these commands are assigned to the function keys.

Key (Command)	Operation
<b>F1</b> (Key Help)	Displays the tool buttons and functions keys you can use.
<b>F2</b> (Favorites Menu)	Displays or returns from the Favorites menu.
<b>F4</b> (Access Code)	Displays the Access Code dialog box.
<b>F5</b> (Live/Sample swap)	Switches between live and sample data.
<b>F6</b> (Workstation Date)	Displays the current workstation date and allows you to change it.

Key (Command)	Operation
<b>F7</b> (Exit)	Exits from OSAS.
<b>F9</b> (Application Setup)	Performs certain application setup tasks. For example, in General Ledger, you can select the year with which you want to work. If Setup is required in an application, the application's user's manual will describe its usage.
<b>F10</b> (Add/Remove Favorites)	Adds functions to and deletes functions from your Favorites menu.
<b>Shift-F2</b> (Application Info)	Displays information about the applications you have installed.
<b>Shift-F5</b> (Change menu style)	Switch between text and graphical menu styles without going into Defaults.
<b>Shift-F6</b> (Toggle GUI screens)	Toggles between graphical screens and text-based screens for the functions you use.
<b>Shift-F7</b> (Toggle GUI scaling)	Toggles screen scaling on and off. When scaling is off (the default setting), the graphical screens become smaller when you use higher monitor resolutions.

## Pull-Down Menus

When using the graphical menus, you can use the pull-down menus and tool buttons (buttons with graphical icons in a row below the pull-down menus) to access functions without using the function keys. While the function keys work in the graphical menus, the menu bar and tool buttons offer you a choice in accessing these functions. Such a choice is common in graphical Windows applications.

Using the mouse, you can either move the cursor to the menu and click once, or click on a tool button for the function desired. Below is a sample of the OSAS pull-down menu and tool buttons and a description of each.

## File Menu

Command	Tool Button	Key	Result
Access code		<b>F4</b>	Displays the Access Code dialog box. See Access Code dialog box below.
Sample data set or Live Data set		<b>F5</b>	Toggles between the Sample Data and the Live Data.
Workstation date		<b>F6</b>	Displays the Workstation date dialog box. See Workstation Date dialog box below.
Exit		<b>F7</b>	Exits from OSAS.

### Using the Access Code dialog box

To change the access code, enter the code in the field. Then click **OK** to save your entry and return to the OSAS menu, or click **Exit** to abandon the dialog box and return to the menu.

### Using the Workstation Date dialog box

To set a new workstation date, enter the date in the field, use the up/down buttons to increase/decrease the date displayed, or click **System Date** to change the date to match the operating system date. Then click **OK** to change the workstation date, **Abandon** to restore the original date displayed, or **Exit** to return to the Main menu.

### Modes Menu

Command	Tool Button	Key	Result
GUI Functions		<b>Shift-F6</b>	Toggles between GUI function screens and text function screens.
Scale GUI Screens		<b>Shift-F7</b>	Toggles scaling of GUI screens on and off. When scaling is off (the default mode), the screen size is smaller when you use higher monitor resolutions.

### Tools Menu

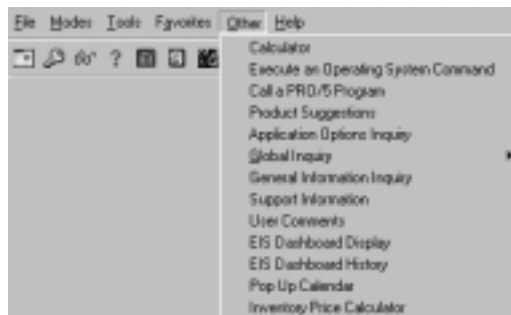

Command	Tool Button	Key	Result
Calculator			Displays the Windows calculator.

## Favorites Menu

Command	Tool Button	Key	Result
Change to Favorites		F2	Displays the Favorites menu/Main menu. See <i>Graphical Favorites Menu</i> on page 1-31.

## Other Menu

The Other menu contains a set of utilities. A calculator and Global Inquiry (which presents data from several applications) are two of the utilities on the Other menu. See the *Resource Manager User's Manual* for information about all of the utilities on the Other menu.

Help Menu

Command	Tool Button	Key	Result
Help		F1	Displays descriptions of the application menus and functions.
About OSAS			Displays the About OSAS dialog box.

Tool Bar Icons

There are three icons on the tool bar that were not described above.

Tool Button	Key	Result
	Shift-F2	Displays the Application Information dialog box.
		Displays the pop-up calendar screen. You can use the calendar to add and review reminders for any date.
		Opens an MS-DOS prompt.
		Displays a screen for calling any BBx program that does not require variables to be passed to it. See Appendix F the <i>Resource Manager User's Manual</i> .

## Other Graphical Menu Features

The graphical menus offer more than shortcuts to menu commands. You can also switch between live and sample data, or change to another company and its data set.

### Change Company Field

Select the company to change to from the pull-down list box.

### Data Set

On the Start menu, you can check the **Live Data** radio button to work with live data, or check the **Sample Data** radio button to work with sample data. You can also press **F5** to change between sample and live data.

### Right-Click Menu

Screen (Key)	Description
Add to/Remove Favorites (F10)	Use the Add to/Remove Favorites menu button to add the desired submenu or function to or from your Favorites menu.
Change to Favorites/Main (F2)	Toggles your display menu between your Favorites menu and your Main menu.
Sample data/Live data (F5)	Switches between your sample data and your live data.
Setup (F9)	Performs certain application setup tasks. For example, in General Ledger, you can select the year with which you want to work. If Setup is required in an application, the application's user's manual will describe its usage.
Function Information (F1)	Displays information about the selected function.

---

## Graphical Favorites Menu

Your Favorites menu saves time in moving between applications, opening and closing submenus and application menus, and allows easy access to your common applications. By setting up your Favorites menu, you can access your most-used functions or submenus by pressing the **F2** key (or by selecting Favorites from the pull-down menu).

### Favorites Menu: Start Style

To add a function to the Favorites menu from the main OSAS menus, simply highlight the function you want to add on the menu and press the **F10** function key to add it to Favorites.

To remove a function from the Favorites menu, highlight the function on the Favorites menu and press the **F10** function key to remove it from the menu.

You can also use the right-click menu to add a function to Favorites or to remove a function from Favorites.

## Graphical Function Commands

Once you select an OSAS application function from the menu, the function screen appears. The way that you enter data on OSAS screens is consistent from function to function. To move around the OSAS screens you use the function commands described below.

In OSAS, commands are assigned to various keys on your keyboard, as well as to certain tool buttons and pull-down menu selections. You can use these commands to work with data entry screens. If a tool button or menu selection appears grayed-out or muted, the command is unavailable at this time.

## Function Tool Bar Buttons

Tool Button	Key	Result
	<b>F6</b>	Go directly to the appropriate File Maintenance function to update information about the field you are in.
	<b>F3</b>	Delete the information on the screen. Since this command can delete an entire record, use it with caution.
	<b>PgUp</b>	Move the cursor back to the first field on the screen or to the first field after the key field without erasing the entries or changes you made.
	<b>Shift-F9</b>	Copy the contents of the current field.
	<b>Shift-F10</b>	Paste the contents you copied from a previous field into the current field.
		Displays the calculator screen.
		Displays the pop-up calendar screen. You can use the calendar to add and review reminders for any date.
	<b>F1</b>	Displays information about the field you are in.
		Displays the on-line documentation.

## Verification Buttons

Click on the **OK** button to proceed to the next screen or to save your entries, click on the **Abandon** button to abandon your entries.

## Function Pull-Down Menus

### Commands Menu

#### Selection (Key)

#### Operations

Inquiry ( <b>F2</b> )	Use the <b>Inquiry</b> command to display a list of valid entries for the current field, from which you can select a choice.
Maintenance ( <b>F6</b> )	Go directly to the appropriate File Maintenance function to update information about the field you are in.
Proceed/OK ( <b>PgDn</b> )	Proceed to the next screen or save your entries.
Start Over ( <b>PgUp</b> )	Move back to the first field on the screen or to the first field after the key field without erasing the entries or changes you made.
Field Up ( <b>Up</b> )	Move the cursor to the previous field.
Field Down ( <b>Down</b> )	Move the cursor to the next field.
Abandon ( <b>F5</b> )	Move the cursor back to the first field on the screen. Any entries or changes you made are erased.
Delete ( <b>F3</b> )	Delete the information on the screen. Since this command can delete an entire record, use it with caution.
Jump ( <b>Ctrl-J</b> )	Move the cursor to the next block of data on the screen or to the next field that requires an entry.
Exit ( <b>F7</b> )	Exit from a screen or a window and disregard everything you entered.

## Edit Menu

### Selection (Key)

Copy (**Shift-F9**)

Paste (**Shift-F10**)

Undo (**Ctrl-Z**)

### Operations

Copy the contents of the current field.

Paste the value you copied from a previous field into the current field.

Restore the contents of the current field from before you made changes to it.

## Modes Menu

Check the options you want to use.

### Selection (Key)

Verify Exit

Bell

Quick

Verify PgDown

### Operations

If verification is turned on, you must press a key twice to verify that you want to perform exit or abandon operations.

If the bell is turned on, it sounds at an error or when you must verify a command.

If this option is turned off, the cursor stops at every field possible. To make the cursor skip the fields that do not require an entry in certain application functions, turn the option on.

If verification is turned on, you must press the **PgDn** key twice to proceed to the next screen or to save your entries.

## Other Menu

### Selection

### Operations

Calculator	Displays the OSAS calculator.
Execute and OS Command	Allows you to enter an operating system command from within OSAS.
Call a PRO/5 Program	Allows you to execute a PRO/5 program.
Product Suggestion	Use this function to create a printable report for future OSAS product suggestions.
Application Options Inquiry	Allows you to view the application options you have set up for a particular application.
Global Inquiry	Use this function to search across your data. You can select from the installed applications which data to search in.
General Information Inquiry	Allows you to search for information on employees, customers, and vendors.
Support Information	Displays the OSAS Support Information.
User Comments	Allows the user to leave messages within the system.
EIS Dashboard Display	Displays the EIS Dashboard.
EIS Dashboard History	Displays the EIS Dashboard history.
Pop-Up Calendar	A reminders feature that allows you to create and read dated reminders within OSAS.

Help Menu

Selection (Key)	Operations
About OSAS	Displays the information about your OSAS installation.
Command Help	Displays the OSAS Key Help screen.
Help (F1)	Get information about the field you are working on.
Online Doc (Shift-F1)	Opens your .PDF file viewer to display the documentation for your particular application.

Information Menu

The Information menu appears on some function screens in certain applications. The functions on the menu are determined by the applications installed.

## Scroll Commands Menu

The Scroll commands menu appears only on screens with scroll regions displaying multiple lines of information.

### Selection (Key)

### Operations

First Line ( <b>Home</b> )	Moves the cursor to the first data entry field.
Previous Page ( <b>PgUp</b> )	Displays the previous page.
Previous Line ( <b>Up</b> )	Moves the cursor up to the previous line.
Next Line ( <b>Down</b> )	Moves the cursor down to the following line.
Next Page ( <b>PgDn</b> )	Displays the following page.
Last Line ( <b>End</b> )	Moves the cursor to the last data entry field.
Insert ( <b>Ins</b> )	Allows the insertion of characters between preexisting entries in a field.
Delete ( <b>F3</b> )	Deletes the selected characters.
Jump ( <b>Tab</b> )	Moves the cursor to the next section of the screen in some functions.

## Inventory Lookup Menu

If you use the Inventory application and the cursor is in an Item ID field, you can use any of the **Inventory Lookup** commands to search for information about items and select an item for entry in the field you are in.

Selection (Key)	Operation
Alias Lookup ( <b>Shift-F3</b> )	Search for items with a specified alias listed as an alternate item. When you enter the alias, you can use the “*” and “?” wildcard characters to restrict or widen the search.
Customer/Vendor Lookup ( <b>Shift-F4</b> )	Search for an item based on customer ID or vendor ID. When you enter the customer or vendor ID, you can use the “*” and “?” wildcard characters to restrict or widen the search.
Detail Lookup ( <b>Shift-F5</b> )	Search for detailed information about an item. You can enter search information in any of the fields that appear, using any of the following wildcard characters to restrict or widen the search: * ? < > =.
Lot Lookup ( <b>Shift-F6</b> )	Search for an item based on lot number. When you enter the lot number, you can use the “*” and “?” wildcard characters to restrict or widen the search.
Serial Lookup ( <b>Shift-F7</b> )	Search for an item based on serial number. When you enter the serial number, you can use the “*” and “?” wildcard characters to restrict or widen the search.
Description Lookup ( <b>Shift-F8</b> )	Search for an item based on item description. When you enter the description, you can use the “*” and “?” wildcard characters to restrict or widen the search.

## Other Graphical Function Controls

### Function Field Inquiry

When the Inquiry button appears next to a field, you can either click on the button or press the **F2** (Inquiry) key.

### Graphical Scroll Region Buttons

Use these command in scroll region areas to move between the lines in the region:

Scroll Button	Key	Result
	<b>Home</b>	Moves the cursor to the first line in a scroll region
	<b>PgUp</b>	Moves the cursor to the previous page of lines in a scroll region
	<b>Up</b>	Moves the cursor up one line
	<b>Down</b>	Moves the cursor down one line
	<b>PgDn</b>	Displays the next page of lines in the scroll region
	<b>End</b>	Moves the cursor to the last line in the scroll region

## Help Commands

When you use the **Help (F1)** command, you can use these commands:

Key	Operation
<b>F6</b> (Maintenance)	Edit a help screen.
<b>F7</b> (Exit)	Exit from the help screen and close the window.

---

## In-Field Editing Commands

When the cursor is in a field that contains information, you can use these keys and commands:

Key	Operation
<b>Right</b>	Move the cursor to the right.
<b>Left</b>	Move the cursor to the left.
<b>Del</b> (Delete)	Delete the character the cursor is on.
<b>Ins</b> (Insert on/off)	Switch insert mode on and off. When the <b>INS</b> flag appears at the bottom right corner of the screen on the status bar, characters you type push characters after the cursor off to the side. When insert mode is turned off ( <b>OVR</b> appears on the status bar), characters you type write over existing ones.
<b>Home</b>	Move the cursor directly to the beginning of the field.
<b>End</b>	Move the cursor directly to the end of the field.
<b>Ctrl-Z</b> (Undo)	Restore a field to the way it was before you changed it. You can use this command only while you are in the field; once you move past it, you must use the <b>Abandon (F5)</b> command to clear the field.
<b>Shift-F9</b> (Copy field contents)	Copy the contents of the current field.
<b>Shift-F10</b> (Paste field contents)	Paste the value you copied from a previous field into the current field.

---

## Inquiry Commands

When you use the **Inquiry** command, several other commands become available for you to use in the inquiry window.

The Inquiry windows operate in two modes: Search and Sort. You can toggle between these modes within an Inquiry window by pressing the **Ins** (Insert) key. You can also choose the default mode for the inquiry windows by using the Defaults function on the Resource Manager Workstation Configuration menu.

- In Search mode, you can move through the keys listed by typing progressively larger portions of the key you want to find. For example, when you type **C**, the window displays keys beginning with the letter C. When you next press **A**, the window displays keys beginning with CA, and so on.
- In Sort mode, you can change the order of certain inquiry windows by pressing the letter key associated with the window sort. You can see the available sorts in any inquiry window by selecting **Command Help** from the Help pull-down menu in the inquiry window.

---

### Note

You can also shorten your data search by entering a part of the key before you use the **Inquiry** command. For example, if you know that the ID starts with *JAR*, enter **JAR** in the ID field before you use the **Inquiry** command. The inquiry list will start with *JAR* and run through the end of the list.

---

Scroll Button	Key	Result
	<b>Home</b>	Moves the cursor to the first key in the inquiry window.
	<b>PgUp</b>	Displays the previous page of keys in the inquiry window.

Scroll Button	Key	Result
	<b>Up</b>	Moves the cursor up one line.
	<b>Down</b>	Moves the cursor down one line.
	<b>PgDn</b>	Displays the next page of keys in the inquiry window.
	<b>End</b>	Moves the cursor to the last key in the inquiry window.
	<b>Ins</b>	Toggle between Search mode and Sort mode.
	<b>F7 (Exit)</b>	Close the inquiry window without selecting anything.
	<b>Enter</b>	Select the item to which the cursor is pointing.

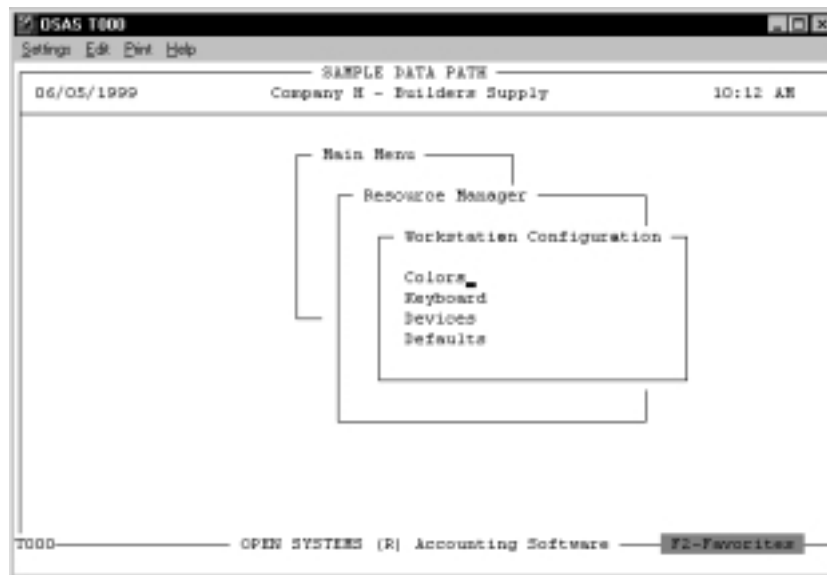

---

## OSAS Text

---

The Text menu can be used on all OSAS compatible systems. Using text-based menus, the Text menu (shown below) offers easy access to your applications.

### Text Main Menu

When you select an application, the application's menu, which presents several related functions, is superimposed over the Main menu. Selecting a function leads you to a function screen or to another menu.

You can select applications from the Main menu in these ways:

- Use the arrow keys to move the cursor up or down, highlighting the application you want to use. Then press **PgDn** or **Enter** to select it.

- Press the first letter of the application you want to use. The cursor jumps to the first application beginning with the letter, press the letter key or the down arrow until the application you want is highlighted. When your choice is highlighted, press **PgDn** or **Enter** to select it.
- Position the mouse cursor over the application and click. The application will briefly highlight and switch to the application screen.
- To jump to the first application on the menu, press **Home**. To jump to the last application on the menu, press **End**.

To select a function from an application menu, highlight and select your choices the same way you do on the Main menu—with one exception: you can press **PgDn** only when an option leads to another menu, and you must press **Enter** to select a function.

On an application menu you can press **PgUp** to move to the menu immediately above it. If you are several menu levels away from the Main menu, you can return to the Main menu by pressing **PgUp** repeatedly or by pressing the **Tab** key.

You can exit from a menu in these ways:

- Press the **PgUp** key to go to the previous menu (one menu up)
- Press the **Tab** key to go to the Main menu
- Use the **Exit (F7)** command to go to the operating system

## Text Favorites Menu

Your Favorites menu saves time in moving between applications, opening and closing submenus and application menus, and allows easy access to your common applications. By setting up your Favorites menu, you can access your most-used functions or submenus by pressing the **F2** key.

### Favorites Menu: Text Style

To set up the text-style display follow these steps:

1. Move your cursor to the submenu or application that you want placed in the Favorites menu.
2. Press **F10**.

You can press **F2** to verify your selection was added to your Favorites menu.

To remove an application:

1. Press **F2** to display the Favorites menu.
2. Move your cursor to the submenu or application you want removed.
3. Press **F10**.

---

## Function Keys Used in the Text Menu

Most keyboards have a set of function keys (usually labeled with the letter *F* and a number). Within the menu, commands are assigned to these function keys. You can use the commands to work with data entry screens.

Except for the **Command Help (Esc)**, the **Jump (Tab)** commands, and the **Enter** key, you can use the Keyboard function in Resource Manager to reassign any function key to any command.

Key	Operation
<b>Esc</b> (Command help)	Views the list of commands for the menu. (To close the commands window, press any key.)
<b>F1</b> (Function Help)	Displays help information for this function.
<b>F2</b> (Favorites Menu)	Displays the Favorites menu or changes to the regular menu from the Favorites menu.
<b>F3</b> (Change Company)	Allows you to switch between companies.
<b>F4</b> (Access Code)	Displays the Access Code prompt.
<b>F4</b> (twice) (Other Menu)	Opens a menu of utilities. A calculator and Global Inquiry (which consolidates and presents information from other applications) are some of the utilities on the Other Commands menu. See the <i>Resource Manager User's Manual</i> for information about the utilities on the Other Commands menu.
<b>F5</b> (Live/Sample swap)	Switches between live and sample data.
<b>F6</b> (Workstation Date)	Displays the current workstation date and allows you to change it.
<b>F7</b> (Exit)	Exits from OSAS.
<b>F9</b> (Application Setup)	Performs certain application setup tasks. For example, in General Ledger, you can select the year with which you want to work. If Setup is required in an application, the application's user's manual will describe its usage.

Key	Operation
<b>F10</b> (Add to Favorites)	Allows you to add to and delete from your Favorites menu.
<b>Shift-F2</b> (Application Info)	Displays information about the applications you have installed.
<b>Shift-F5</b> (Change menu style)	Switch between text and graphical menu styles without going into Defaults.
<b>Shift-F6</b> (Toggle GUI screens)	If you are using the graphical version of OSAS, this command toggles between graphical screens and text-based screens for the functions you use.
<b>Shift-F7</b> (Toggle GUI scaling)	If you are using the graphical function screens, this command toggles screen scaling on and off. When scaling is off (the default setting), the graphical screens become smaller when you use higher monitor resolutions.
<b>PgUp</b> (Start over)	Move back one menu level.
<b>Tab</b> (Jump)	Move back to the Main menu.
<b>Enter</b>	Select a menu or function from a menu.
<b>Up or Down</b>	Move the cursor up or down through the menu selections.
<b>Ctrl-G</b> (Bell on/off)	If the bell is turned on, it sounds at an error or when you must verify a command. To turn off the bell, use this command or the Defaults function in Resource Manager. To turn the bell back on, use this command again.

## Text Function Commands

Once you select an OSAS application function from the menu, the function screen appears. The way that you enter data on OSAS screens is consistent from function to function. To move around the OSAS screens you use the function commands described below.

Most keyboards have a set of function keys (usually labeled with the letter *F* and a number). In OSAS, commands are assigned to these function keys. You can use the commands to work with data entry screens.

---

Except for the **Command Help (Esc)** and **Jump (Tab)** commands and the **Enter** key, you can use the Keyboard function in Resource Manager to reassign any function key to any command.

Key	Operation
<b>Esc</b> (Command help)	View the list of commands for the screen you are on and the field you are in. (To close the window, press any key.)
<b>F1</b> (Help)	Get information about the field you are working on.
<b>F2</b> (Inquiry)	Make a selection from a range of entries for a field if the Inquiry flag appears at the bottom of the screen.
<b>F3</b> Delete)	Delete the information on the screen. Since this command can delete an entire record, use it with caution.
<b>F4</b> (Other)	Open a menu of utilities. A calculator and Global Inquiry (which consolidates and presents information from other applications) are some of the utilities on the Other Commands menu. See the <i>Resource Manager User's Manual</i> for information about the utilities on the Other Commands menu.
<b>F5</b> (Abandon)	Move the cursor back to the first field on the screen or to the first field after the key field. The entries and changes you made are erased.
<b>F6</b> (Maintenance)	Go directly to the appropriate File Maintenance function to update information about the field you are in if the Maint flag appears at the bottom of the screen.
<b>F7</b> (Exit)	Exit from a screen or a window and disregard everything you entered.
<b>F8</b> (List)	Send the contents of the screen to a printer or a text file.
<b>Shift-F1</b> (Online Doc)	Opens your .PDF file viewer to display the documentation for your particular application.
<b>Shift-F2</b> (Information)	Open an Information menu. Each selection on the menu is an information window that you can access if the Info flag appears at the bottom of the screen. Each window contains a category of information about the field you are in.

Key	Operation
<b>PgUp</b> (Start over)	Move the cursor back to the first field on the screen or to the first field after the key field without erasing entries you made.
<b>PgDn</b> (Proceed)	Approve the data on the screen, change the file accordingly, and proceed to the next spot (field or screen).
<b>Tab</b> (Jump)	Move the cursor to the next block of data on the screen or to the next field that requires an entry.
<b>Enter</b> or <b>Down</b>	Move the cursor to the next field and accept the data entered.
<b>Up</b>	Move the cursor up (or back) one field. If you changed the information in the field you were in before you used this command, the change is lost when you move the cursor up.
<b>Ctrl-V</b> (Verification on/off)	If verification is turned on, you must press a key twice to verify that you want to perform that operation.
<b>Ctrl-G</b> (Bell on/off)	If the bell is turned on, it sounds at an error or when you must verify a command. To turn off the bell, use this command or the Defaults function in Resource Manager. To turn the bell back on, use this command again.
<b>Ctrl-F</b> (Quick on/off)	If this option is turned off, the cursor stops at every field possible. To make the cursor skip the fields that do not require an entry, use this command to turn the option on.
<b>Ctrl-O</b> (Show function keys)	If this option is turned on, the applicable function keys are displayed on the screen.

---

## Help Commands

When you use the **Help (F1)** command, three commands become available for you to use on help screens.

Key	Operation
<b>F3</b> (Delete)	Delete the help screen contents. To recover a deleted screen, copy the xxHELP file from the distribution media to the / PROGxx subdirectory (xx is the application ID). The copying process overwrites changes you made to other help screens.
<b>F6</b> (Maintenance)	Edit a help screen.
<b>F7</b> (Exit)	Exit from the help screen and close the window.

## In-Field Editing Commands

When the cursor is in a field that contains information, you can use the following keys and commands:

Key	Operation
<b>Right</b>	Move the cursor to the right.
<b>Left</b>	Move the cursor to the left.
<b>Del</b> (Delete)	Delete the character the cursor is on.
<b>Ins</b> (Insert on/off)	Switch insert mode on and off. When the Insert flag appears at the bottom of the screen, characters you type push characters after the cursor off to the side. When insert mode is turned off, characters you type write over existing ones.
<b>Home</b>	Move the cursor directly to the beginning of the field.
<b>End</b>	Move the cursor directly to the end of the field.
<b>F9</b> (Undo)	Restore a field to the way it was before you changed it. You can use this command only while you are in the field; once you move past it, you must use the <b>Abandon (F5)</b> command.

Key	Operation
<b>F10</b> (Delete to end of line)	Delete the characters in the field to the right of the cursor. If insert mode is turned off and you enter a character in the field's first position, everything in the field is deleted.
<b>Shift-F9</b> (Copy field contents)	Copy the contents of the current field.
<b>Shift-F10</b> (Paste field contents)	Paste the value you copied from a previous field into the current field.

## Inquiry Commands

When you use the **Inquiry** command, several other commands become available for you to use in the inquiry window. The Inquiry windows operate in two modes: Search and Sort. You can toggle between these modes within an Inquiry window by pressing the **Ins** (Insert) key. You can also choose the default mode for the inquiry windows by using the Defaults function in the Resource Manager.

- In Search mode, you can move through the keys listed by typing progressively larger portions of the key you want to find. For example, when you type **C**, the window displays keys beginning with the letter C. When you next press **A**, the window displays keys beginning with CA, and so on.
- In Sort mode, you can change the order of certain inquiry windows by pressing the letter key associated with the window sort. You can see the available sorts in any inquiry window by pressing **Esc** (**Command Help**).

---

**Note**

To shorten your data search, use a partial-key inquiry to cut down the size of the inquiry list. For example, if you know that the ID starts with *JAR*, enter **JAR** in the ID field before you use the **Inquiry** command. The inquiry list will start with *JAR* and run through the end of the list.

---

Key	Operation
<b>PgUp</b>	Display the previous page of the window.
<b>PgDn</b>	Display the next page of the window.
<b>End</b>	Move directly to the last item on file.
<b>Home</b>	Move directly to the first item on file.
<b>Down</b>	Move down one item.
<b>Up</b>	Move up one item.
<b>Ins</b> (Look up)	Toggle between Search mode and Sort mode.
<b>F7</b> (Exit)	Leave the Inquiry window without selecting anything.
<b>Enter</b>	Select the item the cursor is pointing to.
<b>Esc</b> (View commands)	Open a window that shows Inquiry window commands and the window ID.

## Inventory Lookup

If you use the Inventory application and the cursor is in an Item ID field, you can use any of the **Inventory Lookup** commands to search for information about items and select an item for entry in the field you are in.

Key	Operation
<b>Shift-F3</b> (Alias Lookup)	Search for items with a specified alias listed as an alternate item. When you enter the alias, you can use the “*” and “?” wildcard characters to restrict or widen the search.
<b>Shift-F4</b> (Customer/Vendor Lookup)	Search for an item based on customer ID or vendor ID. When you enter the ID, you can use the “*” and “?” wildcard characters to restrict or widen the search.

Key	Operation
<b>Shift-F5</b> (Detail Lookup)	Search for detailed information about an item. You can enter information in any of the fields that appear, using these wildcards to restrict or widen the search: * ? < > =.
<b>Shift-F6</b> (Lot Lookup)	Search for an item based on lot number. When you enter the lot number, you can use the "*" and "?" wildcard characters to restrict or widen the search.
<b>Shift-F7</b> (Serial Lookup)	Search for an item based on serial number. When you enter the serial number, you can use the "*" and "?" wildcard characters to restrict or widen the search.
<b>Shift-F8</b> (Description Lookup)	Search for an item based on item description. When you enter the description, you can use the "*" and "?" wildcard characters to restrict or widen the search.

## Report Commands

You can use the following commands when a report is displayed on the screen:

Key	Operation
<b>PgUp</b>	Move to the previous page of the report.
<b>PgDn</b>	Move to the next page of the report.
<b>Home</b>	Move directly to the top of a group of pages.
<b>End</b>	Move directly to the bottom of a group of pages.
<b>F7 (Exit)</b>	Exit to the menu from any point in the report.
<b>Left</b>	Move left one character.
<b>Right</b>	Move right one character.
<b>Tab (Toggle)</b>	Toggle between the left and right halves of a report.
<b>Up/Down</b>	Move a line up and down the screen to line up information when you toggle between halves of a report.

---

## Scroll Region Commands

When the prompt (>) is in a line-item scroll region, you can use the following commands:

Key	Operation
<b>Down</b> (Next Line)	Move down one line item.
<b>Up</b> (Previous Line)	Move up one line item.
<b>PgUp</b> (Previous Page)	Move to the previous screen or to the first line if you are on the first screen.
<b>PgDn</b> (Next Page)	Move to the next screen or to the last line if you are on the last screen.
<b>Home</b> (First Line)	Move to the first line item in the entire list.
<b>End</b> (Last Line)	Move to the last line item in the entire list.
<b>F3</b> (Delete)	Delete the line item at the prompt (>).
<b>Ins</b> (Insert)	Insert a line item at the prompt (>).
<b>Enter</b> (Edit)	Edit the line item at the prompt (>).

---

## Reports

---

### Selecting a Range of Information

To produce a report, you must specify the amount of information you want in the report.

- To produce a report that includes all the available information, leave the From-Thru fields on the report function screen blank. For example, if you want information about all the vendors to be in a report, leave the Vendor ID From and Thru fields blank.
- To limit the amount of information in the report, enter the range of information in the From-Thru fields. For example, if you want a report to include information only about vendor ACE001, enter ACE001 at both From and Thru. If you want the report to include information only about vendors that start with CO, enter CO at From and COZZZZ at Thru.

Each field where you enter information on a report function screen usually restricts the overall output of the report. For example, if you leave the Vendor ID From and Thru fields blank, the report will contain information about all the vendors. But if you enter invoice 100 in the Invoice Number From and Thru fields, and invoice 100 is assigned only to vendor ACE001, the report includes information only about vendor ACE001.

### Sorting

Information for reports is sorted first by a space ( ), then by characters, then by digits, then by uppercase letters, and finally by lowercase letters. No matter what you enter in the From and Thru fields, however, your entries are sorted in alphabetical order (unless the function provides an option to sort the information differently).

Sorting by alphabetical codes or IDs is easy. For example, the ID *ACL* comes before the ID *BB* because A comes before B.

But take notice when you enter codes or IDs that consist of something other than letters; the order might not be what you expect. For example, if 20 items are labeled 1 through 20 and you want all of them to be in a report, you might enter 1 at From and 20 at Thru, expecting them to be listed 1, 2, 3 . . . 19, 20. However, since OSAS sorts in alphabetical order, they are listed in a different order: 1, 10–19, 2, 20, 3–9.

To prevent that situation, pad extra spaces in codes and IDs with zeros so that numbers in alphabetical order are also in numerical order. In the example above the items would be labeled 00000000000000000001 through 00000000000000000020.

## Output the Report

When you use the **Proceed (OK)** command, the Output Information screen appears.

### To print the report

- Select **Printer** and choose the printer. On some reports, you can also choose whether to print the report in standard-size print or in compressed print.
- Click **OK** (or press **Enter** in text mode) to continue.

### To view the report in Print Preview mode

- Select **Print Preview** and choose the printer. On some reports, you can also choose whether to print the report in standard-size print or in compressed print.

- 
- Click **OK** (or press **Enter** in text mode) to continue.

**To save the report as a File**

If you want to save the report as a data file—for example, to include it in a word-processed report (in CR-LF format)—select File. The data path for the workstation, including the default drive, appears if it is specified in the Defaults function. Enter the filename and file extension, using no more than 35 characters overall.

## Before You Install Payroll

Make sure your system meets these minimum requirements before you install Payroll.

The Payroll system needs a minimum of 13 megabytes (13Mb) of disk space to work correctly with programs, sample data, data dictionaries, system files, and graphics files. Having more disk space available is necessary for the data files you will create and maintain.

The OSAS system requires at least one megabyte (1Mb) of main memory to run. More memory may be necessary in certain environments and operating systems.

## Installing Payroll

Use the Install Applications function in Resource Manager (see the *Resource Manager User's Manual*) to install Payroll. Install the State Tax Routines after you install Payroll. If you intend to use Direct Deposit with Payroll, install it after you install the State Tax Routines.

## Setting up Payroll

Once you have installed Payroll on your system, you must prepare your data files for everyday use.

You can prepare files for use with Payroll in one of two ways: you can create and set up your files manually on a new system, or you can convert your old files when you upgrade from an earlier version. To create files on a new system, use the Data File Creation function on the Company Setup menu in Resource Manager (see the *Resource Manager User's Manual*). For instructions on converting your files, see the *Conversion* section later in this chapter.

If you plan to use General Ledger, Bank Reconciliation or Job Cost with Payroll, you must set up those applications before you set up Payroll.

---

## Conversion

---

If you use an earlier version of OSAS Payroll, you can convert your files from the older version to the current version.

When you are ready to convert files, use the Data File Conversion function on the Company Setup menu in Resource Manager (see the *Resource Manager User's Guide*) to upgrade Payroll data files. You can upgrade from version 3.2, 4.xx, 5.xx, or 6.0x. If you want to convert to version 6.1 from a version earlier than 3.2, contact a client support representative.

---

### Note

You must install the new version of Payroll before you convert files. You can replace and update the programs properly only by using the Install Applications function in Resource Manager.

Before you convert an application's files, make note of the version number of the application you are converting from. The Data File Conversion function has no way of determining the information from within the function.

---

Before you convert an application's files, back up your data files.

## Consider Your Setup

Before you try to convert from your version of Payroll, consider the exact setup of your system. Since OSAS code can be customized, modifications to your system might be lost if you install a new version of a program or update a file. If you are not sure if your system is ready for conversion, consult your value-added reseller.

## Converting from Version 4.x and Earlier

Before you begin the conversion from a version before 5.00, you must set up one table and gather some additional information.

Each local code must be assigned to its respective state. The system looks for the PA50CNVT table and uses it to assign local codes to their respective states. To update the PA50CNVT table, follow these steps:

1. Select Data File Maintenance from the Resource Manager Main Menu.
2. Select Application Tables and press **Enter**.
3. In the Enter Table Filename field enter **PATB**.

4. Use the **Inquiry (F2)** command to select **PA50CNVT** or enter **PA50CNVT** in the Table ID field. The PA50CNVT table appears.

One hundred entries are in the table. You can enter state codes, assigning them to local codes. If you do not use local codes or do not add them to the table at this point, the conversion will still be successfully completed. When you are finished entering codes, exit to the File Maintenance menu.

## Converting from Version 5.0x and Earlier

In previous versions of Payroll, earnings and withholdings amounts in employee history were broken down only to the quarter-to-date level. Beginning in version 5.1, those amounts are broken down to a month-to-date level. To accommodate this situation, the conversion program must allocate quarter-to-date figures from previous versions into the new month-to-date fields. The conversion program will prompt you to select one of these methods:

- The *monthly* method divides total quarterly amounts evenly among the monthly fields. For example,

January: 33.3  
 February: 33.3%  
 March: 33.3%

- The *daily* method allocates amounts precisely. The program calculates days per month and the percentage of each day in the quarter. If the last payroll check run was in the middle of a month, the system allocates amount percentages correctly up to that date. If you select this option, you must enter the last check date. For example,

Quarter 1

January: 31 days of 90 in Quarter = 34.44%  
 February: 28 days of 90 in Quarter = 31.11%  
 March: 31 days of 90 in Quarter = 34.44%

If you are converting files from OSAS 4.0x or lower, do not use the following option.

- The *history* method reads check amounts from your previous Payroll version's Check History file, producing a quarterly total and calculating the monthly percentage by dividing each monthly subtotal into the quarter. The system adds only checks that fall within one calendar year. This choice requires accurate historic data and is the most time-consuming, yet accurate, of the three methods. If you select this option, you must enter the current payroll year. For example,

Employee ID	Check Number	Check Date	Gross Check Amount	Totals
John Doe	1111	01/15/00	\$1000.00	
John Doe	2222	01/31/00	\$1200.00	
				\$2200.00
John Doe	3333	02/15/00	\$1000.00	

---

Employee ID	Check Number	Check Date	Gross Check Amount	Totals
John Doe	4444	02/28/00	\$800.00	
				\$1800.00
John Doe	5555	03/15/00	\$1000.00	
				\$1000.00

**Total**

January = \$2200.00 out of total earnings of \$5000.00 = 44%

February = \$1800.00 out of total earnings of \$5000.00 = 36%

March = \$1000.00 out of total earnings of \$5000.00 = 20%

Any of these split methods can cause leftover amounts to be rounded. If this situation happens for the first quarter, the amount is entered in the first month of the quarter. If it happens for the year, the amount is entered in January.

---

## Converting to Version 6.1

Select **Data File Conversion** from the Company Setup menu in Resource Manager. The function screen appears.

**Data File Conversion**

Commands Edit Modes Other Help

Select directory on which to create files.

☒ /O SAS/data/

☐ /O SAS/data2/

Enter directory that contains the files to be converted:

j:\c:\osas\osas605\data

Do you want source files erased after conversion? ☐

Do you want conversion to pause if a problem is found? ☒

Appl	Description	Version
AR	Accounts Receivable	6.05
AP	Accounts Payable	6.05

Appl	Description	Version
------	-------------	---------

Company H 05/01/2000 Terminal T000 INS

1. The system displays all valid OSAS data paths. Select the destination directory where your new data files will reside.
2. Enter the path (drive and directory) that has the files you want to convert. You cannot enter the same path as the path you selected as the destination.
3. If you want source files to be erased after conversion, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).
4. If you want the conversion process to pause if a problem occurs, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode). The system considers file corruption or evidence of data not converting correctly a problem.

- 
5. Enter **PA** in the Appl column; *Payroll* appears.
  6. Enter your earlier version number of Payroll, and press **Enter**. (You can determine the version by looking at the copyrights screen when you start OSAS, or in most versions, by using the Application Information tool button on the menu screen in graphical mode or by pressing **Shift-F2** in text mode.)
  7. If data files already exist for Payroll in the intended destination path, the **PA data files exist. Do you want this task to erase them?** prompt appears. If you want to erase the existing files and convert the files from the version in the source path, select **Yes** (or enter **Y** in text mode); if not, select **No** (or enter **N** in text mode). If you elect not to erase existing files, you must change your directory choices so that no conflict exists.
  8. To convert, use the **Proceed (OK)** command.
  9. The **Do you want a printout of error log after each application?** prompt appears. If you want the error log to be produced after files are converted for each application, select **Yes** (or enter **Y** in text mode); if you want the log to be produced after files for all applications are converted, select **No** (or enter **N** in text mode). If you are converting only Payroll files, your answer to this prompt makes no difference.
  10. Answer the questions that appear relating to the conversion of the employee history and last-year files.
  11. If a problem occurs and you indicated that you want the system to pause when a problem occurs, a prompt alerts you. To stop the conversion process, select **Yes** (or enter **Y** in text mode). To let the conversion run its course and investigate later, select **No** (or enter **N** in text mode).
  12. When the process is finished, the files are converted. Select the output device for the error log.

After conversion is finished and the error log is produced, the Main menu—with Payroll added—appears.

---

# Setup

---

Setup Considerations	3-3
Setup Checklist	3-7
Setup Functions	3-9

---

## Setup Considerations

---

After you have installed the software for the first time or after you have upgraded the software, you must set up the system. Follow the setup procedures carefully; the choices you make determine how the system will operate.

To properly set up the Payroll system, you need to gather and organize your payroll data. You need the following information:

- your payroll department procedures
- payroll records for each employee
- federal, state, and local tax publications
- the *Payroll State Tax Routines* media
- a chart of accounts for your business
- a list of the deductions you use
- a list of the other-pay types (bonuses, tips, and so on) you use

### Codes and IDs

When you set up the system, you assign codes and IDs to tell the system how to identify each item on file. The system uses these identifiers to organize the information in reports and inquiry windows.

The system arranges code characters in a particular order. In the following list codes and IDs are sorted from lowest to highest, and dashes represent blank spaces.

— — — — — 0  
— — — — — 1  
— — — — — Z  
— — — — — a  
— — — — — 01  
— — a — — —  
0 0 0 0 0  
0 0 0 0 1  
1

---

The organization of these codes illustrates the following principles:

- The system reads codes from left to right until it finds something other than a blank space.
- Items that make up a code are *always* listed alphabetically. The items are listed in this order for each position:

- blank spaces
- characters (-, \*, /, and so forth)
- numbers (0-9)
- uppercase letters (A-Z)
- lowercase letters (a-z)

Alphabetical rules are not intuitive when numbers are involved. Numbers are sorted as if they were letters: When the first characters of several IDs are compared, the ID with the smallest first character is placed first in the list. If the first character of the IDs is the same, the second characters are compared and the ID with the smallest second character is placed first in the list. This comparison is made for each character in the range of IDs until the IDs are clearly in alphabetical order.

If you use numbers for IDs, pad them with zeros so that they are all the same length and numeric rules can hold true. For example, in alphabetical sorting ID 112 comes before ID 60, since anything that starts with 1 comes before anything that starts with 6 *alphabetically*. If ID 60 were ID 000060 and ID 112 were ID 000112, ID 000060 would be listed first, since 060 is less than 112 alphabetically and numerically.

When you assign IDs and codes, establish a format that makes sense for your business and use it consistently. The following suggestions may help:

- To prevent organization problems, use zeros to make all IDs the same length. If IDs are divided into more than one part, the parts should be the same length in every ID. Do not use spaces to divide IDs into more than one part. For example, use ACE-01 and ACE-11 instead of ACE-1 and ACE-11 or ACE 01.

- 
- If you use letters in IDs, use either all uppercase or all lowercase letters so that the IDs can be sorted correctly.
  - Use descriptive IDs. For example, SALES01 and MKTG01 are more descriptive IDs than 000001 and 000002. (If you already use a numbered system, you might want to stick with it.)
  - If you want to sort items by a particular attribute—name or group—put the attribute in the ID. For example, to organize employees by their last names, put the first characters of the last name in the employee ID.
  - To ensure that you can insert new items into a sequence, use a combination of letters and numbers that leaves room in the sequence for later additions. For example, setting up two consecutive IDs of AND001 and AND005 leaves room for three IDs in between.

---

## Setup Checklist

---

Follow the steps below to set up the Payroll system. Following the order of the steps should save you from repeating your work. Each step is explained in this section.

1. Set up the options and interfaces.
2. Set up earning types (PAETxxx file).
3. Set up earning codes (PAECxxx file).
4. Set up tables (PATBxxx file).
5. Set up tax tables (PATXxxx file).
6. Set up withholding codes for tax authorities (PACO file).
7. Set up withholdings (PAWIxxx file) and tax groups (PATGxxx file).
8. Set up company deductions (PADDxxx file).
9. If necessary, use the Formula Maintenance function to add formulas to the PAFMHDR (Formula Definition) and the PAFMLIN (Formula Line Detail) files.
10. Set up departments (PADPxxx file).
11. Set up payroll information (PAINxxx file).
12. Set up labor classes (PALCxxx file).
13. Set up employees (PAEGxxx and PAEPxxx files).
14. Use the Roll Up Leave Balances function on the Periodic Maintenance menu to set up leave adjustments (PAHVxxx file).

- 
15. If necessary, set up employee history (PAEDxxx, PAEExxx, PAEMxxx, and PAEWxxx files).
  16. Enter initial balances.
  17. Set up recurring time tickets and deductions.
  18. Set up access codes.
  19. Set up a backup schedule.

---

# Setup Functions

---

## Options and Interfaces

An application can be interfaced to work in conjunction with other applications. Payroll can be interfaced with General Ledger, Bank Reconciliation, and Job Cost.

### General Ledger

When Payroll is interfaced with General Ledger, posting in Payroll makes summary entries (such as gross wages payable, taxes and other deductions withheld, net pay, and payroll expenses incurred) in the General Ledger GLJRxxx (Journal) file for transactions that affect the ledger.

If you void a payroll check after it has been posted, the check is backed out from General Ledger and the check record can be added to the Payroll PACHxxx (Checks), PACDxxx (Checks Deductions), PACExxx (Checks Earning), and PACWxxx (Checks Withholdings) files for a manual check or to the PATRxxx (Transactions) file for a calculated check.

### Bank Reconciliation

When Payroll is interfaced with Bank Reconciliation, posting checks in Payroll creates summary disbursement entries for the checks in the Bank Reconciliation BRTRxxx (Transactions) file for the bank account you specify.

The Payroll system can keep track of checks lost to alignment problems in the Bank Reconciliation application and in Payroll history so that the lost checks are accounted for.

### Job Cost

When Payroll is interfaced with Job Cost, you can assign actual labor hours and dollars to the appropriate job and phase in the Job Cost JOBSxxx (Jobs) file. When and where appropriate, the interface also updates the number of pieces completed.

## Options and Interfaces Screen

Select **Options and Interfaces** from the Resource Manager Company Setup menu. The Options and Interfaces screen appears.

The name of the company you are working with is displayed. Specify whether the Options table is *shared* or *owned*. (See the *Resource Manager User's Manual* for information about Options tables.) Then enter **PA** as the application ID. The Payroll Options screen appears.

The screenshot shows the 'Payroll Options' window. It has a menu bar with 'Commands', 'Modes', 'Other', 'Scroll Commands', and 'Help'. Below the menu bar is a toolbar with icons for back, forward, search, and help. The main area is a table with two columns: 'Description' and 'Value'. The table contains 14 rows of options. The 'Value' column has buttons next to each value to toggle between different settings. At the bottom of the table, it says 'Option (007 of 014)'. Below the table are three buttons: 'Enter = Toggle', 'Up/Down', and 'Write'. At the very bottom, there is a status bar showing 'Company ID', '03/22/1999', 'Terminal T000', and 'OVR'.

Description	Value
Interface to General Ledger?	YES
Interface to Job Cost?	YES
Interface to Bank Reconciliation?	YES
Save Payroll transaction history?	YES
Save check history?	YES
Post Voided Checks to Check History?	YES
Post Voided Checks to Bank Reconciliation?	YES
Automatic Accrual of Vacation/Sick Time?	YES
Include vacation/sick hours for accrual calculation?	YES
Use First or Last Name First?	LAST
Print company name on checks?	YES
Print checks on blank, preprinted or laser forms?	PRE-PRINTED
Use time card calculator?	NO
Post Employer Taxes/Deduction to Home or Worked Department?	HOME

Option (007 of 014)

Enter = Toggle   Up/Down   Write

Company ID   03/22/1999   Terminal T000   OVR

### Enter = toggle, Write

To toggle an option (for example, between YES and NO), press **Enter**.

When you finish setting options, press **W** to save your entries. Then exit to the Options and Interfaces screen. Select another application whose options you want to change, or exit to the Resource Manager Company Setup menu.

- 
1. Toggle to **YES** or **NO** to indicate whether or not you want to interface Payroll with General Ledger, Job Cost, and Bank Reconciliation. The interface options work independently of each other. You can respond to them with any combination of settings.
  2. Toggle to **YES** or **NO** to indicate whether or not you want to save Payroll transaction history. You cannot produce the Transaction History Report unless you save transaction history.
  3. Toggle to **YES** or **NO** to indicate whether or not you want to save check history. You cannot produce the Check History Register or the 941 Worksheet unless you save check history.
  4. Toggle to **YES** or **NO** to indicate whether or not you want voided checks to be posted to the PAHCxxx (Check History) file. These check forms have been voided as a result of printing payroll checks, not as a result of using the Void Checks function.
  5. Toggle to **YES** or **NO** to indicate whether or not you want voided checks to be posted to Bank Reconciliation if Bank Reconciliation is interfaced with Payroll. These check forms have been voided as a result of printing payroll checks, not as a result of using the Void Checks function.
  6. Toggle to **YES** or **NO** to indicate whether or not you want to accrue vacation and sick time automatically.
  7. Toggle to **YES** or **NO** to indicate whether or not you want to use vacation and sick hours for accrual calculations of additional sick and vacation time.
  8. Toggle to **FIRST** or **LAST** to indicate whether you want to print the first names of employees first on checks and in reports or whether you want to print last names first.
  9. Toggle to **YES** or **NO** to indicate whether or not you want to print the company name on checks.
  10. Toggle to **BLANK**, **PREPRINTED**, or **LASER** to indicate whether you want to print checks on blank check stubs, preprinted forms, or laser forms.

---

If you use preprinted checks, the stub is printed first; if you use blank check stubs or laser forms, the check is printed first.

11. Toggle to **YES** or **NO** to indicate whether or not you want to use the time card calculator during entry of time tickets for hourly employees.
12. Toggle to **HOME** or **WORKED** to indicate whether you want to post employer-paid taxes and deductions to the employee's home department from the PAEGxxx (Employee General Information) file or the department(s) they worked in during the pay period.

## Earning Types

Use the Earning Types function (see page 11-13) to set up and modify the way the system uses earning codes. The system has nine preset earning types which are used by the system in special ways.

You cannot change or delete the preset earning types. You can, however, set up additional earning types. When you set up earning codes, you specify the earning type to which the code belongs. For example, you might have four kinds of bonus pay. You set up each kind of bonus pay as an earning code and group them all under one earning type.

## Earning Codes

An earning code stores pay rate information, the GL holding account number, the pay type, and other information for a particular kind of work. When entering time tickets or manual checks, you can enter an earning code and the number of hours worked; the system calculates the employee's pay based on the information stored in the PAECxxx (Earning Codes) file.

You can set up earning codes for types of work. For example, you can set up an earning code for work involving assembly, another for packaging, and so on. You can set up earning codes for overtime and double-time work that automatically multiply or add amounts to the base pay.

Use the Earning Codes function (see page 11-9) to set up earning codes.

---

## Tables and Tax Tables

Tables store information relating to the system, data, options, and default settings for other applications. Tax tables are used to calculate federal, state, and local tax withholding.

**Note**

Use tables only to enter and store data. Do not delete lines or rearrange account descriptions. The system looks for information by the position of the lines in the table. For example, in the `FREQxxx` table, the system assumes that the first group code is on the first line, the second group code is on the second line, and so on.

You must set up and/or review the following system tables and tax tables before you build the Payroll data files:

- `ADJMNxxx`
- `FREQxxx`
- `GLDEPxxx`
- `GLPAYxxx`
- `MAXVSxxx`
- `PACTLxxx`
- `SICccxxx`
- `TCACLxxx`
- `USRDDxxx`
- `USRDFxxx`
- `VACccxxx`
- `EIC`
- `FEDM`
- `FEDS`
- `FICA`
- `FUTAxxx`
- `LTXssllm`
- `SOTss`
- `STSss`
- `STXssm`

- SUTsxxxx
- W2CODE
- W2CODE2

You can set up the ADJMNxxx, FREQxxx, GLDEPxxx, GLPAYxxx, PACTLxxx, SICccxxx, TCALCxxx, USRDFxxx, USRDDxxx, and VACccxxx system tables and the FUTAxix, STSss, STXssm, SUTsxxxx, W2CODE, and W2CODE2 tax tables for individual companies and/or all companies that are in the system. You can set up one table for all the companies that are alike, and you can set up one table for each company that is different.

**Note**

You must enter **OWN** in the Option Table Type field in the Options and Interfaces function to be able to set up company-specific options.

For example, you can set up table GLPAY for companies that post payroll transactions to the same general ledger accounts; and you can set up table GLPAYA01 for company A01, GLPAYB01 for company B01, and so forth if those companies post payroll transactions to different general ledger accounts.

These tables are identified by a three- to five-character prefix and a two- to five-character suffix. The prefix is the table name—FUTA for federal unemployment tax, for example. The suffix is a company ID or a systemwide table. If you delete a company-specific table, that company uses the generic table. For example, if you delete table GLPAYA01, company A01 uses the GLPAY table.

You can set up the SUTsxxxx, SOTss, STSss, and STXssm tax tables for each state where you do business. For example, you can set up table SUTAZ to store the percentage and earnings limit that Arizona uses to calculate employer state unemployment.

You can set up the LTXsslm table for each locality where you do business. For example, you can set up table LTX01 to store the base and percentage figures that the locality uses to calculate tax withholding.

---

In addition, you can set up the LTXssllm table for marital statuses. For example, you can set up table LTX01S to store the base and percentage figures that the locality uses to calculate tax withholding for unmarried employees.

You must set up a MAXVSxxx table for each company that uses the table.

For more information on setting up tables, see page 10-73. For more information on setting up tax tables, see page 10-89.

## Withholding Codes for Tax Authorities

Use the Tax Authority Setup function (see page 11-6) to enter and maintain withholding codes for federal, state, and local tax authorities that employees need for withholdings. You can also set up the formula names associated with each code for the states and localities.

You can enter 15 additional employee and employer withholding codes for each federal, state, and local tax authority. Most federal and state codes are preset.

## Withholdings

Use the Withholdings function (see page 11-23) to set up and maintain federal, state, and local withholdings for your employees. The information is stored in the PAWIxxx (Withholdings) file.

You can exclude deductions and/or earning codes from withholdings and set up employer-paid withholdings.

To establish the order in which withholdings are taken, use the Tax Authority Setup function (see page 11-5).

### Federal Withholdings

You can set up the following federal tax codes:

- FWH Federal withholding
- OAS Employee FICA

- 
- MED Employee FICA
  - FUT Unemployment insurance
  - EIC Earned Income Credit
  - EOA Employer FICA
  - EME Employer FICA

Fixed percent withholding applies to the FWH tax code only. If you have forms of other pay that are taxed at a fixed rate, you can enter the fixed percentage to withhold. (You cannot assign fixed withholding percentages to FICA or FUTA tax codes.)

## State Withholdings

To use state withholding, you must install the Payroll Tax Routines provided by Open Systems.

For each state authority, you can set up the following tax codes:

- SWH State withholding
- SUI State Unemployment Insurance (employer)
- SO1 State-other withholding 1
- SO2 State-other withholding 2
- SO3 State-other withholding 3

The state withholding and state unemployment insurance tax codes are used by the system and should not be modified or deleted.

Use of the state-other withholding varies from state to state. See the *Payroll State Tax Routines* for information about the states where employees live. These codes must first be set up in the Tax Authority Setup function.

Fixed withholding applies to the SWH tax code only. If you have forms of other pay that are taxed at a fixed rate, you can enter the fixed percentage to withhold. (You cannot assign fixed withholding percentages to SUI or SOx tax codes.)

You can set up other codes (for example, WKC for worker's compensation) as you need them in the Tax Authority Setup function.

---

## Local Withholdings

To use local withholding, you must create and install your own local tax routines in the Tax Authority Setup function. Contact your dealer or installer for more information.

For each local authority, you can set up these tax codes:

- LWH Local withholding
- LO1 Local-other withholding

Fixed withholding applies to the LWH tax code only. If you have forms of other pay that are taxed at a fixed rate, you can enter the fixed percentage to withhold. (Do not assign fixed withholding percentages to the LO1 tax code.)

## Deductions

Use the Deductions function (see page 11-17) to set up and maintain payroll deductions. You can enter 999 deductions. You must enter a description and a general ledger liability account number before you can use a deduction.

You can set up deductions that are strictly employer-paid. You can exclude some earning codes from deductions—for example, 401(k) programs—so that deductions will be withheld from specific earnings. You can flag deductions as deferred compensation, which is reported on employee W-2 forms. In addition, you can determine whether deductions are to be taken from net or gross pay.

The employer expense account for employer-paid deductions is stored, along with the deduction record, in the PADDxxx (Deductions) file. Deductions information updates the PADDxxx and PADXxxx (Deduction Exclusion) files.

You can also copy deductions to a group of employees you specify.

---

## Formulas

Most of the formulas you need are preset, but you can use the Formula Maintenance function (see page 10-91) to set up and maintain the formulas needed to calculate deductions and withholdings. For a detailed explanation of formulas, see appendix C.

After a formula has been set up, you can use the Deductions function (see page 11-17) or the Withholdings function (see page 11-23) to edit it.

## Departments

Department records store amounts posted from time tickets and checks. This information is used to update accounts in the General Ledger system.

Use the Departments function (see page 10-51) to set up and maintain departments. You can set up earning codes and employer-paid withholdings and deductions, and through Resource Manager you can specify precision for the Hours fields. New entries are automatically appended when you post time tickets or checks. The information is stored in the PADPxxx (Department) file.

Divisions summarize groups of departments in the Department Report, which summarizes the labor expenses posted to each department.

If you use divisions, each department ID must begin with the two-character division ID. If you do not use divisions, department IDs must be at least three characters long.

## Payroll Information

Payroll Information includes state unemployment reports and the company address. This information is essential to the Payroll system and must be set up before you can begin processing. It is stored in the PAINxxx (Payroll Information) file.

---

## State Unemployment Reports

Most states that collect unemployment taxes require a quarterly report that lists employee names, wages earned, and weeks or hours worked. Use the Payroll Information function (see page 10-57) to set up your state unemployment reports for the states where you pay unemployment taxes.

The Payroll system credits employees for the full number of weeks they worked in pay periods they receive pay. The system looks at the Weeks Worked Limit field in the SWH record in the PAWIxxx (Withholdings) file for the minimum number of hours worked to be credited for one week of work. Consult the state tax authorities about the appropriate method for determining weeks worked in your state, and adjust the Weeks Worked field in the Employee History function as necessary before printing the report.

## Company Address

Use the Payroll Information function to establish or change the company address.

## Employer Bank Information

Use the Payroll Information function to enter the next check number for printing checks.

## Degree Descriptions

Use the Payroll Information function to enter degrees and descriptions for employees. These descriptions are used in the Personnel Information function.

## Labor Classes

Use the Labor Classes function (see page 11-3) to set up and maintain labor classes. Labor classes can be used to group types of employees. For example, you might set up labor class EXM for executive managers, MIM for midlevel management, and so on.

Labor classes are stored in the PALCxxx (Labor Class) file and are used in the Employees function. They are helpful for report sorting.

---

## Employees

Each employee record consists of four sections: General Information, Salary Information, Tax Information, and Personnel Information. Use the Employees function (see page 10-3) to set up and maintain employee records.

The information is stored in the PAEGxxx (Employee General Information), PAEPxxx (Employee Personnel), PAESxxx (Employee Federal/State/Local Withholdings), PAEXxxx (Employee Exclusion), and PADExxx (Employee Deductions) files.

### General Information

Use the General Information portion of the Employees function to enter and maintain such fundamental employee information as the employee's home address, sex, job title, and so on.

### Salary Information

Use the Salary Information portion of the Employees function to enter and maintain pay information for the employee.

If the employee's normal salary may not meet federal minimum standards, you can use the Adjust to Minimum feature to automatically bring the employee's paycheck up to minimum wage.

### Group Codes

Group codes identify the employees you want to pay when you calculate checks. Common practice is to use different group codes for different pay cycles. For example, hourly employees who are paid weekly might be group 1, salaried employees who are paid monthly might be group 2, and commissioned employees might be group 3.

---

### Override Pay

You can enter override pay when you want to pay salaried employees something other than their normal salaries—for example, when employees start or quit within a pay period. Override pay applies only to the pay cycle you enter it in. When the pay cycle is completed, override pay is cleared from the system.

### Tax Information

Use the Tax Information portion of the Employees function to enter federal, state, and local tax information. Research the state and local tax information before entering the data. In particular, marital status and number of exemptions can differ among tax authorities.

The valid marital statuses for federal tax purposes are *married* and *single*, but in some states employees can be married, single, unmarried heads of households, married filing jointly, or married filing jointly and both working. Consult the *Payroll Tax Routines* for information about marital status in the states where employees file; Open Systems does not supply information about local tax regulations.

### Personnel Information

Use the Personnel Information portion of the Employees function to enter information about the employee's education, pay history, and so on.

### Leave Adjustments

Before using the Leave Adjustments function, use the Roll Up Leave Balances function (see page 9-45) if you elected to include vacation/sick hours for accrual calculation in the Resource Manager Options and Interfaces function. Then use the Leave Adjustments function (see page 10-49) to make positive and negative adjustments to an employee's sick and vacation pay.

---

## Employee History

If you start Payroll at any other time than the beginning of the year and you elect to create either check or transaction history (see **Initial Balances** below), you must collect and enter a lot of history information. Fortunately, you need enter data for only a handful of deductions for most employees. Remember to get month-to-date, quarter-to-date, and year-to-date figures for all fields.

The number of weeks worked is calculated on the basis of the number of pay periods the employee received a check for *any* amount. For example, if you use biweekly pay periods and an employee received one hour of sick pay in that pay period, the employee would be credited for two weeks worked. If you entered a week's worked limit for the state in the Payroll Information function, the number of hours worked would be compared to the limit, and in this case two weeks under limit would be recorded.

When you calculate FUTA, SUI, and FICA (OASDI), remember that there is no withholding above the ceiling on these wages.

Employee history information is stored in the PAEDxxx (Employee Deduction History), PAEExxx (Employee Earnings History), PAEMxxx (Employee Miscellaneous History), and PAEWxxx (Employee Withholding History) files.

## Initial Balances

Unless you are setting up the Payroll system at the beginning of the year, you must enter the payroll history for employees from the beginning of the current calendar year so that reports accurately reflect the payroll for the year. How you enter initial balances and payroll history depends on whether you are setting up the system with or without check, employee, and transaction history.

If you installed Payroll, General Ledger, Bank Reconciliation, and Job Cost at the same time, leave the application interfaces turned on. If you are adding Payroll to an existing system, turn the application interfaces off to prevent double-posting while you set up initial balances.

---

## Setting up Without Check or Transaction History

If you do not need check or transaction history, the simplest way to set up Payroll is to collect all the general ledger period-to-date, quarter-to-date, and year-to-date numbers for departments; use the Departments function to enter this information into your records. Then collect month-to-date and year-to-date numbers for employees; use the Employee History function (see page 10-25) to enter this information into your records.

While this method produces records with accurate month-to-date and year-to-date information, you will have no history and no audit trail. Use this method only if you want to get started as quickly as possible.

## Setting up With Check History Only

If you need only check history, turn off the interfaces with General Ledger, Bank Reconciliation, and Job Cost. Do not enter period-to-date, quarter-to-date, or year-to-date numbers in the Departments function; and do not enter month-to-date or quarter-to-date numbers for employees in the Employee History function. Instead, enter all the checks for each period, post the checks, and post expenses to General Ledger. Do quarter-end maintenance as necessary, and continue entering checks and printing reports until you are up to the current payroll period (see **Entering manual checks** below).

This method produces accurate check history, employee history records, department records, and an audit trail. It does not produce transaction history.

## Setting up With Transaction, Employee, and Check History

If you need complete transaction, employee, and check history, you must re-create all the entries for the current year. After you set up the PAINxxx (Payroll Information), PADPxxx (Department), and PAEHxxx (Employee History) files (do not enter QTD and YTD information), set the system date to the beginning of the fiscal year and begin entering the payroll transactions in sequence. Post transactions at the end of each "day." Then reset the system date and enter the next day's transactions. When you reach the end of a payroll period, calculate checks and post expenses to General Ledger. (For more information, see chapter 1.)

**Note**

When you post checks, you must select the tax month.

Do quarter-end maintenance as necessary, and continue processing transactions and printing reports until you are up to the current pay period.

This method produces the most accurate history and the most thorough audit trail, but it is practical only if the payroll records are small or if it is early in the year.

## Entering Initial Balances

You can enter initial balances in one of two ways: by entering payroll transactions or by entering manual checks.

### Entering Payroll Transactions

First verify that you have set up the options you want in the Resource Manager Options and Interfaces function. Then follow these steps to enter your initial balances based on payroll transactions:

1. Enter transactions for the first pay period (see page 5-3).
2. Print the Time Ticket Journal (see page 5-19) and the Miscellaneous Deductions Journal (see page 5-23) to verify that you entered the transactions correctly.
3. If you find an error in the journals, delete the incorrect transaction and enter the correct one. Repeat steps 2 and 3 until the Time Ticket Journal and Miscellaneous Deductions Journal are correct.
4. Back up your data files.
5. Post the transactions (see page 5-31).

- 
6. Use the Calculate Checks function (see page 6-3) to process the transactions and calculate checks.
  7. Print the Edit Register (see page 6-21) to verify that the checks were calculated correctly.
  8. If you find an incorrect entry in the Edit Register, use the Payroll Transactions function (see page 5-3) to enter a reversing and a correct transaction. Post the correcting transactions, calculate checks again, and reprint the Edit Register to verify the corrections. Repeat this step until the Edit Register is correct.
  9. If you do not need check numbers in the history, skip to step 11. If you want complete check history, print the checks on paper or save them in a file. (If you use the Void checks function after the checks are posted to history, you must print checks to assign check numbers. Because you will void these checks immediately, use plain paper or send the output to a file.)
  10. Print the reports on the Payday Work menu as an audit trail.
  11. Back up your data files.
  12. Post the checks (see page 6-63).
  13. If the pay period falls on a quarter-end date, skip to step 14. If it does not, go back to step 1 and begin entering transactions for the next pay period.
  14. After you post checks for the last pay period in a quarter, follow these steps:
    - Print the Department Report (see page 9-3).
    - Back up your data files.
    - Post expenses to General Ledger (see page 9-7).
    - Print the quarterly tax, withholding, and unemployment reports necessary for the states where you do business.
    - Use the Periodic Maintenance function (see page 9-51) to prepare your files for the next quarter.

15. Return to step 1 and begin entering payroll transactions for the next quarter. Repeat the above steps until you are up to the current pay period.

### **Entering Manual Checks**

If you need to enter manual checks, use steps 1-3 below instead of the steps for entering payroll transactions above.

Follow these steps to enter your initial balances based on manual checks:

1. Enter manual checks for the first pay period (see page 6-9). Enter a check number for each entry.
2. Print the Edit Register (see page 6-21), and verify that you entered the checks correctly.
3. If you find an error in the Edit Register, use the Manual Checks function again to change or delete the incorrect check. Repeat steps 1 and 2 until everything is correct.
4. If you have not assigned check numbers, use the Print Checks function (see page 6-29) to assign check numbers. When the check numbers for all the checks have been entered, post the checks (see page 6-63).

If you use the Void Checks function (page 6-33) after the checks are posted to history, you must print checks to assign check numbers.

## **Recurring Time Tickets and Recurring Deductions**

Instead of entering the same time tickets and nonscheduled deductions repeatedly, you can set up and copy recurring time tickets and recurring deductions. After you have set them up, print the Recurring Time Ticket List and the Recurring Deductions List to verify that you have set these up correctly.

---

## Access Codes

To safeguard your system, prevent access by unauthorized people. Use the Resource Manager Access Codes function to set up access codes on your system. You can set up access codes for the Payroll system itself, for menus in the system, and for individual functions. To control users' access to menus and functions, you can set up an access code for each user or group of users that performs the same functions.

### A Code for Each Company

Access codes are company-specific. When you set up an access code for a user, the code is assigned the company you are in.

Because the codes are company-specific, you must set up a code for each company a user needs to access. You can use the same code for each company so that the user does not need to remember different codes. For example, you can set up the access code CHARM for companies A01, B01, and C01 so that a user can use the same code for each company.

### What Should Be Protected

Because of the sensitive nature of some of the information in the Payroll data files and reports, you should limit access to the functions that provide confidential information or are sensitive to change. For maximum security, protect the Payroll application itself, each of the Payroll menus, and the individual functions.

In particular, restrict access to the Calculate Checks and Print Checks functions. Assign different access codes to each function on the Employee Inquiry menu, restricting access to sensitive information such as salary information, while leaving general information accessible.

After you have set up your access codes, print a list of the codes and store it in a safe place.

For more information about access codes, see the *Resource Manager User's Manual*.

---

## Backup Schedule

Plan a backup schedule before you begin day-to-day operations.

You can lose files because of disk drive problems, power surges and outages, and other unforeseen circumstances. Protect yourself against such an expensive crisis by planning and sticking to a backup schedule.

### Backing up Data Files

Back up your Payroll data files whenever they change—every day or every pay period—and before you run these functions:

- Post Transactions
- Post Checks
- Post Expense to GL
- Periodic Maintenance
- Close Last Year

### Backing up Programs

Once a month or so, back up your programs. Even though these files do not change, diskettes can be damaged or deteriorate, so it pays to have a fresh copy in storage in case you need it.

### Backup Media

Keep more than one set of backups in case one set is bad or damaged. Rotate the sets of backup media, keeping one set off-site.

### Use Resource Manager

Use the Backup function on the Resource Manager Data File Maintenance menu to back up files.

**Note**

You must back up all the files in the data path for a particular list of companies at once to ensure that you have up-to-date copies of the system files. Do not try to use operating system commands to back up only a few files that have been changed; if you do, your system may not work after you restore them. The Backup function backs up all the data files for a specified company in a data path at one time.

---

---

# Employee Inquiry

---

# 4

General Information	4-3
Salary Information	4-5
Tax Information	4-7
Personnel Information One/Two	4-11
Employee History	4-13
Time Ticket History	4-21
Check History	4-23

### **Introduction**

Use the functions in this chapter to look at information about employees. You cannot use Employee Inquiry functions to add or change information. If you want to add or change employee information, use the functions on the File Maintenance menu instead.

---

## General Information

---

Use the General Information function to look at general information about employees—name, address, phone number, and so on. The information comes from the PAEGxxx (Employee General Information) file and is entered in the Employees function (see page 10-3 for an explanation of the fields).

To add to or change this information, use the Employees function on the File Maintenance menu.

### General Information Inquiry Screen

Select **General Information** from the Employee Inquiry menu. The inquiry screen appears.

The screenshot shows a software window titled "General Information" with a menu bar (Commands, Edit, Modes, Other, Help) and a toolbar. The window is divided into several sections for displaying employee data:

- Employee Identification:** Emp ID (BOURNE), Last Name (Bourne), First Name (Linda), Middle In (C), W-2 Name (Linda C Bourne), Address 1 (581 N Hamilton Ave), Address 2, Address 3, Res City (Edina), State (MN), Zip Code (55435), County, Phone No (612)555-1212, SS No (455-30-1099), Sex (F), and EEO Class (2).
- Job and Dates:** Job Title, Work Phone (1) - , Extension, Supr ID (LUK001), Adj Hire Date (01/09/1993), Start Date (01/09/1993), Birth Date (06/07/1959), Term Date, Last Review Date (11/12/2000), Next Review Date (11/12/2001), and Last Check Date.
- Insurance and Labels:** Ins Coverage (Family/Blue Cross), User Label 2, and User Label 3.
- Emergency Contact:** Name (Jim Bourne), Work Phone (612)667-3319, Home Phone (612)555-1212, and Relation (Husband).
- W-2 Fields:** Participate in 401K? (checked), Eligible for Pension? (checked), Statutory Employee? (unchecked), and Deceased? (unchecked).
- E-Mail:** lbourne@builders\_supply.com

At the bottom, there are navigation buttons: Employee, Exit, Last, Next, and Previous. A status bar at the very bottom shows "Company H 06/02/2006 Terminal T000 Q1R".

#### Inquiry

1. Enter the ID of the employee whose information you want to look at.

- 
2. Use the commands on the command bar to find the information you need:

**Employee, Next, Prev, First, Last**

To look at a different employee record, press **E**. Then enter the employee ID.

To look at the next employee record on file, press **N**.

To look at the previous employee record on file, press **P**.

To look at the first employee record on file, press **F**.

To look at the last employee record on file, press **L**.

**Exiting from General Information Inquiry**

When you are finished looking at the information, press **E** to clear the screen and return to the Emp ID field

Enter a different employee ID, or use the **Exit (F7)** command to return to the Employee Inquiry menu.

# Salary Information

Use the Salary Information function to look at employee salary information—pay rate, scheduled deductions, remaining vacation hours, and so on.

To add to or change this information, use the Employees function on the File Maintenance menu.

## Salary Information Inquiry Screen

Select **Salary Information** from the Employee Inquiry menu. The inquiry screen appears.

**Inquiry**

- 1. Enter the ID of the employee whose salary information you want to look at.
- 2. Use the commands on the command bar to find the information you need:

**Employee, First, Last, Next, Prev, Goto, View**

---

## Looking at a Different Employee Record

- To look at a different employee record, press **E**. Then enter the employee ID.
- To look at the next employee record on file, press **N**.
- To look at the previous employee record on file, press **P**.
- To look at the first employee record on file, press **F**.
- To look at the last employee record on file, press **L**.

## Looking at Scheduled Deduction Information

The **Goto** command appears only if there is more than one screen of items.

To look at a particular scheduled deduction, press **G** and then enter the deduction code or use the **Inquiry** command to select the code.

## Looking at Factors

To look at factor information for a scheduled deduction, press **V**. The Factor Inquiry window appears.

The information displayed comes from the PADExxx (Employee Deductions) and PAEGxxx (Employee General Information) files and is entered in the Employees function (see page 10-3 for an explanation of the fields). Press any key to return to the Salary Information screen.

When you are finished looking at the information, press **E** to clear the screen and return to the Employee ID field, or use the **Exit (F7)** command to return to the Employee Inquiry menu.

---

## Tax Information

---

Use the Tax Information function to look at employees' federal, state, and local payroll tax information.

To add to or change this information, use the Employees function.

### Tax Information Inquiry Screen

Select **Tax Information** from the Employee Inquiry menu. The inquiry screen appears.

Fed	Stat	Exemp	Extra W/H	Fixed W/H	EIC Code	Table ID
FED	M	4	00	00	N	FEDM

State	Stat	Exemp	Extra W/H	Fixed W/H	Table ID	SUI State	Name
MN	M	4	00	00	STOMNM	MN	Minnesota

State	Local	Stat	Exemp	Extra W/H	Fixed W/H	Table ID	Locality Name

The information displayed comes from the PAEGxxx (Employee General Information), PAESxxx (Employee Federal/State/Local Withholdings), PAEXxxx (Employee Exclusion), and PAWIxxx (Withholdings) files and is entered in the Employees function (see page 10-3 for an explanation of the fields).

#### Inquiry

1. Enter the ID of the employee whose tax information you want to look at.

2. Use the commands on the command bar to find the information you need:

**Employee, Next, Prev, First, Last, Tab, Goto line, View**

### Looking at Tax Information for a Different Employee

- To look at a different employee record, press **E**. Then enter the employee ID.
- To look at the next employee record on file, press **N**.
- To look at the previous employee record on file, press **P**.
- To look at the first employee record on file, press **F**.
- To look at the last employee record on file, press **L**.

### Looking at Different Tax Authorities

To move between the federal, state, and local portions of the screen, press the **Tab** key.

### Looking at Withholding Information

The **Goto line** command appears only if there is more than one screen of items.

To look at a particular withholding tax, press **G** and then enter the line number or use the **Inquiry** command to select a line number.

To look at withholding exclusion information for a particular employee, press **V**. The Employee Withholding Exclusions window appears.

Use the commands on the command bar to find the information you need:

---

**Goto line, Done, View factors**

The **Goto line** command appears only if there is more than one screen of items.

To look at a particular type of withholding, press **G** and then enter the code number or entry number, or use the **Inquiry** command to select a type.

When you are finished viewing type and factor information, press **D** to return to the Tax Information screen.

To view factors, press **V**. The Factor Entry window appears.

Press any key to return to the Employee Withholding Exclusions screen.

**Exiting from Tax Information Inquiry**

When you are finished looking at the tax information for an employee, press **E** to clear the screen and return to the Employee ID field, or use the **Exit (F7)** command to return to the Employee Inquiry menu.

---

## Personnel Information One/Two

---

Use the Personnel Information function to look at miscellaneous personnel information set up for employees. The Personnel Information One screen provides miscellaneous comments, degrees, a pay change, and bonus information. The Personnel Information Two screen is user-defined; the field names are provided by the USRDDxxx table. The information displayed on both the screens comes from the PAEPxxx (Employee Personnel) file and is entered in the Employees function (see page 10-3 for an explanation of the fields).

To add or change this information, use the Employees function on the File Maintenance menu.

### Personnel Information Inquiry Screens

Select **Personnel Information One** or **Personnel Information Two** from the Employee Inquiry menu. The appropriate inquiry screen appears.

The screenshot shows the 'Personnel Information One' window. At the top, there's a menu bar with 'Commands', 'Edit', 'Modes', 'Other', and 'Help'. Below the menu bar is a toolbar with icons for search, delete, save, print, and help. The 'Employee ID' field is set to '000000' and the 'Name' field is 'Bourne, Linda C'. There are 'OK' and 'Abandon' buttons at the top right. Below the name field, there are three comment lines: 'Comments 1: Linda is on the board as directors for Mulcohy Companies', 'Comments 2:', and 'Comments 3:'. The 'Degree' section lists 'BA Bachelor of Arts', 'MA Master of Arts', and 'Degree'. The 'Major' section lists 'Business Administration', 'Business Finance', and 'Major'. The 'Pay Change' section has columns for 'Date', 'Reason', 'Old Rate', and 'Amount'. The 'Bonus Issued' section has columns for 'Date', 'Reason', and 'Amount'. The bottom of the window has buttons for 'Employee', 'First', 'Last', 'Next', and 'Previous'. The status bar at the bottom shows 'Company H', '06/11/2008', 'Terminal T000', and '01VR'.

— Pay Change —				— Bonus Issued —		
Date	Reason	Old Rate		Date	Reason	Amount
11/12/2008	Anal Increase	7250.00				.00
04/30/2008	Board Review	6750.00				.00
12/31/1999	Cs Performance	6500.00				.00
11/12/1999	Anal Increase	6250.00				.00
11/12/1998	Performance	6150.00				.00
		.00				.00
		.00				.00
		.00				.00

The screenshot shows a window titled "Personnel Information Two". It has a menu bar with "Commands", "Edit", "Modes", "Other", and "Help". Below the menu bar is a toolbar with various icons and buttons, including "OK" and "Abandon". The main area displays the following information:

Employee ID	Bourns, Linda C.	
License	05/31/2000	User Date 06
Last Phys	12/03/1997	User Date 07
Driver Lic		User Date 08
User Date 04		User Date 09
User Date 05		User Date 10

At the bottom of the window, there are buttons for "Employee", "Exit", "Last", "Next", and "Previous". A status bar at the very bottom shows "Company H", "05/11/2008", "Terminal T000", and "QVR".

The command bar and instructions for the two screens are identical:

### Inquiry

1. Enter the ID of the employee whose personnel information you want to see.
2. Use the commands on the command bar to find the information you need:

#### Employee, Next, Prev, First, Last

- To look at a different record, press **E** and enter the employee ID.
- To look at the next employee record on file, press **N**.
- To look at the previous employee record on file, press **P**.
- To look at the first employee record on file, press **F**.
- To look at the last employee record on file, press **L**.

When you are finished looking at the information, press **E** to clear the screen and return to the Employee ID field, or use the **Exit (F7)** command to return to the Employee Inquiry menu.

---

## Employee History

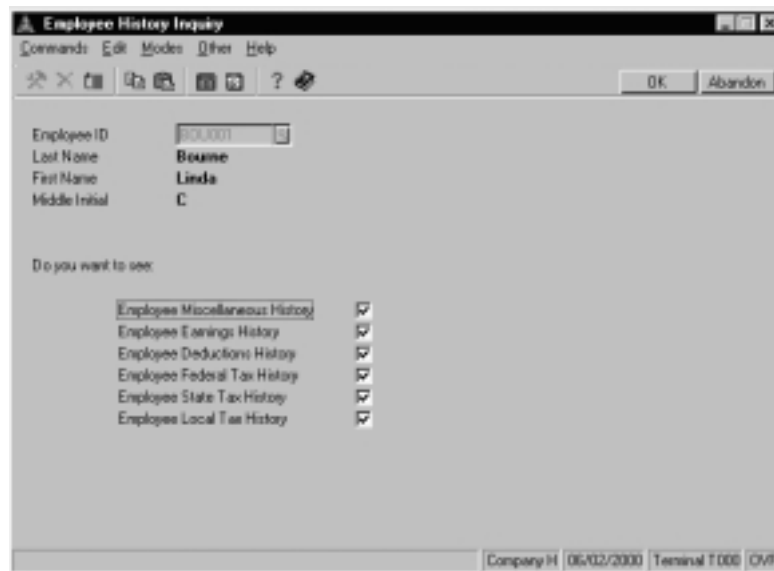

---

Use the Employee History function to look at employee payroll history—hours, pay, deductions, and so on—for each quarter and for the year. Information comes from the PAEGxxx (Employee General Information), PAEDxxx (Employee Deduction History), PAEExxx (Employee Earnings History), PAEMxxx (Employee Miscellaneous History), and PAEWxxx (Employee Withholding History) files.

To add to or change this information, use the Employee History function on the File Maintenance menu (see page 10-25).

### Employee History Inquiry Menu

Select **Employee History** from the Employee Inquiry menu. The selection screen appears.

#### Inquiry

1. Enter the ID of the employee whose history you want to view.

2. Check the box (or enter **Y** in text mode) for each type of history you want to view; uncheck the box (or enter **N** in text mode) for each type you do not want to view.

When you have selected the screens you want, use the **Proceed (OK)** command to go to the first screen type you selected.

## Employee Miscellaneous History Inquiry Screen

If you selected **Miscellaneous History** from the Employee History Inquiry menu, this screen appears:

	October	November	December	-QTR 4-	-YTD-
Hours Worked	173.330	.000	.000	173.330	173.330

See page 10-3 for an explanation of the commands and fields.

When you are finished viewing the screen, press **N** to view the next screen you selected. If you did not select another screen, the Employee History Inquiry menu appears; enter another employee to view history for, or use the **Exit (F7)** command to return to the Employee Inquiry menu.

## Employee Local Tax History Inquiry Screen

If you selected **Local History** from the Employee History Inquiry menu, this screen appears:

The screenshot displays the 'Employee Local Tax History' window. At the top, it shows the title bar and a menu bar with options like 'Commands', 'F1', 'Modes', 'Other', 'Scroll Commands', and 'Help'. Below the menu bar is a toolbar with icons for back, forward, and other navigation functions. The main area is divided into two sections: 'Earnings' and 'Tax Amounts'. Each section has a header row with columns for 'State', 'Ls', 'Code', 'October', 'November', 'December', '-QTR 4-', and '--YTD--'. Below these headers are several rows of data, which are currently empty. At the bottom of the window, there is a row of buttons: 'Tab=Tax Amounts', 'Previous page', 'Next page', 'Change quarter', 'Quarter Totals', and 'Screen Totals'. The status bar at the very bottom displays 'Company H 06/02/2008 Termid T000 QTR'.

See page 10-3 for an explanation of the commands and fields.

When you are finished viewing the screen, press **N** to go to the Employee History Inquiry menu. Enter another employee to view history for, or use the **Exit (F7)** command to return to the Employee Inquiry menu.

## Time Ticket History

Use the Time Ticket History function to look at an employee's time ticket history for each quarter and for the year.

## Time Ticket History Screen

Select **Time Ticket History** from the Employee Inquiry menu. This screen appears.

**Time Ticket History**

**Inquiry**

1. Enter the ID of the employee whose time ticket information you want to view.
2. Enter the start date for the time period you want to work with.

- 
3. Use the commands on the command bar to find the information you need:

**Employee, First, Last, Next, Prev, View, Start Date**

- To look at a different record, press **E** and enter the employee ID.
- To look at the first employee record on file, press **F**.
- To look at the last employee record on file, press **L**.
- To look at the next employee record on file, press **N**.
- To look at the previous employee record on file, press **P**.
- To view the time ticket details for the selected entry, press **V**. The View Transaction screen appears displaying details on the selected entry.
- To change the start date, press **S**.

When you are finished looking at the information, press **E** to clear the screen and return to the Employee ID field, or use the **Exit (F7)** command to return to the Employee Inquiry menu.

---

## Check History

---

Use the Check History function to look at an employee's check history for each quarter and for the year.

### Check History Screen

Select **Check History** from the Employee Inquiry menu. This screen appears.

The screenshot shows a software window titled "Check History". At the top, there is a menu bar with "Commands", "Modes", "Other", "Scroll Commands", and "Help". Below the menu bar is a toolbar with various icons. The main area of the window contains a form with "Employee ID" set to "000001" and "Start Date" set to "1/1". The employee name "Bounce, Linda C" is displayed. Below this is a table with the following columns: "Check No", "Check Date", "Hours Worked", "Gross Pay", and "Net Pay". The table contains four rows of data:

Check No	Check Date	Hours Worked	Gross Pay	Net Pay
0001372	10/01/2008	173.338	7633.82	4576.38
0001341	03/31/1998	.008	7500.00	4435.27
0001333	02/28/1998	.008	7500.00	4435.27
0001325	01/31/1998	.008	8250.00	4826.07

Below the table is a row of buttons: "Employee", "First", "Last", "Next", "Prev", and "Start Date". At the bottom of the window, there is a status bar that reads "Company H 06/02/2008 Terminal T000 QVR".

#### Inquiry

1. Enter the ID of the employee whose time ticket information you want to view.
2. Enter the start date for the time period you want to work with.

- 
3. Use the commands on the command bar to find the information you need:

**Employee, First, Last, Next, Prev, Start Date  
Check Summary, eArnings, Deductions, Withholdings, pRint**

- To look at a different record, press **E** and enter the employee ID.
- To look at the first employee record on file, press **F**.
- To look at the last employee record on file, press **L**.
- To look at the next employee record on file, press **N**.
- To look at the previous employee record on file, press **P**.
- To change the start date, press **S**.
- To view the check summary, press **C**. The Check Summary screen appears, displaying a summary of the selected check. Press any key to return to the Check History screen.
- To view the earnings screen for the selected entry, press **A**. The Check History Earnings screen appears displaying a summary of the earnings (see **Check History Earnings Screen** below).
- To view the deductions for the selected check, press **D**. The Check History Deductions screen appears (see **Check History Deductions Screen** below).
- To view the withholdings for the selected check, press **W**. The Check History Withholdings screen appears (see **Check History Withholdings Screen** below).
- To print the entry screen, press **R**. Then select the output device.

## Check History Earnings Screen

When you press **A**, the Check History Earnings screen appears.

[illegible]

Field	Description
Earn Code	The earning code is displayed (see page 11-9 to set up earning codes).
Description/Dept/Job/Phase	The earning code description and the department, job and phase IDs are displayed.
Tax Group/Cost Code	The tax group and job cost code are displayed. For instructions on setting up tax groups, see page 11-27.
Hours/Rate	The amount of hours and the rate of pay for the earning code is displayed.
Amount	The amount earned for each earning code is displayed.

Use the commands on the Check History Earnings screen to perform the function you want and to find the information you need:

**Done, dEductions, Withholdings, Goto**

Press **D** to return to the Check History Inquiry screen.

Press **E** to view the deductions for the selected entry. The Check History Deductions screen will appear (see **Check History Deductions Screen** below).

Press **W** to view the withholdings for the selected entry. The Check History Withholdings screen will appear (see **Check History Withholdings Screen** below).

Press **G** to go to a specific earning code.

**Check History Deductions Screen**

When you press **D** on the Check History screen, the Check History Deductions screen appears.

Code	Description	Hours	Amount	Gross or Net	Empl Paid?
001	Medical Ins	.000	10.15	Gross	
002	Dental Ins	.000	3.52	Gross	
003	United Way	.000	76.34	Gross

Miscellaneous Deductions Journal	5-21
Copy Recurring Entries	5-25
Post Transactions	5-29

---

## Payroll Transactions

---

Use the Payroll Transactions function to enter, change, or delete the number of hours each employee worked; allocate labor dollars, hours and pieces to various departments, jobs, and phases for hourly and salaried employees; and enter miscellaneous earnings and deductions that will appear on employee payroll checks. If Payroll is interfaced with Job Cost, the JOHlxxx (Detail History), JOBSxxx (Jobs), and JOCDxxx (Cost Codes Detail) files will be updated when you post.

You cannot use the Payroll Transactions function if you are working with last-year files.

How you use the Payroll Transactions function depends on whether employees are hourly or salaried and whether you enter a time ticket or make a miscellaneous payroll entry.

Hourly employees are paid according to the time ticket data you enter. Hour, dollar, and piece data are distributed to the department you specify and to the job and/or phase you specify if Payroll is interfaced with Job Cost.

Salaried employees are paid according to the salary you entered in the PAEGxxx (Employee General Information) file, not according to the time you enter in the Payroll Transactions function; but you must use this function to enter payroll transactions for salaried employees for other types of pay (such as bonuses, overtime and double time), other deductions, and vacation and sick pay.

---

Salaries can be allocated to different departments by entering time tickets. The system keeps track of the employee's posted and unposted dollar amounts. You cannot exceed an employee's salary with time tickets if you elected to replace wages for salaried employees in the Earning Types function. If no time tickets are entered, all expenses go to the home department. If time tickets are entered, the earnings go to the specified department, and the employer withholdings and deductions go either to the home department or the department where the employee worked, based on the option you selected in the Resource Manager Options and Interfaces function. To determine hours for salaried employees, the system uses the information from the `FREQxxx` table.

To record other pay that employees have earned in addition to their regular pay (commission, tips, bonuses, and so on) and to record other deductions that are to be withheld from paychecks (items that are not regularly scheduled such as one-time contributions), make miscellaneous payroll entries. Define these deduction types through the Deductions function (see page 11-17).

To reverse incorrect time tickets and miscellaneous entries that have been posted, enter the time ticket with a negative number of hours or the miscellaneous entry with negative amounts. This procedure provides an audit trail of the change.

## Payroll Transactions Screen

Select **Payroll Transactions** from the Daily Work menu. The function screen appears.

**Inquiry**

**Maint**

1. Enter the ID of the employee for which you want to enter, change, or delete information. The data from the employee's record appears.

If you use the **Maintenance (F6)** command, the Employees function is temporarily called up.

2. Use the commands on the command bar to perform the function you want and to find the information you need:

**Enter = Edit, Add trans, Employee, First, Last, Next, Prev, Totals**

- To edit a displayed transaction, move the cursor to the line you want to edit and press **Enter**. Then see **Editing a Transaction** below.
- To add a transaction, press **A**. Then see **Adding a Transaction** below.

- To look at a different employee record, press **E**. Then enter the employee ID.
- To look at the first employee record on file, press **F**.
- To look at the last employee record on file, press **L**.
- To look at the next employee record on file, press **N**.
- To look at the previous employee record on file, press **P**.
- To view transaction totals for the employee, press **T**. Then see **Viewing Totals** later in this section.
- To delete a line item, use the **Delete (F3)** command.

## Editing a Transaction

When you press **Enter** at the line you want to edit on the Payroll Transactions screen, either the earnings or the deductions Edit Transactions window appears. The deductions window differs slightly from the earnings window.

The screenshot shows the 'Edit Transactions' window with the following fields and values:

Field	Value
Tax Group	MIN
Date	06-02-2000
Dept	500
Job	EXECUTIVE
Cost Code	
Class	Pres
Seq No	3
Note	Salaried Wage
Earning Code	SAL
Hours	34.000
Rate	3.000
Amount	102.00
Pieces	2

Field		Description
<div>Inquiry</div> <div>Maint</div>	Tax Group	<p>This field appears only if you are editing time ticket transactions.</p> <p>Press <b>Enter</b> if you want to use the displayed tax group, or enter a different tax group. If you use the <b>Maintenance (F6)</b> command, the Tax Group setup function is temporarily called up.</p>
	Date	<p>Press <b>Enter</b> to accept the date that is displayed for the transaction, or enter a different date.</p>
<div>Inquiry</div>	Dept	<p>The department ID determines the distribution of expenses in General Ledger. It also indicates where the hours, amount, and pieces will be distributed for accumulation in the PADPxxx (Department) file.</p> <p>Salary expense for salaried employees is automatically distributed to the employees' departments. If you want to distribute expenses to different departments, you must enter payroll transactions for each employee to do so.</p> <p>Press <b>Enter</b> to accept the displayed department, or enter a different department ID.</p>

Field	Description
<div>Inquiry</div> <div>Maint</div> Job	<p>Enter the ID of the job you want the time and amount on the time ticket charged to. The <b>Inquiry (F2)</b> and <b>Maintenance (F6)</b> commands are available if Payroll is interfaced with Job Cost. The description appears at the bottom of the screen for verification.</p> <p>If Payroll is interfaced with Job Cost and you want to charge the hours, amount, and pieces on a time ticket to a particular job or phase, enter the job ID and, if applicable, the phase ID (below). When you post transactions, the data updates the JOHIxxx (Job Detail History) file.</p> <p>If Payroll is not interfaced with Job Cost, you can enter job and phase information and then organize the Time Ticket Journal by job and/or phase for your records or produce the Transaction History Report for a historical record of job activity.</p>
<div>Inquiry</div> <div>Maint</div> Phase	<p>If you entered a Job ID for this entry, enter the ID of the phase you want the time and amount on the time ticket charged to, if any. The <b>Inquiry (F2)</b> and <b>Maintenance (F6)</b> commands are available if Payroll is interfaced with Job Cost. The description appears at the bottom of the screen for verification.</p>
<div>Inquiry</div> <div>Maint</div> Cost Code	<p>If Payroll is interfaced with Job Cost and you entered a job ID for this entry, enter the labor code for the job. The <b>Inquiry (F2)</b> and <b>Maintenance (F6)</b> commands are available if Payroll is interfaced with Job Cost.</p>
<div>Inquiry</div> <div>Maint</div> Class	<p>Press <b>Enter</b> to accept the employee's labor class that is displayed from the PAEGxxx file, or enter a different class for the time ticket. If you use the <b>Maintenance (F6)</b> command, the Labor Classes function is temporarily called up.</p>
Sequence No	<p>If you want to split earnings and override deductions for an employee receiving two paychecks, enter a sequence number. The sequence number you use will appear in the Time Ticket Journal.</p>

Field	Description
Note	Enter a description of the time ticket or deduction entry.
<div>Inquiry</div> <div>Maint</div> Earn Code	<p>This field appears only if you are editing a time ticket transaction.</p> <p>Press <b>Enter</b> to accept the employee's earning code that is displayed from the PAEGxxx file, or enter a different earning code for the time ticket. (If you use the <b>Maintenance (F6)</b> command, the Earning Codes function is temporarily called up.) A description of the code appears.</p>
<div>Inquiry</div> <div>Maint</div> Ded Code	<p>This field appears only if you are editing a deduction transaction.</p> <p>If you want to override an employee's scheduled deduction or give a deduction the employee is not scheduled to receive, enter the code for the deduction. (If you use the <b>Maintenance (F6)</b> command, the Deduction Codes function is temporarily called up.)</p>
Hours	<p>If you are entering a time ticket, press <b>Enter</b> if the employee worked the number of hours displayed, or enter a different number of hours.</p> <p>If you are entering a deduction transaction, enter the number of hours to use in calculating the deduction, if necessary.</p>
Rate	Press <b>Enter</b> to accept the employee's pay rate that is displayed from the PAEGxxx file, or enter a different pay rate for the time ticket. The rate will change depending on the earning code entered and the Multiplier and Add to Base fields for that earning code.
Amount	<p>If you are entering a time ticket, the amount calculated for the time ticket is displayed. To change this figure, you must change the earning code, rate of pay, or number of hours worked.</p> <p>If you are entering a deduction transaction, enter the amount of the deduction.</p>

Field	Description
Pieces	<p>If the employee did piece work, the number of pieces he or she produced is displayed. Press <b>Enter</b> to accept it, or enter a different number.</p> <p>The Payroll system does not use piece information to calculate pay, but piece data can be distributed to and accumulated by department. In addition, if Payroll is interfaced with Job Cost, you can post period-, year-, and job-to-date pieces to the JOBSxxx file.</p>

When you use the **Proceed (OK)** command to save the information, the Payroll Transactions screen reappears.

## Adding a Transaction

When you press **A** on the Payroll Transactions screen to add a transaction to the list, the Enter Transactions screen appears.

Employee ID	Name	Status	Tax Group	Date	Job	Class	Phase	Sequence No	Dept	Cost Code	Pieces	Salary
000001	Bosma, Linda C	[SALARIED]	M	06/02/2000		Prs		1	500		2	7500.00

If you use the <b>Maintenance (F6)</b> command, the Labor Classes function is temporarily called up.</p>
Sequence No	<p>If you want to produce multiple checks for an employee, enter all the transactions for the first paycheck under sequence number <b>0</b>. Then enter the transactions for the second paycheck under sequence number <b>1</b>, and so on.</p>
Pieces	<p>If the employee did piecework, enter the number of pieces the employee produced.</p> <p>The Payroll system does not use this information to calculate pay, but piece data can be distributed to and accumulated by department. In addition, if Payroll is interfaced with Job Cost, you can post pieces to the JOBSxxx file.</p>
Salary or Rate	<p>If the employee is salaried, the employee's normal salary amount is displayed.</p> <p>If the employee is hourly, enter the hourly rate that applies to these transactions or press <b>Enter</b> to accept the rate that appears.</p>
<div data-bbox="315 1272 456 1320">Inquiry</div> <div data-bbox="315 1320 456 1369">Maint</div> Earn Code	<p>Press <b>Enter</b> to accept the earning code that is displayed from the PAEGxxx file, or enter an earning code for the time ticket. If you use the <b>Maintenance (F6)</b> command, the Earning Codes function is temporarily called up.</p> <p>You can enter five line items for an employee on this screen; if you need to enter more items, use the <b>Proceed (OK)</b> command to save these transactions, return to the Payroll Transactions scroll region, and reenter the Enter Transactions screen.</p>

Field	Description
	If you elected to use the time card calculator (which is for hourly employees only) in the Resource Manager Options and Interfaces function, a prompt appears at the bottom of the screen. If you elect to use time card entry, the Time Card Entry window appears (see <b>Time Card Entry</b> below).
Note	A description of the earning code is displayed. Press <b>Enter</b> to accept that description, or enter a different description for this time ticket.
Hours	Enter the number of regular work hours recorded on the time ticket, or enter a negative number of hours to reverse a time ticket that has already been entered.
Rate	The pay rate for the earning code is displayed. Press <b>Enter</b> to accept the rate or enter a different rate for this time ticket.
Amount	<p>The amount (the number of hours times the rate) is displayed. Press <b>Enter</b> to accept the amount, or enter a different amount. If you enter a different amount, the rate will be recalculated for this time ticket.</p> <p>When you accept the amount the cursor moves to the next time ticket line. Enter another earning code, or press <b>Enter</b> to leave the earning code blank and enter a deduction entry.</p>
<div data-bbox="266 1243 407 1289" data-label="Text"><b>Inquiry</b></div> <div data-bbox="266 1293 407 1339" data-label="Text"><b>Maint</b></div>	<p>Deduction</p> <p>Enter a deduction code. If you entered a job and phase, deductions are not posted to the job. (If you use the <b>Maintenance (F6)</b> command, the Deduction Codes function is temporarily called up.)</p> <p>You can enter five line items for an employee on this screen; if you have more than five deductions to enter, use the <b>Proceed (OK)</b> command to transfer the transactions to the Payroll Transactions scroll region and reenter the Enter Transactions screen.</p>
Note	The description of the deduction is displayed. Press <b>Enter</b> to accept that description, or enter a different description for this deduction.

Field	Description
Hours	Enter the number of hours associated with the deduction.
Amount	Enter the amount of the deduction.

When you save the information, the pay- and deduction-related fields are cleared, but the employee and job information you entered remains on the screen. Change the information that is displayed, or enter a different employee ID. If you enter a different employee ID, the job and phase information remains on the screen, making it easy to enter time tickets for the employees who worked on a job.

When you are finished adding transactions, exit to the Payroll Transactions screen.

## Time Card Entry

Time cards can be filled out daily or weekly for each employee. If you elected to use the time card calculator in the Resource Manager Options and Interfaces function and in the Enter Transactions function, the Time Card Entry window appears.

Employee ID	510001	Name	Stockard,	Day 1	Day 2	Day 3	Day 4	Day 5	Day 6	Day 7

Week: Regular				.000		Overtime		.000		

---

Field	Description
Employee ID/Name	The employee's ID and name are displayed.
Time In	For each day of the week, enter the hour and minute the employee punched in. Enter hours in military format. For example, if the employee started work at 5:00 P.M., enter <b>17</b> and <b>00</b> .
Time Out	For each day of the week, enter the hour and minute the employee punched out. Enter hours in military format. For example, if the employee finished work at 5:00 P.M., enter <b>17</b> and <b>00</b> .
Last Out	The time elapsed between the time in and the previous time out is displayed. No number is displayed in the first Last Out field.
Adjustment	Enter hours or minutes adjustments for each day. For example, if an employee worked after punching out, you can compensate for that here.
Totals	The total number of hours and minutes for each time in, time out, and adjustment (if any) are displayed for the employee.
Week: Regular	The total number of regular hours the employee worked for the week is displayed.
Week: Overtime	The total number of overtime hours the employee worked for the week is displayed, depending on how the TCALCxxx table is set up.  If overtime has been calculated, you must enter the overtime codes on the Enter Transactions screen.

When you save your entries, the Enter Transactions screen reappears with the updated hours information.

## Viewing Totals

When you press **T** on the Payroll Transactions screen, the Employee Transaction Totals window appears.

**Employee Transaction Totals**

Commands Modes Other Scroll Commands Help

[Icons] [OK] [Abandon]

Employee ID    **00U001**          Name, Linda C.

H O U R S				P A Y

Press Enter to continue

The posted, unposted, and total hours and pay are displayed for each earning code assigned to the employee. If there are more earning codes than fit on one screen, you can scroll up and down to view additional earning codes.

Deductions, reported tips, and pieces are displayed at the bottom of the screen.

When you are finished viewing employee transaction totals, press **Enter** to return to the Payroll Transactions screen.

---

## Time Ticket Journal

---

The time tickets you entered into the PATRxxx (Transactions) file but have not posted are listed in the Time Ticket Journal. Print the journal before you post transactions and use it to verify your entries and as part of your audit trail.

You cannot use the Time Ticket Journal function if you are working with last-year files.

### Time Ticket Journal Screen

Select **Time Ticket Journal** from the Daily Work menu. This screen appears.

#### Inquiry

1. Enter the range of employees you want to include in the journal.
2. Select the order in which you want to organize the journal.
3. Select the output device.

---

A sample Time Ticket Journal is at the end of this section.

After the journal is produced, the Daily Work menu appears.

## Post Transactions

---

When you post transactions, time ticket and miscellaneous deduction information is transferred from the PATRxxx (Transactions) file to the PATPxxx (Transactions Post) file. Once posted, this information cannot be changed through the Payroll Transactions function. (You can, however, view the totals of the posted entries using the Totals command in Transaction entry.) During posting, the detail from the time tickets is lost; only the summary information necessary to produce the next group of paychecks is stored.

In addition, the PADPxxx (Department) file is updated so that department records show the number of hours and pieces and the amount of the payroll expenses on the time tickets. If Payroll is interfaced with Job Cost, the job and phase records are updated with labor expense (excluding deductions) and hours.

If you elected to save transaction history when you installed Payroll, the PATHxxx (Transaction History) file is updated with the detail from the time tickets and miscellaneous deduction entries from the PATRxxx file. When the post is complete, the PATRxxx file is erased, clearing the way for more time ticket and miscellaneous deduction entries.

You cannot use the Post Transactions function if you are working with last-year files.

### Before Posting

Before you post, perform these tasks:

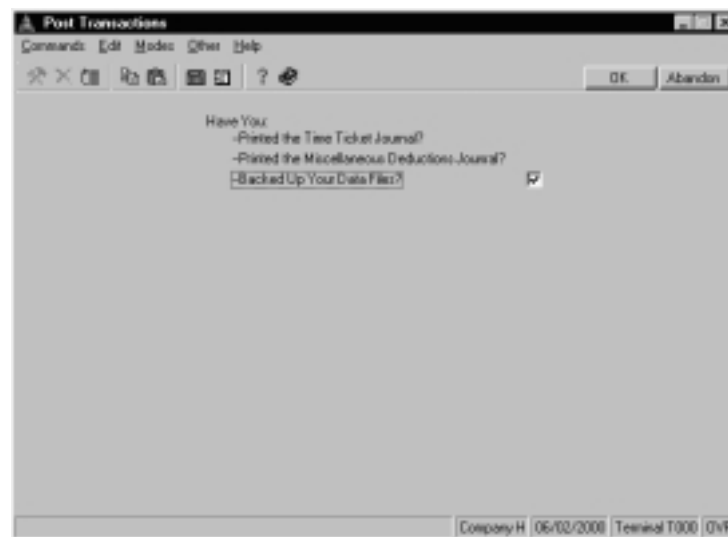

- If you have a multiuser system, make sure that no one else is using the Payroll system. You cannot post if someone else is using the Payroll functions.
- Print the Time Ticket Journal (see page 5-17).
- Print the Miscellaneous Deductions Journal (see page 5-21).
- Back up your data files.

The information in the Time Ticket Journal and the Miscellaneous Deductions Journal comes from the PATRxxx file. Posted entries are cleared from this file to make room for the next group of entries. Because you cannot reconstruct the journals after you post, printing them before you post is important.

Backing up your data files before you post is an important practice. Unforeseen problems such as a power surge or failure can interrupt the post and result in the loss of data.

## Post Transactions Screen

Select **Post Transactions** from the Daily Work menu. The function screen appears.

Have You:

- Printed the Time Ticket Journal?
- Printed the Miscellaneous Deductions Journal?
- Backed Up Your Data Files? ☒

Company H 06/02/2008 Terminal T000 Q1R

1. Before you post, you should print the Time Ticket and Miscellaneous Deductions Journals and back up your data files. If you have not done these things, uncheck the box (or enter **N** in text mode) and do so now. When you have completed these tasks, check the box (or enter **Y** in text mode) to continue.
2. Select the output device.

---

The posting log lists the total hours and wages posted to the PADPxxx, PATPxxx, and PATHxxx files. A sample posting log is at the end of this section.

After posting is completed and the log is produced, the Daily Work menu appears.

## Payday Work

---

# 6

Calculate Checks	6-3
Manual Checks	6-9
Edit Register	6-21
Accrual Adjustments	6-25
Vacation and Sick Leave Report	6-27
Print Checks	6-29
Void Checks	6-33
Check Register	6-37
Paycheck Received Report	6-41
Withholding Report	6-45
Employer's Tax Report	6-49
Employer's Liability Report	6-53
Pay Period Deduction Report	6-57
Employer Department Expense Report	6-61
Post Checks	6-63

### Introduction

Perform the functions in the order they appear on the menu, but do not use the Void Checks function until you have posted the checks. First calculate checks and enter manual checks. Then produce the Edit Register to check your work. Print the checks and the Check Register. Produce the reports you need, and then post.

Several of the functions in this chapter appear on an additional menu called Payroll Reports and Posting that appears on the Payday Work Menu. To access these functions, select **Payroll Reports and Posting** from the Payday Work menu and then select the function from the Payroll Reports and Posting submenu.

---

## Calculate Checks

---

The Calculate Checks function uses the information in the PATPxxx (Transactions Post) file to calculate checks for your employees. The PATPxxx file was updated when you posted transactions to calculate taxes and deductions and to build the PACDxxx (Checks Deductions), PACExxx (Checks Earnings), PACHxxx (Checks), and PACWxxx (Checks Withholdings) files in preparation for check printing.

You cannot use the Calculate Checks function if you are working with last-year files.

You can calculate multiple checks for each employee each time you produce checks. If you have entered manual checks, you can use the Calculate Checks function without having fully processed and printed the manual checks; manual and calculated checks can be processed in the same check run.

---

**Note**

You must calculate checks before you add manual checks. If you create manual checks before you calculate checks, the manual checks will be erased.

---

When you calculate checks, the Calculate Checks Log is produced. Use the log to verify totals and earning code information and as part of your audit trail. If an error occurs during check calculation, a message is printed in the log (see appendix A for an explanation of error messages in the log).

## Calculate Checks Screen

Select **Calculate Checks** from the Payday Work menu. This screen appears.

Gp	Period Beg	Ptd Code
1	01/01/2000	1
2	01/01/2000	1

If you calculated checks or entered manual checks without finishing the payday steps, the following prompt appears:

**Checks are already on file. Do you want to start over?**

### Note

If you calculate checks again, the data that is on file will be erased. Make sure that the previous day's payday work cycle was completed properly. If it was not, do not calculate checks again, because the checks that were issued will not be reflected in the payroll totals or in the general ledger balances. To verify checks that have been calculated, print the Check Register.

If you do not want to calculate checks, select **No** (or enter **N** in text mode) to exit to the Payday Work menu. If you want to calculate checks again, erasing the checks that are on file, select **Yes** (or enter **Y** in text mode).

Field	Description
Payroll Number	The payroll number is displayed from the PACTLxxx table.
Quarter	The quarter is displayed from the PACTLxxx table.
Group Code (0–9)	<p>The codes you enter determine which employees will be paid. The codes are compared to the group code for each employee in the PAEGxxx (Employee General Information) file. You cannot add a check for an employee who is not in an included group code.</p> <p>If you elect to include salary wages in this check run, salaried employees with the group code you enter will be paid their salary amount, less deductions and taxes. Hourly employees with the group code you enter will be paid according to the earnings accumulated in the PATPxxx file from transactions entered, less deductions and taxes.</p>
Period End	Enter the date the pay period ends. The system uses this date and the period beginning date you enter for each group code (and checks each employee's start and termination dates in the employee records) to verify employment during the pay period.
Date on Checks	Enter the date you want to print on the checks.
GL Period (1–13)	<p>The general ledger period is used when you post checks. The totals for the checks produced are posted to the general ledger period you specify. (The totals in the Payroll system are affected in the current period, regardless of the general ledger period you enter.)</p> <p>Press <b>Enter</b> to post the checks to the displayed period, or enter a different period.</p>
Grp	The group codes you entered above are displayed.

---

Field	Description
Period Beg	<p>The system uses this date and the period ending date you entered above to verify employment during the pay period.</p> <p>For each group code you entered above, enter a date for the start of the pay period, or press <b>Enter</b> to accept the date that is displayed.</p>
Pd Code	<p>The period code you entered in the Scheduled Deductions portion of the Employee Salary Information screen indicates when and how each scheduled deduction is taken. During check calculation, the period codes are compared to the codes in the employee record to determine which deductions will be taken.</p> <p>For each group code you entered above, enter the appropriate period code (<b>1–5</b>), or enter <b>6</b> to skip deductions.</p>
Include Salary Wages?	<p>Check the box (or enter <b>Y</b> in text mode) to include salary wages in the calculation for the group codes entered; uncheck the box (or enter <b>N</b> in text mode) to exclude the wages. Only time ticket and miscellaneous payroll information is processed, so you can process bonus checks without processing the salary wage.</p>
Calculate Vacation/Sick Accruals?	<p>This field appears if you elected to use this option in the Resource Manager Options and Interfaces function.</p> <p>If you want the system to calculate vacation and sick accruals, check the box (or enter <b>Y</b> in text mode); if not, uncheck the box (or enter <b>N</b> in text mode).</p>

When you save your entries, you are prompted to select the output device.

A sample Calculate Checks Log is at the end of this section.

After check calculation is finished, the Payday Work menu appears.

## Manual Checks

---

Use the Manual Checks function when you want to produce payroll checks outside the normal payroll cycle. For example, if an employee resigns, is going on vacation, or is receiving a bonus or other type of compensation on a separate check, you can produce a manual check for the employee before the next payday or produce multiple checks on payday.

---

**Note**

If you issue and print a check for a previous year, make sure that the check is dated for the correct year.

---

You can also use the Manual Checks function to change deductions and withholdings of calculated checks that are already in the PACHxxx (Checks) file.

### Before You Begin

If you have a multiuser system, make sure that no one else is calculating checks. You cannot enter manual checks if someone else is using the PACHxxx file to calculate checks.

## Manual Checks Selection Screen

Select **Manual Checks** from the Payday Work menu. The selection screen appears.

Gp	Period Beg	Pd Code	Gp	Period Beg	Pd Code
1	01/01/2000	1	2	01/01/2000	1
3	01/02/2000	1			

If manual checks are already on file, additional fields appear at the bottom of the screen (refer to **Options** below). If no manual checks are on file, the entries you make in these fields apply to all the manual checks you enter until you post checks.

Field	Description
Payroll Number	The payroll number is displayed from the PACTLxxx table, which is stored in the PATBxxx file.
Quarter	The current payroll quarter is displayed from the PACTLxxx table.
Group Code (0–9)	The codes you enter determine which employees you can enter manual checks for. The codes are compared to the group code for each employee in the PAEGxxx (Employee General Information) file.

---

Field	Description
Period End	Enter the last day of the pay period.
Date on Checks	Enter the date you want to print on the checks.
GL Period (1–13)	Press <b>Enter</b> to post the general ledger entries to the displayed accounting period, or enter a different accounting period.
Grp	The group codes you entered above are displayed.
Period Beg	For each group code you entered above, enter a date for the start of the pay period.
Pd Code	<p>Enter the period code (<b>1–5</b>) that indicates which scheduled deductions should be taken for the manual checks in the group, or enter <b>6</b> if you do not want deductions to be taken for these checks.</p> <p>If you do not want deductions to be taken for a few of the checks, zero out the deduction amount as you enter the checks.</p>

When you are finished making selections, the Manual Checks screens appear.

## Options

If checks are already on file, select the action you want to take. You can

- enter a manual check (refer to **Manual Checks Screens** below)
- change a manual check that is on file (refer to **Manual Checks Screens** below)
- change calculated checks (you can edit deductions and withholding information for calculated checks, but not earnings information)
- erase the manual checks that are on file and then enter new manual checks

## Manual Checks Screens

Use the Manual Checks screens to enter and edit manual checks.

### Manual Checks Screen One

When you proceed from the Manual Checks selection screen, the first of three Manual Checks screens appears. Use this screen to enter and edit earning codes for manual checks or to change or delete unposted manual checks.

The screenshot shows the 'Manual Checks' window. At the top, there's a menu bar with 'Commands', 'Edit', 'Modes', 'Other', 'Scroll Commands', and 'Help'. Below the menu bar are buttons for 'OK' and 'Abandon'. The main area contains fields for 'Employee' (Bourne, Linda C), 'Gross Pay' (7500.00), 'Sequence' (empty), 'Check No.' (22321), and 'Weeks Worked' (23.00). Below these is a table with columns: 'Earn Code', 'Description', 'Dept', 'Job', 'Phase', 'Tax Group', 'Cost Code', 'Class', 'Hours', 'Rate', and 'Amount'. The first row shows 'SAL' for 'Salaried Wage' with a rate of 173.33 and an amount of 7500.00. The bottom of the window shows 'Gross Pay Total' (7500.00) and buttons for 'Enter + edit', 'Append', 'Calculate Checks', 'Next page', 'Header', 'Print', and 'Delete check'.

#### Field

#### Description

<b>Inquiry</b>
<b>Maint</b>

Employee

Enter the ID of the employee the check is for.

To change or delete an unposted manual check, enter the employee ID; then press **Enter** to display the first check in the file, or enter an employee ID to display a different check. If the check that appears is not the one you want, use the **Abandon (Cancel)** command to go to the Employee field and enter a different employee ID.

	Field	Description
<b>Inquiry</b>	Sequence	If you entered more than one check for the employee, enter the sequence number of the check you want to work with.
	Gross Pay	The employee's gross pay for the check is displayed.
	Pieces	If applicable, enter the number of pieces the employee is being paid for. Pieces, which are used for management information and job control, are not posted to Job Cost.
	Check No	If you are entering the check after it was issued, enter the number of the check you issued to the employee.
		If you do not enter a check number, check numbers are assigned automatically when you print checks.
	Weeks Worked	Enter the number of weeks the employee worked.

Use the **Proceed (OK)** command to go to the earning code scroll region.

### Command Bar

**Enter = edit, Append, Calculate check, Next page, Header, Delete check**

To edit an earning code, press **Enter**. To add an earning code, press **A**. Then see **Editing and Adding Earning Codes** below.

To calculate a check, press **C**. If you elected to accrue sick and vacation time for an employee in the Resource Manager Options and Interfaces function, the following message appears:

### Do you wish to accrue Vacation/Sick for this employee?

If you want to accrue vacation and sick time for the employee, select **Yes** (or enter **Y** in text mode); if not, select **No** (or enter **N** in text mode). The check is then calculated and the second manual checks screen appears.

If you elected not to accrue vacation and sick time for an employee, you can enter or edit a manual check or press **N** to go to the next page of line items.

To enter or edit the number of pieces, the check number, or the weeks worked for the paycheck, press **H**.

To delete the check, press **D**.

### Editing and Adding Earning Codes

When you press **Enter** or **A** on the command bar of the first Manual Checks screen, the following window appears:

	Field	Description
<b>Inquiry</b>	Tax Group	Press <b>Enter</b> to accept the displayed tax group ID, or enter a different ID.
<b>Maint</b>		
<b>Inquiry</b>	Dept	Press <b>Enter</b> to use the displayed department, or enter a different department ID.
<b>Inquiry</b>	Job	If Payroll is interfaced with Job Cost, press <b>Enter</b> to use the displayed job ID, or enter a different job ID. The <b>Inquiry (F2)</b> and <b>Maintenance (F6)</b> commands are available if Payroll is interfaced with Job Cost.
<b>Maint</b>		
<b>Inquiry</b>	Phase	If this earnings entry contains a job ID, press <b>Enter</b> to use the displayed phase ID, or enter a different phase ID. The <b>Inquiry (F2)</b> and <b>Maintenance (F6)</b> commands are available if Payroll is interfaced with Job Cost.
<b>Maint</b>		

Field		Description
<b>Inquiry</b>	Cost Code	If this earnings entry contains a job ID, press <b>Enter</b> to use the displayed cost code, or enter a different cost code. The <b>Inquiry (F2)</b> and <b>Maintenance (F6)</b> commands are available if Payroll is interfaced with Job Cost.
<b>Maint</b>		
<b>Inquiry</b>	Class	Press <b>Enter</b> to accept the employee's labor class, or enter a different class.
<b>Maint</b>		
<b>Inquiry</b>	Earn Code	Press <b>Enter</b> to accept the employee's earning code, or enter a different code.
<b>Maint</b>		
	Hours	Press <b>Enter</b> if the employee worked the number of hours displayed, or enter a different number of hours.
	Rate	Press <b>Enter</b> to accept the employee's pay rate, or enter a different pay rate.
	Amount	The amount of the check is displayed. To change this figure, you must change the earning code or number of hours worked. The pay rate is then recalculated.

When you have finished editing or adding transactions, use the **Proceed (OK)** command to save the transaction. When you use the **Next page** command, the second Manual Checks screen appears.

## Manual Checks Screen Two

Use the second Manual Checks screen to enter and edit deduction codes for each manual check generated for each employee.

The screenshot shows a software window titled "Manual Checks". At the top, it says "Page 2 of 3". Below that, it identifies the employee as "Employee: 8010001" and "Bause, Linda C" with a "Gross Pay" of "7500.00".

Code	Description	Hours	Amount	Gross or Net	Expt Paid?
1	Medical Ins	.000	10.56	Gross Pay	<input checked="" type="checkbox"/>
6	401K	.000	237.50	Gross Pay	<input type="checkbox"/>
3	United W/age	.000	75.00	Gross Pay	<input type="checkbox"/>
4	Credit Union	.000	50.00	Gross Pay	<input type="checkbox"/>
10	Stock Plan	.000	100.00	Gross Pay	<input type="checkbox"/>
2	Dental Ins	.000	3.52	Gross Pay	<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

Below the table, it says "Deduction | 001 of 006 |". At the bottom, there are two totals: "Employee Total 576.58" and "Employer Total .00". A row of buttons includes "Enter = edit", "Append", "Recalc check", "Goto", "Previous page", "Next page", and "Delete check". The footer shows "Company H 06/02/2006 Terminal T006 01VR".

### Command Bar

**Enter** = edit, **A**ppend, **R**ecalc check, **G**oto, **N**ext page, **P**revious page, **D**elete check

To edit a deduction code, press **Enter**. To add a deduction code, press **A**. Then see **Editing or Adding Deductions** below.

To recalculate the employee withholdings and employer's liability for a check, press **R**. The deductions are not recalculated.

To go to the third Manual Checks screen, press **N**. To go to the previous page of items, press **P**.

To go to a specific deduction, press **G** (this command appears only if there is more than one screen of items.)

To delete a check, press **D**.

### Editing and Adding Deductions

Inquiry	Field	Description
	Code	If you are appending a deduction, press <b>Enter</b> to accept the displayed deduction code, or enter a different deduction code.
	Description	The description of the deduction code is displayed.
	Hours	Press <b>Enter</b> to accept the displayed number of hours worked, or enter a different number.
	Amount	Press <b>Enter</b> to accept the displayed amount, or enter a different amount for the deduction.
	Gross or Net	If the deduction is taken from gross pay, <i>Gross Pay</i> is displayed. If the deduction is taken from net pay, <i>Net Pay</i> is displayed.
	Emplr Paid?	If the deduction is employer paid, the box is checked (or <i>Yes</i> is displayed in text mode); if not, the box is unchecked (or <i>No</i> is displayed in text mode).

When you press **N** at the scroll region command bar, the third Manual Checks screen appears.

## Manual Checks Screen Three

Use the third Manual Checks screen to enter and edit withholding and employer liability information for each manual check generated for each employee.

If you have entered a negative manual check (to void a check without using the Void Checks function), the system will not calculate negative taxes. You must edit this information on Manual Checks screen three.

The screenshot shows the 'Manual Checks' window for Employee 8000001, Roscoe, Linda C. The Gross Pay is 7580.00. The screen is divided into two main sections: Employee Withholdings and Employer Liability.

Type	State	Locality	Code	Description	Amount
Federal	N/A	N/A	PWH	Federal w/H	1215.54
Federal	N/A	N/A	DWS	Empire D&SDI	455.00
Federal	N/A	N/A	MED	Empire Medicare	108.75
State	MN	N/A	SWH	MN w/H	436.60

Withholding ( 001 of 004 )

Type	State	Locality	Code	Description	Amount
Federal	N/A	N/A	EOA	Empire D&SDI	455.00
Federal	N/A	N/A	EME	Empire Medicare	108.75
Federal	N/A	N/A	FUT	Unemp Ins	00
State	MN	N/A	SLI	MN Unemp Ins	503.50

Employer Liability  
Contribution ( 000 of 004 )

Total Withholdings: .00    Liability: 1506.05    Net Pay: 4627.53

Buttons: Tab = Liab, Enter = edit, Append, Previous page, Next check, Delete check

Company: H    05/02/2008    Terminal: T000    01vR

The withholding types that are displayed depend on the state and local taxes that apply to the employee.

### Command Bar

**Tab, Enter = edit, Append, Prev page, Next check, Delete check**

To move between the Employee Withholding and Employer Liability portions of the screen, press the **Tab** key.

To edit a withholding or an employer liability, press **Enter**. To add a withholding or a liability, press **A**. Then see **Editing and Adding Withholding and Employer Liability** below. When you edit a withholding or an employer liability, you can change only the amounts.

To go to the previous page, press **P**. To go to the next check, press **N**.

To delete the check, press **D**. Using the **Exit (F7)** command does not delete a new manual check.

### Editing and Adding Withholding and Employer Liability

Field	Description
Type	Press <b>Enter</b> to accept the displayed withholding type, or enter <b>F</b> for federal withholdings, <b>S</b> for state withholdings, or <b>L</b> for local withholdings.
<b>Inquiry</b> State	Press <b>Enter</b> to accept the displayed state code, or enter a different state code.
<b>Inquiry</b> Locality	If the withholding is a local type, enter the locality code.
<b>Inquiry</b> Code	Press <b>Enter</b> to accept the displayed withholding code, or enter a different withholding code.
Description	The description of the withholding is displayed.
Amount	Enter or edit the amount of the withholding.

If you add or change any employee deductions, recalculate the check. When you have finished entering checks, use the **Exit (F7)** command to return to the Payday Work menu. The information is automatically saved.

---

## Edit Register

---

The Edit Register shows the earnings and deductions for the checks you calculated. Before you print the checks, produce the Edit Register to check the wages earned by hourly and salaried employees and the taxes and deductions. You can produce the Edit Register in detail or summary formats.

If you find inaccuracies in the check calculation, enter correcting transactions or change the general information in the Employees function in File Maintenance (see page 10-3). If you enter correcting transactions through the Payroll Transactions function, post them and then calculate the checks and print the Edit Register again.

If you find inaccuracies in checks that you entered manually, use the Manual Checks (see page 6-9) function to make changes.

### Edit Register Screen

Select **Edit Register** from the Payday Work menu. The function screen appears.

The screenshot shows the 'Edit Register' window with the following fields and options:

Payroll Number	000053
Quarter	4
Group Code	1 2 3
Period End	01/01/2000
Date on Checks	12/01/2000
GL Period	12

Print employee tax and deduction information? ☒

Print Register In:

- ☒ Summary
- ☐ Detail

Print By:

- ☒ Department
- ☐ Employee ID
- ☐ Sequence No.
- ☐ Check No.

Company: H    06/02/2000    Terminal: T000    OVR

---

The payroll number, quarter, group code, period end, date on checks and GL period are displayed. You entered this information in the Calculate Checks or the Manual Checks function.

1. If you want employer tax and deduction information in the register, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).
2. Select the amount of detail you want in the register. You can print in detail (earnings, withholdings, and deductions information for all employees) or in summary (earnings, withholdings, and deductions involved in the checks).
3. Select the order in which you want to print the report.
4. Select the output device.

A sample Edit Register is at the end of this section.

After the register is produced, the Payday Work menu appears.

# Accrual Adjustments

---

Use the Accrual Adjustments function to adjust sick and vacation time calculated through the Calculate Checks or Manual Checks function. You can correct accrual errors or add to the accrual for a bonus.

## Accrual Adjustments Screen

Select **Accrual Adjustments** from the Payday Work menu. The function screen appears.

	Vacation	Sick
Current Pay Period Accrual	500	3.344
(Use File Maintenance to Edit)		
Hours Accrued Year-to-Date	.000	.000
Hours Taken Year-to-Date	.000	.000
Hours Taken This Period	.000	.000
(Pre-Post) Remaining Hours	119.500	96.000
Accrual Code		

**Inquiry**

1. Enter the ID of the employee whose accrual record you want to change. The employee's name appears.
2. Edit the vacation and sick accrual adjustments for the employee.

---

The pay period-to-date and year-to-date hours accrued and hours taken totals are displayed in the lower part of the screen. To edit vacation and sick accruals, use the Leave Adjustments function (see page 10-49).

The employee's remaining vacation and sick totals before posting are displayed.

When you save your entries, the cursor returns to the Employee ID field. Enter the next employee you want to enter accrual adjustments for, or use the **Exit (F7)** command to return to the Payday Work menu.

After you enter accrual adjustments, produce the Vacation and Sick Leave Report (see page 6-27) to verify your changes.

---

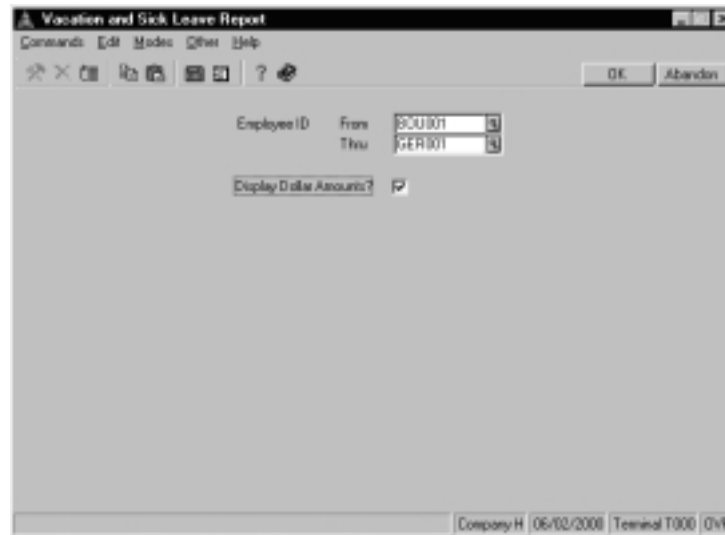

## Vacation and Sick Leave Report

---

The Vacation and Sick Leave Report lists the employees and their current vacation and sick accruals for the payroll run. Use the report to verify changes made through the Accrual Adjustments function and as part of your business records.

### Vacation and Sick Leave Report Screen

Select **Vacation and Sick Leave Report** from the Payday Work menu. The function screen appears.

#### Inquiry

1. Enter the range of employees you want to include in the report.
2. If you want dollar amounts in the report (hours information is always included), check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).
3. Select the output device.

A sample Vacation and Sick Leave Report is at the end of this section.

After the report is produced, the Payday Work menu appears.

**Vacation and Sick Leave Report**

Vacation and Sick Leave Report

Payday Work

---

## Print Checks

---

Use the Print Checks function to print checks created through the Calculate Checks function or that you entered through the Manual Checks function that have no check numbers assigned.

Checks are not printed for employees who have negative gross pay. If an employee has negative net pay, the employee's deductions and withholdings are reduced until the net pay is zero before a check is printed.

### Print Checks Screen

Select **Print Checks** from the Payday Work menu. The function screen appears.

The screenshot shows a window titled "Print Checks" with a menu bar (Commands, Edit, Modes, Other, Help) and a toolbar with icons for back, forward, and other functions. The main area displays the following information:

Payroll Number	000053
Quarter	4
Group Code	1 2 3
Period End	01/01/2000
Date on Checks	12/01/2000
GL Period	12

Below this, there are input fields for:

- First Check Number: 1
- If Restart, Last Good Form Number: (empty)
- Check Printing Order?: Employee ID (dropdown menu)
- Print Remaining Leave?: Vacation (dropdown menu)

At the bottom, there is a status bar with the text "Vacation, Sick, Both, None" and a footer area showing "Company H", "06/02/2000", "Terminal T000", and "OVR".

The payroll number, quarter, group code, period end, date on checks and GL period are displayed. You entered this information in the Calculate Checks or the Manual Checks function.

- 
1. The next unused check number is displayed. Press **Enter** to use it or enter a different check number.
  2. If you have problems when you print the checks, you must restart the Print Checks function. To reprint the checks that were not printed correctly, enter the number of the last check that was printed correctly.
  3. Select the order in which you want the checks to be printed: employee ID, check location, or department.
  4. Select the kind of remaining leave you want the checks to include: vacation, sick, both, or none.
  5. Select the output device. If you select the printer as your output device, a message tells you to mount the checks.
  6. If you want to print an alignment form to make sure that the forms are lined up, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).

When you save your entries, the checks are produced. A sample check is at the end of this section.

Whether or not the company name and address are printed on the checks depends on your selection in the Resource Manager Options and Interfaces function.

After the checks are produced, the message **Mount paper—Check log will now print** appears. Remove the check forms from the printer and insert regular paper. When you are ready to print the checks log, press **Enter**.

A sample of one type of check and a sample of the checks log are at the end of this section.

After the check log is printed, the Payday Work menu appears.

## Sample Check

## Void Checks

---

Use the Void Checks function to void checks that have been printed and posted but need to be reversed or voided. You can create a copy of the voided check so that a new check can be printed for the employee. You cannot, however, void a check from a previous version of Payroll. The check you want to void must have been posted to history.

When you select a check to void, the system searches for and verifies the check in the PAHCxxx (Check History) file. Then the system checks the PACHxxx (Checks) file; if a batch of checks is in process (that is, calculated and/or entered but not posted), you cannot void a check. If the check has been calculated, the system prompts you to reenter time tickets. If you have produced manual checks, you are asked to reenter the check.

Voiding a check is the reverse of posting. The check is backed out; if Payroll is interfaced with General Ledger and Bank Reconciliation, the check history is backed out of those applications. The check remains in the PAHCxxx file but is marked as a voided check. It is printed in the Check History Register, but its totals are not added to the register.

You can choose to make a copy of the check record in the PACHxxx file if the check is a manual check. If the check is a calculated check, you can make a copy of the time tickets used to calculate that check in the PATRxxx (Transactions) file. You can do this, though, only if the original time tickets are in the PATHxxx (Transaction History) file. The check or the transactions will then be re-created in the correct files, and you can edit the check in the Manual Checks function or the transaction in the Payroll Transactions function.

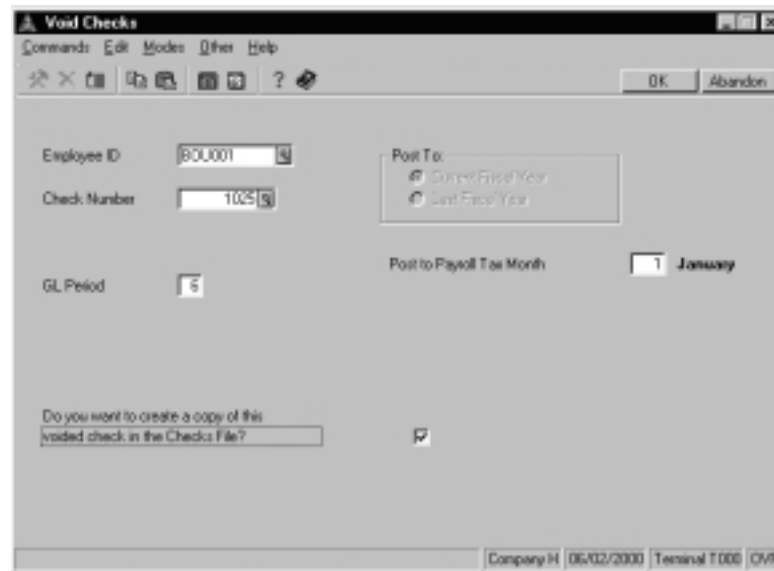

### Before You Begin

Before you void a check, post the checks that you created through the Calculate Checks function or that you entered through the Manual Checks function.

---

## Void Checks Screen

Select **Void Checks** from the Payday Work menu. The function screen appears.

**Inquiry****Inquiry****Inquiry**

1. Enter the ID of the employee for which you want to void a check.
2. Enter the check number you want to void.
3. If Payroll is interfaced with Bank Reconciliation, enter the bank account to which the check was posted. This field appears only if Payroll is interfaced with Bank Reconciliation.
4. The current general ledger period is displayed. Press **Enter** to accept the period that's displayed, or enter a different GL period to which you want the resulting journal entries posted.
5. If last-year files exist in General Ledger, select the year to which you want to post.
6. Enter the payroll tax month to which you want to post.

- 
7. If you want to create a copy of the voided check in the PACHxxx file, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).
  8. The voided check will post to history and General Ledger (and Bank Reconciliation if it is interfaced). If you want to continue with the void, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).

After the check is deleted, an audit log is printed. A sample audit log is at the end of this section.

After the audit log is produced, the Payday Work menu appears.

## Check Register

---

The Check Register is a record of the checks issued for an employee group and pay period. It is like the Edit Register, except that it contains the number of the check that was printed for each employee and it is sorted and subtotaled by department.

### Check Register Screen

Select **Check Register** from the Payday Work menu. The function screen appears.

The screenshot shows a window titled "Check Register" with a menu bar (Commands, Edit, Modes, Other, Help) and a toolbar. The main area displays the following fields:

Payroll Number	000053
Quarter	4
Group Code	1 2 3
Period End	01/01/2000
Date on Checks	12/01/2000
GL Period	12

Below these fields is a checkbox labeled "Print employer tax and deduction information?" which is checked.

At the bottom, there are two groups of radio buttons:

- Print Register In:**
  - ☒ Summary
  - ☐ Detail
- Print By:**
  - ☒ Department
  - ☐ Employee ID
  - ☐ Sequence No.
  - ☐ Check No.

The status bar at the bottom shows "Company H", "05/02/2000", "Terminal T 000", and "OVR".

The payroll number, quarter, group code, period end, date on checks, and GL period are displayed. You entered this information in the Calculate Checks or the Manual Checks function.

1. If you want employer tax and deduction information in the report, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).

- 
2. Select the level of detail you want to include in the register. You can print in detail (earnings, withholdings, and deductions information for all checks in the PACHxxx file) or in summary (earnings, withholdings, and deductions involved in the checks).
  3. Select the order in which you want to print the report.
  4. Select the output device.

A sample Check Register is at the end of this section.

After the register is produced, the Payday Work menu appears.

## Paycheck Received Report

---

The Paycheck Received Report is a list of employees scheduled to receive a paycheck. The list has a space for employees to sign for their paychecks. Use the report as a means for recording which employees have received their paychecks or to check which employees are scheduled to receive pay for that pay period.

### Paycheck Received Report Screen

Select **Paycheck Received Report** from the Payday Work menu. The function screen appears.

Payroll Number 000053  
Quarter 4  
Group Code 1 2 3  
Period End 01/01/2000

☐ Employee ID

Page Break After Department/Check Location? ☐

Company H 06/02/2000 Terminal T 000 OVR

The payroll number, quarter, group code, period end, date on checks, and GL period are displayed. You entered this information in the Calculate Checks or the Manual Checks function.

1. Select the order in which you want to print the report.

- 
2. If you want each department or check location to be printed on a new page, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).
  3. Select the output device.

A sample Paycheck Received Report is at the end of this section.

After the report is produced, the Payday Work menu appears.

Paycheck Received Report

---

## Withholding Report

---

Federal, state, and local tax authorities may require your company to make a deposit based on the amounts you withheld from employees' checks. These deposits may be required after each pay period or at the end of every quarter. The Withholding Report is a summary of these employee payroll withholding amounts for one pay period. The Quarterly Withholding Report summarizes the statistics for one quarter.

### Withholding Report Screen

Select **Withholding Report** from the Payday Work menu. The function screen appears.

The screenshot shows a window titled "Withholding Report" with a menu bar (Commands, Edit, Modes, Other, Help) and a toolbar. The main area contains the following fields and options:

Payroll Number	000053
Quarter	4
Group Code	1 2 3
Period End	05/02/2000
Date on Checks	05/02/2000
GL Period	12

Below these fields is a section labeled "Print Earnings As:" with two radio button options: "Gross Earnings" (selected) and "Taxable Earnings". At the top right of the window are "OK" and "Abandon" buttons.

The payroll number, quarter, group code, period end, date on checks, and GL period are displayed. You entered this information in the Calculate Checks or the Manual Checks function.

- 
1. Select the kind of earnings you want in the report. You can choose either gross earnings or taxable earnings.
  2. Select the output device.

A sample Withholding Report that shows gross earnings is at the end of this section.

After the report is produced, the Payday Work menu appears.

## Employer's Tax Report

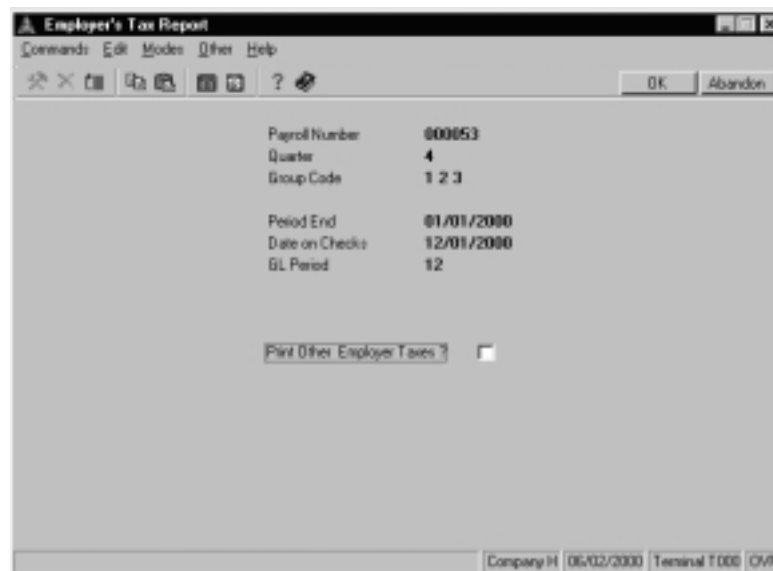

---

The Employer's Tax Report provides a record of the company's wage limits for taxes (for example, OASDI, Medicare, SUI, and FUTA) and wages in excess of the limits.

The liability calculations in this report are approximate because of rounding differences and may vary from actual posting totals. Compare the totals with those in the Employer's Liability Report for the actual liabilities.

### Employer's Tax Report Screen

Select **Employer's Tax Report** from the Payday Work menu. The function screen appears.

The screenshot shows a window titled "Employer's Tax Report". The window has a menu bar with "Commands", "Edit", "Modes", "Other", and "Help". Below the menu bar is a toolbar with icons for back, forward, and other functions. The main area of the window displays the following information:

Payroll Number	000053
Quarter	4
Group Code	1 2 3
Period End	01/01/2000
Date on Checks	12/01/2000
GL Period	12

Below this information is a checkbox labeled "Print Other Employer Taxes ?" which is currently unchecked. At the bottom of the window, there is a status bar with the text "Company H 06/02/2000 Terminal T000 OVR".

The payroll number, quarter, group code, period end, date on checks, and GL period are displayed. You entered this information in the Calculate Checks or the Manual Checks function.

- 
1. If you want to print other employer taxes, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).
  2. Select the output device.

A sample Employer's Tax Report is at the end of this section.

After the report is produced, the Payday Work menu appears.

## Employer's Tax Report

Payday Work

Employer's Tax Report

---

## Employer's Liability Report

---

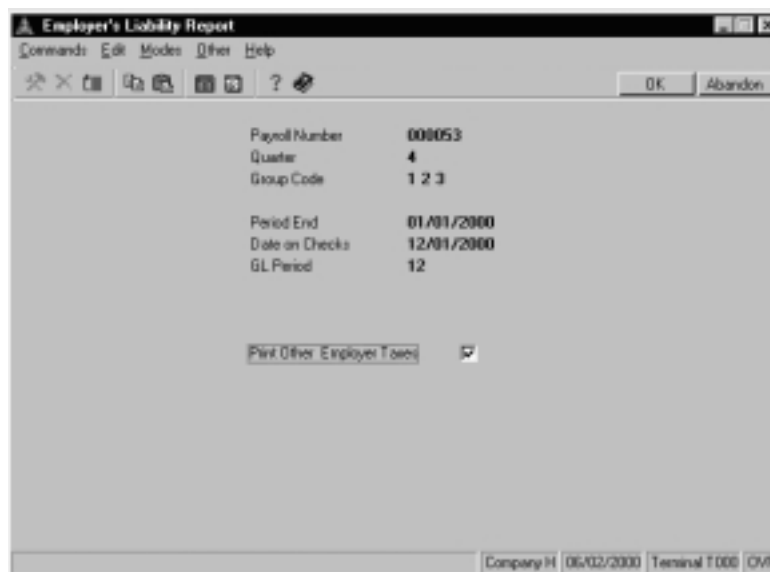

Federal and state authorities may require your company to make a deposit based on the amounts calculated for employer taxes. The deposits may be required after each pay period or at the end of every quarter. The Employer's Liability Report is a summary of the employer payroll liability amounts for one pay period. The Quarterly Employer's Tax Report summarizes the liabilities for one quarter.

The Employer's Liability Report shows the employer's liability for taxes (OASDI, Medicare, SUI, and FUTA) based on taxable earnings for the pay period.

The totals in the report are the actual liability. Check them against the approximate totals in the Employer's Tax Report.

### Employer's Liability Report Screen

Select **Employer's Liability Report** from the Payday Work menu. The function screen appears.

The screenshot shows a window titled "Employer's Liability Report". It has a menu bar with "Commands", "Edit", "Modes", "Other", and "Help". Below the menu bar is a toolbar with icons for back, forward, search, and help. The main area displays the following information:

Payroll Number	000053

## Employer Department Expense Report

---

Produce the Employer Department Expense Report before posting to see how employer deductions and withholdings will post to the department file.

### Employer Department Expense Report Screen

Select **Employer Department Expense Report** from the Payday Work menu. The function screen appears.

The screenshot shows a software window titled "Employer Department Expense Report". The window has a menu bar with "Commands", "Edit", "Modes", "Other", and "Help". Below the menu bar is a toolbar with icons for file operations and a help icon. On the right side of the toolbar are "OK" and "Abandon" buttons. The main area of the window displays the following information:

Payroll Number	000053
Quarter	4
Group Code	
Period End	01/01/2000
Date on Checks	12/01/2000
GL Period	12

Below this information, it states "Current Department Split Method is: Home Dept". At the bottom, there is a section labeled "Print Report In:" with two radio buttons: "Summary" (which is selected) and "Detail". The status bar at the very bottom of the window shows "Company H", "06/02/2000", "Terminal T000", and "OVR".

1. Select the amount of detail you want to include in the report.
2. Select the output device.

A sample Employer Department Expense Report is at the end of this section.

After the report is produced, the Payday Work menu appears.

---

## Post Checks

---

When you post checks, these things happen:

- The PAEDxxx (Employee History Deduction), PAEExxx (Employee Earnings History), PAEGxxx (Employee General Information), PAEWxxx (Employee Withholding History), PAEMxxx (Employee Miscellaneous History), and PAHVxxx (Leave Adjustment History) files are updated from the checks.
- The PATPxxx (Transactions Post) file is cleared to accept the next set of transactions entered through the Payroll Transactions function.
- The department records for salaried employees are updated. If an employee works in more than one department, the taxes paid by the employer are posted to each of those departments.
- If Payroll is interfaced with Job Cost, manual checks are posted to Job Cost.
- The paychecks detail is transferred to the PAHCxxx (Check History), PAHDxxx (Check Deductions History), PAHExxx (Check Earnings History), and PAHWxxx (Check Withholdings History) files if you elected to keep check history in the Resource Manager Options and Interfaces function.
- The pay period detail is posted to the GLJRxxx (Journal) file for the current or the last fiscal year (if Payroll is interfaced with General Ledger).
- Summary disbursement entries of the checks are created in the BRTRxxx (Transactions) file (if Payroll is interfaced with Bank Reconciliation).
- The information in the PACHxxx (Checks) file is erased to make way for check calculation for other groups of employees.
- The number of weeks each employee worked is calculated.
- The payroll number in the PACTLxxx table is incremented.

- The vacation and sick hours for employees are automatically updated if you selected this option.

When you post checks, the information that is posted cannot be edited later.

## Employee Posting Entries

Here is an illustration of the employee portion of the entries that are made when Payroll is interfaced with General Ledger:

Payroll Holding		Cash		Adv EIC Payment					
DB		CR		DB					
GL Account in Earning Codes		GLPAYxxx table (or if interfaced with Bank Rec., the BRBAxxx file)		GLPAYxxx table					
Fed WH Liability	FICA Liability	State Liability	Local Liability	Deduction Liability	Fed Other Liability	State Other 1-3	Local Other		
CR	CR	CR	CR	CR	CR	CR	CR	CR	

All these accounts are set up in the PAWIxxx (Withholdings) file and post to the GL account number entered in the file, except for the deduction liability account, which posts to the PADDxxx (Deductions) file.

If Payroll is interfaced with Bank Reconciliation, the cash account comes from the BR bank account you enter in the Post Checks function; otherwise, it comes from the GLPAYxxx table. The payroll holding account comes from the earnings code and advance EIC payment account comes from the GLPAYxxx table. The liability, state-other, and local-other accounts come from the PAWIxxx file.

## Employer Posting Entries

Here is an illustration of the employer portion of the entries that are made to General Ledger:

OASDI	MED	SUI	FUTA	Other	Deductions
CR	CR	CR	CR	CR	CR
Liability in PAWIxxx file				Liability in PADDxxx file	

After posting:

OASDI	MED	SUI	FUTA	Other	Deductions
DB	DB	DB	DB	DB	DB
Expense Account in PAWIxxx				Expense Account in PADDxxx	

The general ledger entries required for payroll processing are made in two parts:

- When you post the checks, credits for net pay, deductions and taxes are posted; a payroll holding account is debited for the gross pay; advance EIC is debited; and employer expenses are posted.
- Posted amounts do not include the types of other pay that are excluded from the employer's net pay, nor are these other-pay types posted to department expense accounts. Only the types of other pay that are included in net pay are posted.
- When you post expenses to General Ledger, gross pay is distributed to the appropriate departmental expense accounts.

---

## Before You Post

If you have a multiuser system, make sure that no one else is using the Payroll system. You cannot post if someone else is using the Payroll functions. In addition, if Payroll is interfaced with General Ledger, make sure that no one else is accessing the GLJRxxx file.

Back up your data files. Power surges or equipment failures can result in the loss of information.

## Post Checks Screen

Select **Post Checks** from the Payday Work menu. The function screen appears.

The screenshot shows a window titled "Post Checks" with a menu bar (Commands, Edit, Modes, Other, Help) and a toolbar. The main area contains the following fields and options:

Payroll Number	000053
Quarter	4
Group Code	1 2 3
Period End	01/01/2000
Date on Checks	12/01/2000
GL Period	12
Bank Account	[Empty field]

Be sure that you have backed up your data files before posting.

Post To:

- ☒ Current Fiscal Year
- ☐ Last Fiscal Year

Post to Payroll Tax Month: [Dropdown menu showing June]

Post Manual checks to Time Ticket History? ☒

At the bottom, there is a status bar showing "Company H", "06/02/2000", "Terminal T 000", and "CVH".

The payroll number, quarter, group code, period end, date on checks, and GL period are displayed. You entered this information in the Calculate Checks or the Manual Checks function.

**Inquiry**

1. Enter the bank account on which you these checks are drawn.
2. If Payroll is interfaced with General Ledger and the system detects general ledger last-year files, you must select the current or the previous fiscal year to post the checks to.
3. Enter the payroll tax month you want updated by the post for month-end processing.
4. If you want manual check entries to be posted to time ticket history, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).
5. Select the output device for the posting log.

A sample posting log is at the end of this section.

The liabilities displayed in the posting log may differ from those in the Employer's Tax Report because of rounding differences in the Employer's Tax Report. The Post Checks Log and the Employer's Liability Report show actual totals.

After posting is completed and the posting log has been produced, the Payday Work menu appears.

## Earnings and Deductions Report

---

Use the Earnings and Deductions Report function to print a detail or a summary report of employee month-, quarter-, and year-to-date earnings and deductions. The information in this report comes from the PAEDxxx (Employee Deductions History), PAEExxx (Employee Earnings History), and PAEGxxx (Employee General Information) files.

### Earnings and Deductions Report Screen

Select **Earnings and Deductions Report** from the Payroll Reports menu. The function screen appears.

The screenshot shows the 'Earnings and Deductions Report' window. It features a menu bar with 'Commands', 'Edit', 'Modes', 'Other', and 'Help'. A toolbar below the menu bar includes icons for file operations and a help icon. The main area contains several input fields and radio button groups. At the top, there are 'Pick', 'Employee ID', 'From', and 'Thru' labels. The 'From' field contains 'BOU000' and the 'Thru' field contains 'GER000'. Below these are two groups of radio buttons. The first group is labeled 'Print' and has 'Detail' (selected) and 'Summary' options. The second group is labeled 'Print for' and has 'Month Totals' (selected) and 'Quarter Totals' options. Below these is a 'Print by' group with 'Employee ID', 'Last Name' (selected), and 'Social Security Number' options. At the bottom, there is a 'Print for Month Number' field containing '12'. The status bar at the bottom right shows 'Company H', '06/02/2000', 'Terminal T000', and 'CVR'.

#### Inquiry

1. Enter the range of employees you want to include in the report.
2. Select the amount of information you want to print for each employee you selected. You can print the report in detail (with employee totals) or in summary (grand totals only).

- 
3. Select the totals you want to include in the report. You can print monthly or quarterly totals.
  4. If you elected to print the report in detail, select the order in which you want to organize the report.
  5. Enter the number of the month or quarter for which you want to produce the report.
  6. Select the output device.

A sample Earnings and Deductions Report is at the end of this section.

After the report is produced, the Payroll Reports menu appears.

## Earnings and Deductions Report

---

## Sick Leave and Vacation Report

---

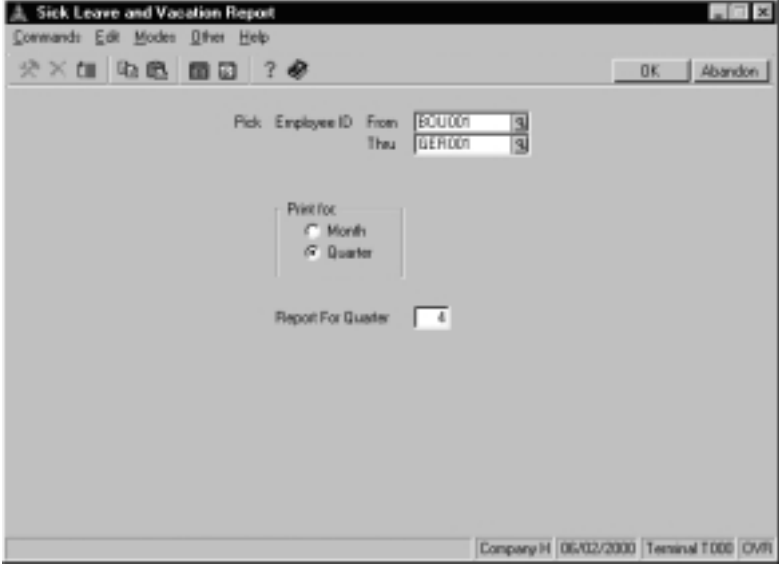

The Sick Leave and Vacation Report lists the month-, quarter-, and year-to-date sick leave and vacation hours employees have used, the number of such hours they have left for the year, and the amounts they have been paid so far for vacation and sick time. The information in this report comes from the PAEExxx (Employee Earnings History) and PAEGxxx (Employee General Information) files.

This report is useful in several situations. For example, employees might need to know how much vacation time they have left for the year. (You can also choose to print remaining sick and vacation time on the employee's paychecks—see page 6-29.) Managers might want to know how much vacation time some employees have left so that they can plan staffing for projects. And the personnel department might want to acknowledge perfect attendance records with an award.

---

## Sick Leave and Vacation Report Screen

Select **Sick Leave and Vacation Report** from the Payroll Reports menu. The function screen appears.

The screenshot shows a window titled "Sick Leave and Vacation Report". The window has a menu bar with "Commands", "Edit", "Modes", "Other", and "Help". Below the menu bar is a toolbar with icons for file operations and a help icon. The main area contains fields for "Pick: Employee ID" (From: B00001, To: B00001) and "Print for" (Month, Quarter). There is a "Report For Quarter" field with the value "4". At the bottom right, there is a status bar showing "Company H", "06/02/2000", "Terminal 1000", and "CVR".

### Inquiry

1. Enter the range of employees you want to include in the report.
2. Select the totals you want to include in the report. You can include monthly or quarterly totals.
3. Enter the number of the month or quarter for which you want to produce the report.
4. Select the output device.

A sample Sick Leave and Vacation Report is at the end of this section.

After the report is produced, the Payroll Reports menu appears.

## Transaction History Report

---

## 401(k) Report

---

The 401(k) Report displays the deductions and matching codes and amounts for each employee in the selection. Use the report to audit employee and employer contributions to employee retirement plans.

### 401(k) Report Screen

Select **401(k) Report** from the Payroll Reports menu. The function screen appears.

The screenshot shows a software window titled "401(k) Report". It has a menu bar with "Commands", "Edit", "Modes", "Other", and "Help". Below the menu bar is a toolbar with various icons. The main area contains several input fields and checkboxes. On the left, there are fields for "Employee ID" (From and Thru), "Department ID" (From and Thru), "401(k) Deduction Code" (From and Thru), and "Employer Match Code" (From and Thru). On the right, there are checkboxes for "Print By:" (Employee ID, Department ID, Social Security Number) and "Print:" (Detail, Summary). At the bottom left, there is a "Print for Month" dropdown set to "12" and "December". The status bar at the bottom right shows "Company H | 06/11/2008 | Terminal T000 | INS".

#### Inquiry

1. Enter the range of employees you want to include in the report.

#### Inquiry

2. Enter the range of departments you want to include in the report.

#### Inquiry

3. Enter the deduction code you want to include in the report.

#### Inquiry

4. Select the employer matching code to include in the report.

- 
5. Select the amount of information you want to include in the report: month or quarter.
  6. Select the month(s) for which you want to print.
  7. Enter the order in which you want to print the report.
  8. Select the output device.

A sample 401(k) Report is at the end of this section.

After the register is produced, the Payroll Reports menu appears.

## Check History Register

---

The Check History Register shows the payroll checks you have written for the employees and dates you select. Use the register as a record of earnings, deductions, withholdings, and cash disbursements. The information in the register comes from the PAHCxxx (Check History), PAHDxxx (Check Deductions History), PAHExxx (Check Earnings History), and PAHWxxx (Check Withholdings History) files.

---

**Note**

OASDI and Medicare amounts appear as one sum in the FICA field in the register for history accumulated before installation of Payroll version 4.06 or higher.

---

You cannot print this report if you did not elect to save check history in the Resource Manager Options and Interfaces function.

---

## Check History Register Screen

Select **Check History Register** from the Payroll Reports menu. The function screen appears.

## Salary Review Report

---

The Salary Review Report shows employees who are due for a salary review. It can help you determine when employees are due for a review, or you can use it to review salary and bonus history. A worksheet version of the report is also available, which you can use while figuring salary increases or bonuses. The information in this report comes from the PAEGxxx (Employee General Information) and PAEPxxx (Employee Personnel) files.

### Salary Review Report Screen

Select **Salary Review Report** from the Personnel Reports menu. The function screen appears.

Roll Up Leave Balances	9-45
Purge Recurring Entries	9-49
Periodic Maintenance	9-51
Close Last Year	9-55

## **Introduction**

The functions explained in this chapter are to be performed periodically—some monthly, some quarterly, some annually. Check with the federal, state, or local governments to determine which of the reports you are required to produce and file.

At the end of every general ledger period, produce the Department Report before you post expenses to General Ledger. At the end of the month, you may need to produce the Monthly Withholding Report. Every quarter, produce the Quarterly Employer's Tax Report, the Quarterly Withholding Report, the Quarterly State Unemployment Report, and the 941 Worksheet. At the end of the quarter, perform periodic maintenance. At the end of the year, perform year-end maintenance, produce W-2s from last year's files, and close last year. Periodically, you should use the Roll Up Leave Balances function, unless you want to have a permanent record of employees' sick and vacation time.

---

## Department Report

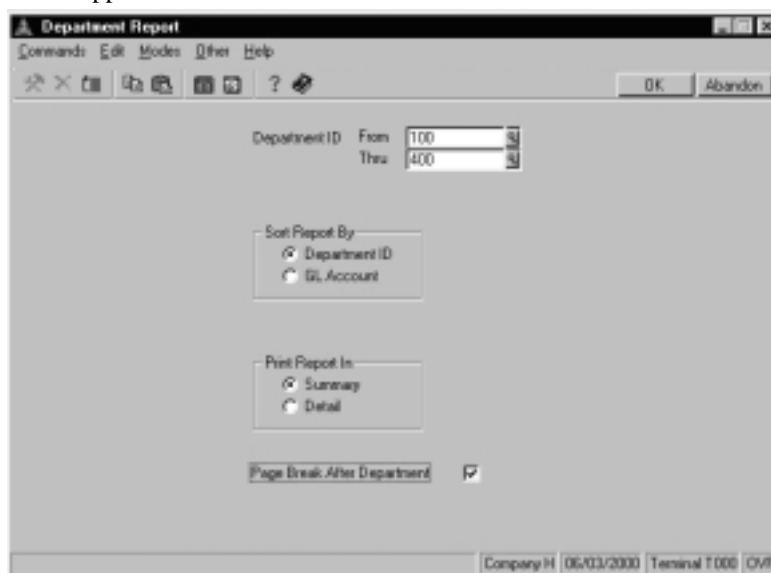

---

The Department Report is a summary of labor expenses posted to each department. It serves as an audit trail of the entries posted to the PADPxxx (Department) file from the PATRxxx (Transactions) and PACHxxx (Checks) files.

Produce this report at the end of an accounting period to review the accumulated expense amounts before you post labor expenses to General Ledger.

### Department Report Screen

Select **Department Report** from the Periodic Processing menu. The function screen appears.

#### **Inquiry**

1. Enter the range of departments you want to include in the report.
2. Select the order in which you want to print the report.

- 
3. Select the amount of information you want to include for each department you selected. You can print in summary (a summation of the general ledger accounts, if you chose to sort by general ledger account) or in detail.
  4. If you want each department to begin on a new page, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).
  5. Select the output device.

A sample Department Report is at the end of this section.

After the report is produced, the Periodic Processing menu appears.

Department Report

---

# Post Expense to GL

---

After you produce the Department Report at the end of an accounting period, post expenses to General Ledger to create the accounting entries for the payroll expenses for the period. If Payroll is interfaced with General Ledger, these entries update the GLJRxxx (Journal) file.

When you post checks at the end of a payday, the accounting entries for withholding, tax and net pay are created. To complete this transaction, the gross pay amount is debited to a payroll holding account. (See page 6-64 for more information.)

The Post Expense to GL function finishes the accounting entries for the period. It credits the holding account and distributes the amount to various department expense accounts in the general ledger.

Earnings	Employer	Employer
DB	DB	DB
Account in Department Record	Account in Department Record	

When the general ledger entries are made, the general ledger post-to-date amounts in the PADPxxx (Department) file are cleared to make way for a new accounting period.

Earnings	Employer Withholding	Employer Deduction
CR	CR	CR
GL Account in PAECxxx file	GL Expense Acct in PAWIxxx file	GL Expense Acct in PADDxxx file

---

## Before You Post

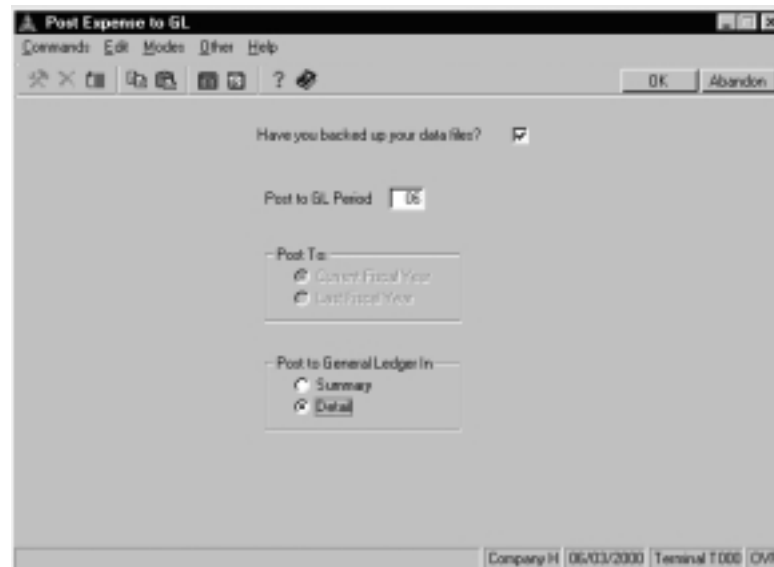

If you have a multiuser system, make sure that no one else is using the Payroll system. Other users cannot access the PADPxxx file in Payroll, and if Payroll is interfaced with General Ledger, other users cannot access the GLJRxxx file while you are posting.

Back up your data files. Power surges or equipment failures can result in the loss of information.

Be sure that you have a copy of the Department Report.

## Post Expense to GL Screen

Select **Post Expense to GL** from the Periodic Processing menu. The function screen appears.

- 
1. If you have backed up your data files, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode). If you have not backed up your files, exit to the menu and do so before continuing.
  2. Enter the GL period to which you want to post expenses (1–13).
  3. If last-year General Ledger files exist and Payroll is interfaced to General Ledger, select the fiscal year to which you want to post.
  4. Select the output device for the posting log.

A sample posting log is at the end of this section.

After posting is completed and the log has been produced, the Periodic Processing menu appears.

After the report is produced, the Periodic Processing menu appears.

## Notes on the Report

The number of weeks an employee worked (Weeks Worked) is calculated from information that is stored in the employee records.

The employer FICA earnings include FICA tips.

The numbers in the Employer FICA, SUI, and FUTA column headings are the limits in the FICA, FUTAx, and SUTy tables. The QTD liability totals are the percentages you set in those tables.

## Quarterly Withholding Report

Periodic Processing

Quarterly Withholding Report

---

## Quarterly State Unemployment Report

---

The Quarterly State Unemployment Report consists of two parts: a detailed wage report and a worksheet that shows the calculation for the employer's quarterly unemployment contribution. Depending on a state's requirements, you can sort the report by social security number or employee name, and you can choose to exclude employees with zero earnings from the report. These options must be set up in the PAINxxx (Payroll Information) file (page 10-57).

You must use the Set Up State Unemployment Reports option in the Payroll Information function to define this report before you can print it. If a state uses SUI or SDI employee withholding, retrieve that information from the Quarterly Withholding Report.

### Quarterly State Unemployment Report Screen

Select **Quarterly State Unemployment Report** from the Periodic Processing system. The function screen appears.

Quarterly State Unemployment Report

Commands Edit Modes Other Help

OK Abandon

Pick Employee ID From 8DU001 Thru 8DU001

State From 9 Thru 9

Company Name Builders Supply

Address 1157 Valley Park Dr  
Suite 105  
Shakopee, MN 55379

Quarter Ending Date 12/31/2000

Company ID 06/03/2000 Terminal T000 OVR

**Inquiry****Inquiry**

1. Enter the range of employees you want to include in the report.
2. Enter the range of states you want to include in the report. If you enter a range of states, a report is printed for each state.
3. The company name and address and the current quarter are displayed.
4. Enter the quarter number for which you want to print the report.
5. The workstation date is displayed. Press **Enter** to print this date on the report, or enter a different date.
6. If you want the report to include employees with zero earnings, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).
7. Select the output device.

A sample Quarterly State Unemployment Report is at the end of this section.

After the report is produced, the Periodic Processing menu appears.

## 941 Worksheet

---

The 941 Worksheet contains the information needed to complete federal form 941. Using the PAHCxxx (Check History) and PAHWxxx (Check Withholdings History) files, it also computes the eighth monthly period breakdown.

You cannot file the 941 Worksheet. Use it as a reference while filling out the official government-produced form.

### 941 Worksheet Screen

Select **941 Worksheet** from the Periodic Processing menu. The function screen appears.

The screenshot shows a window titled "941 Worksheet". The menu bar includes "Commands", "Edit", "Modes", "Other", and "Help". Below the menu bar is a toolbar with icons for file operations and a help icon. On the right side of the toolbar are "OK" and "Abandon" buttons. The main area of the window contains the following fields:

Quarter	<input type="text" value="4"/>
Quarter Ending Date	<input type="text" value="12/31/2000"/>
Adj. of Income Tax for Preceding Quarters	<input type="text" value="12.00"/>
Adj. of Tax on Third Party Sick Pay	<input type="text" value="100.00"/>
Other Dollars Adj. of Soc. Sec. and Medicare Taxes	<input type="text" value=".00"/>
Total Deposits for Quarter	<input type="text" value="3000.00"/>

At the bottom of the window, there is a status bar with the text "Company H | 06/03/2000 | Terminal T000 | CWR1".

1. Enter the number of the quarter for which you want to print the worksheet.
2. Press **Enter** to use the displayed quarter ending date, or enter the last day of the quarter for which you are producing the worksheet.

- 
3. Enter the adjustment to income tax for preceding quarters of the calendar year.
  4. Enter the adjustment to income tax for third-party sick pay for preceding quarters of the calendar year.
  5. Enter the adjustment to Social Security and Medicare taxes for preceding quarters of the calendar year.
  6. Enter the total deposits for the quarter.
  7. Select the output device.

A sample 941 Worksheet is at the end of this section.

After the worksheet is produced, the Periodic Processing menu appears.

## Notes on the Worksheet

If the letter *F* is in the right margin, a fractional adjustment has been made for Medicare and Social Security rounding. If the letter *F* is not in the right margin, the fractional amount is included in the amount shown.

---

## W-2 Forms

---

You can print W-2 forms after you have processed the payrolls for the year but before you do year-end maintenance. You can also print W-2 Forms from the last-year Payroll files after you perform year-end maintenance.

The forms summarize each employee's wages and taxes withheld during a calendar year. Employees use these forms to fill out local, state, and federal tax returns, and you must send a copy of each employee summary to the tax authorities when you complete the company's tax forms. The information on W-2 forms comes from the PAEDxxx (Employee Deduction History), PAEExxx (Employee Earnings History), PAEMxxx (Employee Miscellaneous History), PAEGxxx (Employee General Information), and PAEWxxx (Employee Withholding History) files.

If you have employees who have worked in several states, the system prints the deferred compensation for each state. You may have to send copies of individual state W-2s to each state when you file your federal income tax return.

The Payroll system does not handle legal representative and 942 employee reporting, third-party sick pay, Medicare for government employees, or golden parachute payments. You must calculate these amounts yourself and enter them in each employee's history record in the Employee History function (page 10-25).

The Payroll system does handle dependent care benefits, 457 Plans, Non-457 Plans, and group term life insurance if you enter the necessary information in the Employee History function.

Before you use this function to produce a diskette, get the guidelines for this procedure from the Social Security Administration (SSA). While Open Systems magnetic media has received general approval from the SSA, *your* company must apply for and receive SSA approval before filing on magnetic media.

In addition, some states now require companies with more than 250 employees to file W-2 information on magnetic media; contact your state tax authorities for more information. OSAS does not support state magnetic media. However, some states will accept the federal media format. Check with your state for more information.

---

## Before You Produce W-2 Forms

Check the relevant fields—such as statutory employee and allocated tips—in the PAEGxxx (Employee General Information) file (page 10-3) and PAEMxxx (Employee Miscellaneous History) file to make sure that the information is what you want on the W-2 forms.

## W-2 Forms Screen

Select **W-2 Forms** from the Periodic Processing menu. The function screen appears.

W-2 Forms

Commands Edit Modes Other Help

Pick Employee ID From BOU001 Thru BOU001

Format

☐ One Wide Regular or Mailed

☐ Two Wide Regular or Mailed

☒ Magnetic Media

☐ Laser W-2's

Company Name Builderz Supply

Address 1157 Valley Park Dr Suite 105

Federal Tax ID 77-7777777

Is Form Aligned? ☐

Company ID 06/03/2000 Terminal T 000 CVR

### Inquiry

1. Enter the range of employees for which you want to produce W-2 forms.
2. Select the format for the W-2 forms. If you choose two-wide forms, change the standard printer to 135 columns in Resource Manager. If you choose magnetic media, see **Magnetic Media** below.

The company name, address, and federal tax ID are displayed.

3. Select the output device.

Selecting the File output device option for the W-2 forms is not the same as the magnetic media reporting function described below.

4. If you selected the Printer output device option, insert the forms into the printer. CONTROL NUMB is printed in the upper left corner of the form. If CONTROL NUMB is not printed inside the Control Number box, adjust the forms and select **No** (or enter **N** in text mode) to print the alignment mark again. Continue this procedure until the mark is printed in the correct place, and then select **Yes** (or enter **Y** in text mode).

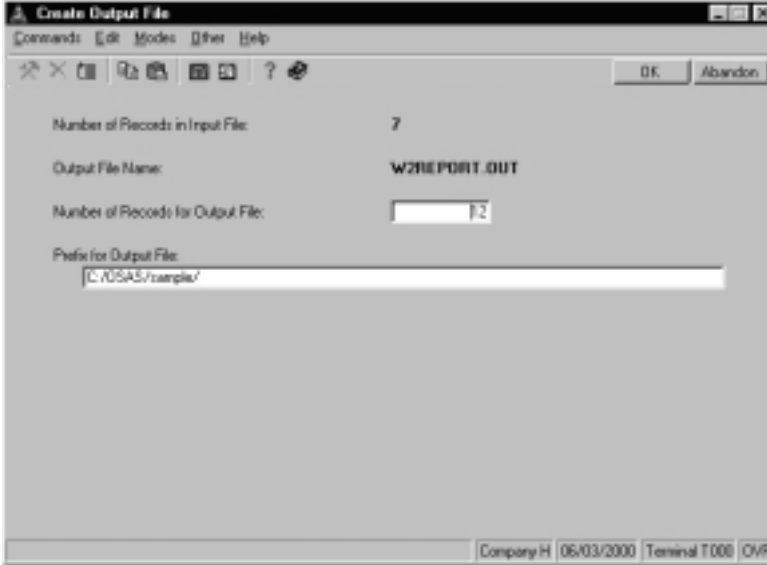

W-2 forms are printed two to a page. The first W-2 that is printed should be the first W-2 on the page.

After the forms are produced, the Periodic Processing menu appears.

---

## Magnetic Media

When you select **Magnetic Media** on the W-2 Forms screen, the Create Output File screen appears.

If a work file is already on the diskette, this prompt appears:

**An output file already exists. Do you want to start over?**

To complete the function, select **No** (or enter **N** in text mode) and skip to **Editing the file** later in this section. To prepare magnetic media from scratch, select **Yes** (or enter **Y** in text mode).

The number of records in the PAEGxxx file and the name of the output file the system uses are displayed.

1. Press **Enter** to accept the number of records in the output file. This number is the number of employees as well as additional information such as the header.

2. Press **Enter** if you want your output file in the data directory that is displayed, or enter a different directory name.

When you save your entries, the first magnetic media screen appears.

## Report W-2 Forms on Magnetic Media Screen One

The information you enter on this screen is used to create the header records the Internal Revenue Service and the Social Security Administration require. You can change any field.

Report W-2 Forms on Magnetic Media

Page 1 of 3

Payment Year: 1999

Federal EIN: 77777777

Transmitter

Name: BUILDERS SUPPLY

Street Address: 1157 VALLEY PARK DR

Payroll Record Unit:

State Limitation of Liability: ☐

Income Tax Withheld by 3rd Party Payer: 000000000000

Company H 06/03/2000 Terminal T000 OVR

The payment year and federal employer identification number are displayed.

1. If you used a different EIN (employer identification number) on form 941, 942, or 943 submitted for the same payment year, enter the other EIN you used in the Prior EIN field.
2. If the transmitter is not a state or local government, press **Enter** to skip the 69 number. If the transmitter is a state or local government, enter the 69 number assigned by the Social Security Administration.
3. Enter the name of the employer—for example, your company's name.
4. Enter the employer's street address, city, state, and zip or foreign postal code.
5. If the address is foreign, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).

- 
6. The name code indicates how employee's names are stored in the PAEGxxx file. Enter **S** if the employee surnames are before the first names, or **F** if the first names are before the last names.
  7. Press **Enter** if your employees do not perform any of the types of jobs below, or enter the code for the type of job they perform:  
**M** Military  
**H** Household  
**A** Agriculture  
**X** Railroad  
**F** Federal  
**Q** Medicare Qualified Government Employment (MQGE)  
**R** Regular (all others)
  8. If the company reports under the establishment report plan, enter the appropriate number.
  9. If the establishment is a state or local government, follow these instructions to enter the coverage group and the payroll record unit (PRU):
    - If you have neither a coverage group nor a PRU, press **Enter** to skip this field.
    - If you have a PRU but no coverage group, enter **0** and then the PRU.
    - If you have both a coverage group and a PRU, enter the coverage group and then the PRU.
  10. If the company is not a state or local government, press **Enter** to skip the State Limitation of Liability field. If the company is a state or local government, enter **L** if a state limitation of liability is applicable, or press **Enter** if it is not.
  11. Enter the income tax amount, if any, withheld by a third-party payer. Enter the amount in dollar and cents, but *without* a decimal point.

When you save your entries, the Output W-2 Forms to Magnetic Media screen appears.

## Output W-2 Forms to Magnetic Media Screen

Select the action you want to take next. You can edit any field in any W-2 (see **Editing the File** below), or you can output the W-2s to magnetic media without editing (see **Final Output Screen** below).

### Editing the File

When you elect to edit the intermediate file, a temporary file that has two records for each W-2 is created. The file is organized by employee ID and is copied to the diskette when you send output to magnetic media. You must edit the W-2s in sequence.

The Edit Intermediate File, 1W screen appears.

The screenshot shows a window titled "Edit Intermediate File" with a menu bar (Commands, Edit, Modes, Other, Help) and a toolbar. The main area displays a record with the following fields:

Record Sequence, Identifier	1W
	1234567890123456789012345678901234567890.
Employee SSN	459301099
Employee Name	LEMA, C BOUSHE
Employee Street Address	501 E HAMILTON AVE
Employee City, State, Zip	EDINA, MN 55425
Statutory Employee Code	

Buttons "OK" and "Abandon" are in the top right. The bottom status bar shows "Company H", "06/03/2000", "Terminal T000", and "OVR".

In most circumstances you will not want to edit the 1W record. Instead, use the **Proceed (OK)** command to go the 2W record, which contains all the reportable data for the employee.

Record Sequence, Identifier	2W Name	LINDA	C BOURNE
			1234567890
Annual OASDI Wages			000000
Annual Social Security Tips			000000
Total Annual Wages, Tips, Other Compensation			00000000
OASDI Employee Tax Withheld			191480
Federal Income Tax Withheld			000562445
Nonqualified Plans (Sec. 457)			00000000
Nonqualified Plans (Not Sec. 457)			00000000
Control Number			0000001
Employer Cost of Group Term Life Insurance			0000000
Uncollected Employee FICA Tax on Tips			0000000
Advance Earned Income Credit			0000000
Allocated Tips			0000000
Fringe Benefits			000013362
Pension Plan Indicator			P
Deferred Compensation Indicator			D
Deferred Compensation Amount			000136377
Dependent Care Benefit Amount			0000000

Company H 06/03/2000 Terminal T000 OVR

The numbers on the 2W screen have an *implied* decimal point. For example, the value in the OASDI Employee Tax Withheld field above is \$1914.80. If you edit any of the values on this screen, enter the full amount to the penny—without the decimal point.

When you save your changes, the 3W screen appears.

The screenshot shows a window titled "Edit Intermediate File" with a menu bar (Commands, Edit, Modes, Other, Help) and a toolbar. The main area displays the following information:

Record Sequence, Identifier	3W Name	LINDA C BOURNE
		1234567890
Annual Medicare Wages		308838Z
Medicare Employee Tax Withheld		004478Z
Military Allowance		000000

Buttons "OK" and "Abandon" are in the top right. The status bar at the bottom shows "Company H", "06/03/2000", "Terminal T000", and "OVR".

The 3W screen shows the annual Medicare wages and the Medicare employee tax withheld. The numbers on this screen have an implied decimal point.

When you save your changes, the next employee's 1W screen appears. Each employee record appears in sequence; you must go through the entire file and approve all the records to complete the process.

When you have finished editing W-2s, the W-2 Forms screen reappears (see **Output W-2 Forms to Magnetic Media Screen** earlier in this section). From there you can edit the entire file again or proceed with creating the magnetic media.

---

## Final Output Screen

Depending on your operating system (DOS/Windows or UNIX/Linux), the final output screen you see may differ slightly.

1. If you use a DOS- or Windows-based system, insert a blank DOS-formatted diskette in the diskette drive. (The diskette cannot have a label.) Use a 3.5-inch diskette in 1.44M format.

If you use a UNIX or Linux system, a file named W2REPORT is created in the pathname you specify. Before you submit magnetic media W-2 forms to the government, copy this file to a 1.44M, 3.5-inch DOS diskette. If you do not have a porting utility, contact your authorized reseller.

2. If you want an audit report of the information to be printed as it is written to the diskette, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode). If you elect to print the audit report, make sure that your printer is online.
3. If you use a DOS- or Windows-based system, enter the ID of the drive to which you are writing the W-2 information—for example, **A:**.

---

If you use a UNIX or Linux system, enter the pathname on the hard disk to which you want to write the W-2 information (the current pathname is the default).

When you save your entries, the creation of the magnetic media begins. When the process is finished, the Periodic Processing menu appears.

---

## Roll Up Leave Balances

---

The Roll Up Leaves Balances function combines all leaves taken and accrued into one total, comparing it with the total that has been updated in the PAEGxxx (Employee General Information) file. The beginning vacation and sick balances are kept in the PAHVxxx (Leave Adjustment History) file, along with the detail posted from Post Checks, Void Checks, and Leave Adjustments functions. If the system determines that there is a difference between the hours posted to the PAHVxxx file and the PAEGxxx file, it writes the number from the PAHVxxx file into the PAEGxxx file. An audit log is created.

---

**Note**

Back up your data files before you proceed with this function. Print the Sick Leave and Vacation Report, because sick and vacation accruals are cleared by this function.

---

---

## Roll Up Leave Balances Screen

Select **Roll Up Leave Balances** from the Periodic Processing menu. The function screen appears

1. If you have backed up your data files, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode). If you have not backed up your files, exit to the menu and do so before proceeding.
2. If you want to consolidate terminated employees, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).
3. Select the output device.

After leave balances have been rolled up, the Periodic Processing menu appears.

A sample audit log is at the end of this section.

Roll-Up Leave Balances Audit Log

End of Report									

---

## Purge Recurring Entries

---

Use the Purge Recurring Entries function to delete recurring time tickets. When the PARExxx (Recurring Entries) file gets too large, you can use this function to create more room on your system.

### Purge Recurring Entries Screen

Select **Purge Recurring Entries** from the Periodic Processing menu. The function screen appears.

Recurring entries with a cutoff date before the date you enter here will be purged.

After the entries are purged, the Periodic Processing menu appears.

---

## Periodic Maintenance

---

At the end of each calendar quarter, do quarter-end maintenance to prepare for next quarter's data. This procedure clears out the quarter-to-date balances in the PADPxxx (Department) file, deletes history records before the date you specify (if you keep history), and increments the current quarter number in the PACTLxxx table.

At the end of each calendar year, do year-end maintenance to prepare your files for next year's entries. This procedure clears out the quarterly and year-to-date balances in the PAEMxxx (Employee Miscellaneous History) file and the year-to-date information in the PADPxxx file, deletes records of terminated employees from the PAEGxxx (Employee General Information) and PAEMxxx files, and creates these last-year files with the .LY extension:

- PACDxxx (Checks Deductions)
- PACExxx (Checks Earning)
- PACHxxx (Checks)
- PACWxxx (Checks Withholdings)
- PADDxxx (Deductions)

  - PAWXxxx (Withholding Exclusion)

The PATB.LY (*LY* represents last-year data) and PATX.LY files are created so that the system can distinguish differences between prior-year and current-year tax percentages.

You cannot use the Periodic Maintenance function if you are working with prior-year files. You must be in quarter 4 of the current year to run year-end maintenance.

Because year-end maintenance automatically does quarter-end maintenance, you do not have to perform both quarter- and year-end maintenance.

## Before You Begin

Before you do quarter- or year-end maintenance, produce these reports:

- Earnings and Deduction Report (page 7-3)
- Sick Leave and Vacation Report (page 7-7)
- Quarterly Employer's Tax Report (page 9-15)
- Quarterly Withholding Report (page 9-19)
- Quarterly State Unemployment Report (page 9-23)
- 941 Worksheet (page 9-27)
- Department Report (page 9-3)

If you are deleting history, you should also produce the Transaction History Report (page 7-11) and the Check History Register (page 7-19).

Back up your data files. Then post expenses to General Ledger (page 9-7) and back up your data files again.

**Note**

If you delete check history and then print the 941 Worksheet from last year's files, the eighth monthly period breakdown on the 941 Worksheet is incorrect.

Finally, if you have a multiuser system, make sure that no one else is using the Payroll system. You cannot do quarter- and year-end maintenance if someone else is using Payroll functions.

## Periodic Maintenance Screen

Select **Periodic Maintenance** from the Periodic Processing menu. The function screen appears.

Periodic Maintenance

Commands Edit Modes Other Help

Have you run the following?

- Earnings and Deduction Report
- Sick Leave and Vacation Report
- Quarterly Employer's Tax Report
- Quarterly Withholding Report
- Quarterly State Unemployment Report
- 941 Worksheet
- Department Report
- Copy to Backup ☒

☐ Quarter End  
☒ Year End  
☐ Historical Only

Remove check history for items dated before  
Remove transaction history for items dated before  
Clear remaining sick/vacation time (year end only?) ☐

01/01/2000

Company H 06/03/2008 Terminal T000 QVR

1. Before you do quarter- or year-end maintenance, print the reports listed on the screen, and back up your data files.

- 
2. Select the kind of maintenance you want to perform. You can perform quarter-end or year-end maintenance, or you can purge history only (which does not close the quarter or year).
  3. If you want to delete history because the files are getting too big or because you no longer need the check and transaction history before a particular date, enter the dates for check and transaction history to indicate where the deletion should stop. For example, if you enter 12/31/2001, history before and including that date will be deleted.

If you do not want to delete history, press **Enter** to leave the date blank.

4. If you want to clear remaining sick and vacation time, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).

When you save your entries, the maintenance processing begins. When the procedure is finished, the Periodic Processing menu appears.

---

## Close Last Year

---

After you have done year-end maintenance and all the processing you need to do with last-year's files (for example, printing W-2s), use the Close Last Year function to delete last year's files.

You cannot use the Close Last Year function if you are currently working with prior-year files.

### Before You Begin

Before you close last year's files, print W-2s and back up your data files. Once you delete last year's files, you cannot reprint W-2s for that year unless you have a backup copy.

---

## Close Last Year Screen

Select **Close Last Year** from the Periodic Processing menu. The function screen appears.

1. If you have printed W-2s and backed up your data files (see **Before You Begin** above), check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode). If you have not backed up your files, exit to the menu and do so before closing.

When the purge is finished, the Periodic Processing menu appears.

---

## File Maintenance

Employee	10-3
Employee History	10-25
Leave Adjustments	10-49
Departments	10-51
Payroll Information	10-57
Recurring Entries	10-63
Tables	10-71
Tax Tables	10-87
Formula Maintenance	10-89
Change Fields	10-93

---

## Employee

---

Use the Employees function to add employee records, change descriptive data in employee records that are on file, and delete employee records (only when they have been added in error).

You cannot use the Employees function to change earnings or withholdings figures. You can, however, use the Employee History function (see page 10-25) to change withholding figures. If you edit employee history, a log is printed so that you can maintain an audit trail.

Because you must print W-2 forms and other year-end reports for all employees—including terminated ones—you cannot delete employee records that have amounts in their history files. Instead, terminated employee records are deleted for current-year data when you do year-end maintenance. They are retained in last year's files so that you can produce W-2 forms.

## Employees Screen

Select **Employees** from the File Maintenance menu. The selection screen appears.

### Field

### Description

#### Inquiry

Employee ID

Enter the ID of the employee whose record you want to add, change, or delete. If you enter an existing ID, the employee's name appears.

If you try to add an employee in the PAEGxxx.LYx (last-year Employee General Information) file, the PAEGxxx (current-year Employee General Information) file is not updated. The following message appears: **Warning: Adding employees in last-year files will not update current-year files.**

If you need to add the employee for W-2 reporting, press **Enter** and then enter the employee information.

---

Field	Description
	<p>To delete an employee record, use the <b>Delete (F3)</b> command. Both the employee's record and the employee's history record are deleted. If values greater than zero are in the employee's history record, the following message appears: <b>You cannot delete an employee with existing history.</b></p> <p>Records of terminated employees are automatically deleted from current-year files during year-end processing.</p>
<b>Inquiry</b> Copy From	<p>This field appears only if you are adding an employee record on the Employee General Information screen. You can save time by copying salary and tax information from another employee's record.</p>
Do You Want To Maintain:	<p>If you want to add or change information for the General Information screen, Salary Information screen, Tax Information screen, and Personnel Information screens 1 and 2, check the appropriate boxes (or enter <b>Y</b> in text mode); if not, uncheck the appropriate boxes (or enter <b>N</b> in text mode).</p> <p>When you have selected the screens you want, use the <b>Proceed (OK)</b> command to go to the first screen you selected.</p>

## General Information screen

Use the General Information screen to enter fundamental information about your employees: address, phone number, dates of hire and review, and personal contacts.

The screenshot shows a 'General Information' window with a menu bar (Commands, Edit, Notes, Other, Help) and a toolbar. The window is divided into several sections for data entry:

- Employee Identification:** Emp ID (800001), Last Name (Bourne), First Name (Linda), Middle In (C), W-2 Name (Linda C Bourne).
- Address:** Address 1 (221 N Hamilton Ave), Address 2, Address 3.
- Residence:** Res City (Edina), State (MN), Zip Code (55435), Country (US).
- Phone:** Phone No (612) 555-1212, SS No (455 30 1235), Sex (F), EEO Class (2).
- Job Information:** Job Title (Admin Asst), Work Phone, Extension, Supr ID (LUP001), Adj Hire Date (01/08/1993), Start Date (01/08/1993), Birth Date (06/07/1969), Term Date (??), Last Review Date (11/12/2000), Next Review Date (11/12/2001), Last Check Date (??).
- Insurance:** Ins Coverage (Family/Blue Cross), User Label 2, User Label 3.
- Emergency Contact:** Name (Jim Bourne), Work Phone (612) 555-1235, Home Phone (612) 555-1212, Relation (Husband).
- W-2 Fields:** Participate in 401K? (checked), Eligible for Pension? (checked), Statutory Employee? (checked), Deceased? (unchecked).
- E-Mail:** lbourne@boulder\_supply.com

At the bottom, there are status fields: Company M, 06/03/2000, Terminal T000, and DVR.

Field	Description
Last Name/First Name/ Middle In	Enter the employee's last name, first name, and middle initial.
W-2 Name	Enter the employee's name as it will appear on the W-2 forms that you print.
Address 1/2/3	Enter the employee's street address, city and state of residence.
<b>Inquiry</b> Res City/State/Zip Code/ Country	Enter the employee's city, state, zip or postal code, and country of residence. The <b>Inquiry (F2)</b> command is available in the State and Country fields.
Phone No	Enter the employee's home phone number using the mask that is displayed.

Field	Description
SS No	Enter the employee's social security number.
Sex	Enter <b>M</b> if the employee is male, or <b>F</b> if the employee is female.
EEO Class	Enter the employee's Equal Employment Opportunity classification: <b>1</b> White <b>2</b> African-American <b>3</b> Latino <b>4</b> Asian-American or Pacific Islander <b>5</b> Native American or Native Alaskan
Participate in 401K?	If the employee is participating in the 401(k) program, check the box (or enter <b>Y</b> in text mode); if not, uncheck the box (or enter <b>N</b> in text mode). This information is used for employee W-2 forms.
Eligible for Pension?	If the employee is eligible for the pension program, check the box (or enter <b>Y</b> in text mode); if not, uncheck the box (or enter <b>N</b> in text mode). This information is used for employee W-2 forms.
Statutory Employee?	If the employee qualifies as a statutory employee, check the box (or enter <b>Y</b> in text mode); if not, uncheck the box (or enter <b>N</b> in text mode). This information is used for employee W-2 forms.
Deceased?	If the employee is deceased, check the box (or enter <b>Y</b> in text mode); if not, uncheck the box (or enter <b>N</b> in text mode). This information is used for employee W-2 forms.
Job Title	Enter the employee's job title.
Work Phone/Extension	Enter the employee's work phone number and extension.
<b>Inquiry</b> Supr ID	Enter the employee ID of this employee's supervisor or manager.

---

Field	Description
Adj Hire Date	Enter the employee's adjusted hire date, which is the date the employee actually began working for the company (as opposed to when the employee accepted the job). This date is used in personnel reports.
Start Date	Enter the date of employment for the employee. This date is used to calculate sick time and vacation time.
Birth Date	Enter the employee's date of birth.
Term Date	If the employee no longer works for the company, enter the date of the employee's termination.  Employee records that contain a termination date are deleted automatically during year-end maintenance.
Last Review Date/ Next Review Date	Enter the dates of the employee's last and next reviews.
Last Check Date	Enter the date of the last check the employee received. This field is updated by the Post Checks function.
User-Defined Labels 1/2/3	Enter information in these user-definable fields, if necessary. You can define the prompts that appear using the USRDFxxx table (see page 10-84).
Name/Work Phone/ Home Phone/Relation	Enter the emergency contact information for the employee: the name of the person who is to be contacted in case of an emergency, the emergency contact's home and work phone numbers, and the contact's relation to the employee.
E-Mail	Enter the employee's e-mail address for reference purposes.

When you save the entries, the next screen you elected to add or change information on appears, or if you selected no other screens to work on, the Employee selection screen reappears.

## Salary Information Screen

Use the Salary Information screen to enter and maintain pay information for your employees.

If you copied an employee record, make sure that the information on this screen is correct for each employee.

### Pay Information

Field	Description
<div><div>Inquiry</div>Dept</div>	Enter the employee's department.  If necessary, you can indicate that an employee worked in a different department when you enter payroll transactions.

	Field	Description
<div data-bbox="315 541 456 590">Inquiry</div> <div data-bbox="315 590 456 638">Maint</div>	Labor Class	<p>Enter the employee's labor classification. When you use the <b>Maintenance (F6)</b> command, the Labor Classes function is temporarily called up.</p> <p>The labor class you enter here appears in the Class field when you enter a time ticket for the employee.</p>
	Corporate Officer?	<p>If the employee is a corporate officer, check the box (or enter <b>Y</b> in text mode); if not, uncheck the box (or enter <b>N</b> in text mode).</p>
	Seasonal Employee?	<p>If the employee is a seasonal employee, check the box (or enter <b>Y</b> in text mode); if not, uncheck the box (or enter <b>N</b> in text mode).</p>
	Type (H or S)	<p>Enter <b>H</b> if the employee is paid by the hour, or <b>S</b> if the employee is paid a salary.</p>
	Exempt?	<p>If the employee is salaried, check the box (or enter <b>Y</b> in text mode) if the employee is exempt and does not receive overtime pay, or uncheck the box (or enter <b>N</b> in text mode) if the employee is nonexempt and should receive overtime pay.</p>
	Adjust to Minimum?	<p>If the employee does not receive tips, uncheck the box (or enter <b>N</b> in text mode). If the employee receives tips as part of his or her earnings, check the box (or enter <b>Y</b> in text mode) so that the wages will be adjusted to bring the employee's earnings up to minimum wage if the reported tips do not.</p>
	Group Code	<p>When you calculate checks, you use the group code to identify the employees you want to pay. Common practice is to use a unique group code for each pay cycle (weekly, biweekly, semimonthly, and so on).</p> <p>Enter the code that identifies the check processing group the employee belongs to.</p>

Field	Description
Pay Periods/Year	Enter the number of times the employee is paid during the year: <b>1, 2, 4, 12, 21, 24, 26, 27, 52</b> or <b>53</b> . This number is used when taxes are calculated during check calculation.
Check Location	Enter the check location for the employee. This information is used as a sort option when you print checks.
<div data-bbox="266 730 407 772"><b>Inquiry</b></div> <div data-bbox="266 779 407 825"><b>Maint</b></div>	Earning Code
	Enter the default earning code for the employee. The earning code you enter here appears in the earning code field when you enter a time ticket for the employee. For a salaried employee, this code is used to create the earnings entry when you calculate checks.
Salary	If the employee is paid a salary, enter the salary he or she receives each pay period. You must enter a salary for salaried employees to ensure correct calculations.
Hourly Rate	<p>Enter the employee's hourly pay rate. You can override the rate when you enter time tickets.</p> <p>The hourly rate is used to calculate pay for hourly employees, calculate amounts allocated to other departments for salaried employees, put dollar values on sick and vacation time for salaried employees, allocate labor expense to a job (if Job Cost is interfaced), and calculate overtime amounts for nonexempt salaried employees.</p> <p>If you change a salaried or an hourly employee's pay rate, the following prompt appears:</p> <p><b>Pay Rate has changed. Add Change to Pay Change History?</b></p> <p>If you select <b>Yes</b> (or enter <b>Y</b> in text mode), the Pay Rate Change window appears. The date of the change and the old pay rate are displayed. You can enter a reason for the change.</p>

Field	Description
Override Pay	If a salaried employee is supposed to receive pay other than the usual pay—usually when employees start or terminate within a pay period—enter the amount. When you calculate checks, the amount is calculated in the next run only. After you post checks, this amount is removed from the employee's record.
Status	Enter <b>F</b> if the employee works full time or <b>P</b> if the employee works part time.
Sick Accrual Code	Enter the code (from the SICccxxx table) for the accrual rate of sick hours for the employee.
Vac Accrual Code	Enter the code (from the VACccxxx table) for the accrual rate of vacation hours for the employee.
Sick Hours Remaining	This field is updated when you post checks that contain sick pay hours. A negative value indicates sick hours taken; a positive value indicates sick hours accrued. You cannot change this value.
Vacation Hours Remaining	This field is updated when you post checks that contain vacation pay hours. A negative value indicates vacation time taken; a positive value indicates vacation time accrued. You cannot change this value.

## Scheduled Deductions

The screenshot shows the 'Salary Information' window for employee 'Bourne, Linda C' (Employee ID: 800001). The window is divided into two main sections: 'Pay Information' on the left and 'Scheduled Deductions' on the right.

**Pay Information:** This section contains various fields for employee data, including Dept (100), Labor Class (100), Company (100), Seasonal Employee? (No), Type (H or S) (H), Salary (100.00), Hourly Rate (100.00), Override Pay (00), Status (Full-time), Sick Accrual Code (100), and Vac Accrual Code (100).

**Scheduled Deductions:** This section displays a table of scheduled deductions. The table has columns for 'No.', 'Description', '1', '2', '3', '4', '5', 'Amount', and 'Balance'. The data is as follows:

No.	Description	1	2	3	4	5	Amount	Balance
1	Medical Ins						10.55	.00
6	401K						4.50	.00
3	Unempl' Ins						1.00	.00
4	Credit Union						50.00	.00
10	Stock Plan						180.00	.00
2	Dental Ins						3.52	.00

Below the table, it shows 'Deduction (001 of 005)'.

At the bottom of the window, there are buttons for 'Enter = edit', 'Append', 'Goto', 'Formula', 'Change Factors', 'Pay Info', and 'Next Page'. The status bar at the bottom indicates 'Company H 06/03/2008 Terminal T000 07VR'.

Each employee can have 999 scheduled deductions.

### Command Bar

**Enter = edit, Append, Goto, Formula, Change factors, Pay Info, Next page**

To edit a deduction, move the prompt to the line you want to edit and press **Enter**. To add a scheduled deduction to the employee's record, press **A**. Then see **Editing or Adding a Scheduled Deduction** below.

To go directly to a particular scheduled deduction, press **G** and then enter the deduction ID. (This command appears only if there is more than one screen of items.)

To edit or add a deduction formula, press **F**. The Formula Maintenance screen appears. (For more information about formulas, see page 10-89 and appendix C.)

To edit factors for a deduction, move the prompt to the line you want to edit factors for and press **C**. Then see **Factor Entry** below.

To return to the Pay Information portion of the Salary Information screen, press **P**.

To save your entries for this screen and move to the next screen you selected, press **N**. Each time you append or edit a line of a deduction entry, that entry is saved to the employee record. When you use the **Proceed (OK)** command through the pay information, that information is also saved.

### Editing or Adding a Scheduled Deduction

When you press **Enter** to edit a scheduled deduction or **A** to add a scheduled deduction, the fields for the line item become activated.

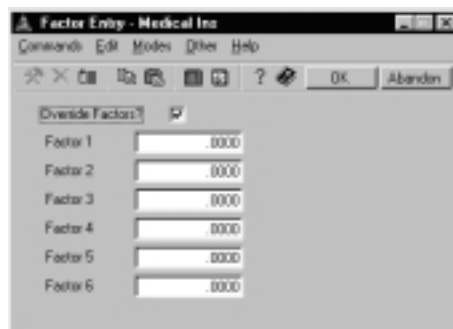

Field	Description
<b>Inquiry</b>	<p>No</p> <p>Enter the number of the scheduled deduction.</p> <p>You cannot use the same deduction number more than once for an employee. If you want the same deduction taken twice, you must enter a new deduction number.</p>
Description	<p>The description of the deduction is displayed.</p>
12345	<p>Each of the five characters represents a period code. You might use the pay periods to identify the five weekly pay periods in some months or five pay periods in which different combinations of deductions are taken.</p> <p>For each pay period, enter one of these codes:</p> <p><b>N</b> the deduction is not taken in the pay period  <b>Y</b> the amount you enter is deducted  <b>P</b> a percentage of the employee's gross pay is deducted  <b>H</b> a fixed rate per hour worked is deducted  <b>D</b> the amount is taken against a declining balance  <b>E</b> the amount is a declining balance by percentage  <b>G</b> the amount is a declining balance by formula</p>

---

Field	Description
	(If you enter <b>H</b> for a salaried employee, you must enter a time ticket to get the deduction.)
	If you press <b>Enter</b> , all pay periods are set to <b>N</b> .
Amount	If you entered Y for a pay period, enter the dollar amount that should be deducted.
	If you entered P for a pay period, enter the percentage of the employee's gross pay that should be deducted.
	If you entered H for a pay period, enter the dollar amount per hour that should be deducted.
	If you entered D for a pay period, the amount that is deducted is less than or equal to the balance.
	If you entered E for a pay period, the percentage that is deducted equals an amount less than or equal to the remaining balance.
	If you entered only F as the pay period code for the deduction, leave this field blank. The formula calculates the deduction.
Balance	If you entered D, E, or G for a pay period, enter the maximum amount that can be deducted for the employee. If this amount is deducted for an employee for a fiscal year, this deduction is not taken.

### Factor Entry

When you press **C** to change or override the established factors for a scheduled deduction in the Scheduled Deductions portion of the Salary Information screen, the Factor Entry window appears.

Field	Description
Override Factors?	If you want to override the factors you established for the scheduled deduction, check the box (or enter <b>Y</b> in text mode); if not, uncheck the box (or enter <b>N</b> in text mode).
Factor	You can enter six override factors; the factors you enter for the scheduled deduction supersede the factors established in the Formula Maintenance function (see page 10-89). Factors can represent anything from dollars to percents, depending on how they are used in a formula.

When you save the entries, the Scheduled Deduction screen reappears.

### Tax Information Screen

Use the Tax Information screen to set up federal, state, and local withholding information for each employee and to edit withholding formulas.

If you copied an employee record, make sure that the information on this screen is correct for each employee.

Tax Group

Company H | 06/03/2008 | Terminal T008 | QNR

Field	Description
Tax Group	Enter the ID of the tax group that applies to this employee’s earnings. A tax group can combine withholding codes for several states and localities. You can change this tax group if necessary during time ticket and manual check entry.

Command Bar

**Tab, Enter = edit, Append, Goto line, Withholding setup**  
**Next page, Previous page, Tax group**

To move between the federal, state, and local portions of the Tax Information screen, press the **Tab** key.

To edit a withholding tax, move the prompt to the line you want to edit and press **Enter**. To add a withholding tax to the employee's record, press **A**. Then see **Federal, State, or Local Tax Information** below.

To go directly to a particular withholding tax, press **G** and then enter the line number, or use the **Inquiry (F2)** command to select a line number. (This command appears only if there is more than one screen of items.)

To exclude withholding tax or to change factors, press **W**. The possible withholding codes for the employee are displayed; toggle them on or off.

To save your entries and move to the next screen you selected to edit or enter information for, press **N**. To return to the last screen you selected, press **P**. If you edited or appended a withholding tax, that line is saved.

## Federal Tax Information

When you press **Enter** or **A** on the command bar, you can edit or append federal withholding tax in an employee's record.

Field	Description
Fed	Enter the ID of the federal withholding tax.
Stat	Enter <b>M</b> if the employee is married or <b>S</b> if the employee is single.
Exemp	Enter the number of exemptions that are claimed on the employee's W-4 form for federal tax purposes.

Field	Description
	If no federal taxes are withheld for the employee, enter <b>99</b> .
Extra WH	If the employee wants money withheld in addition to the regular federal withholding, enter the extra dollar amount that should be withheld.
Fixed WH	You can enter an amount of withholding to deduct instead of the calculated federal taxes.
EIC Code	Enter <b>N</b> if the employee did not request EIC payments, <b>E</b> if the employee requested EIC payments only for himself or herself, or <b>B</b> if both the employee and his or her spouse file for advance EIC payments. (See <i>Circular E</i> for details.)
<b>Inquiry</b> Table ID	Select <b>FEDM</b> for a married employee or <b>FEDS</b> for a single employee. If you do not select the correct table ID, an employee may be taxed incorrectly.

## State Tax Information

When you press **Enter** or **A** on the command bar, you can edit or append state withholding tax in an employee's record.

	Field	Description
<b>Inquiry</b>	State	<p>Enter the employee's state postal code. The state you enter determines which state tax routines are used when the employee's state withholding is calculated. If the employee works in more than one state, the first state code must be the code for the employee's home state.</p> <p>If you enter the code for a state that is not in the PACO (Codes) file, an invalid entry message appears.</p>
	Stat	<p>For state withholding, enter <b>S</b> if the employee is single, <b>M</b> if the employee is married, <b>U</b> if the employee is an unmarried head of a household, <b>J</b> if the employee is married and files jointly, or <b>B</b> if the employee is married to a working spouse and they file jointly.</p> <p>Some states do not allow all these codes. Check with the state tax authorities for more information.</p>
	Exempt	<p>Enter the number of exemptions the employee claims for state tax purposes. If no state taxes are withheld for the employee, enter <b>99</b>. (Rules for determining the number of exemptions vary from state to state; see the state regulations for information.)</p>
	Extra WH	<p>If the employee wants money withheld in addition to the regular state withholding, enter the extra dollar amount that should be withheld.</p>
	Fixed WH	<p>You can enter an amount of withholding to deduct instead of the calculated state taxes.</p>
<b>Inquiry</b>	Table ID	<p>Enter the STXssm tax table ID used to calculate the withholding tax. If you do not enter a table ID, the system will use the default in the Tax Authority Setup function (see page 11-5 for more information).</p>
<b>Inquiry</b>	SUI State	<p>Enter the state used to accrue the employer's unemployment insurance.</p>
	State Name	<p>The name of the state tax authority is displayed.</p>

Local Tax Information

When you press **Enter** or **A** on the command bar, you can edit or append local withholding tax in an employee’s record.

	Field	Description
<b>Inquiry</b>	State	Enter the employee’s state postal code that corresponds to the local tax ID you want to add.
<b>Inquiry</b>	Local	<p>Enter the local tax code. If the employee works in more than one locality, the first local tax code must be the code for the employee’s home locality.</p> <p>If you have not defined a valid local tax record, you cannot enter a local code.</p>
	Stat	<p>For local withholding, enter <b>S</b> if the employee is single, <b>M</b> if the employee is married, <b>U</b> if the employee is an unmarried head of a household, <b>J</b> if the employee is married and files jointly, or <b>B</b> if the employee is married to a working spouse and they file jointly.</p> <p>Some localities do not allow all these codes; others use codes unique to that locality.</p>
	Exemp	Enter the number of exemptions the employee claims for local tax purposes. If no local taxes are withheld for the employee, enter <b>99</b> .
	Extra WH	If the employee wants money withheld in addition to the regular local withholding, enter the extra dollar amount that should be withheld.

Field	Description
Fixed WH	You can enter an amount of withholding to deduct instead of the calculated local taxes.
<b>Inquiry</b> Table ID	Enter the LTXssllm tax table ID used to calculate the withholding tax. If you do not enter a table ID, the default in the Tax Authority Setup function (see page 11-5) is used.
Locality Name	The name of the local tax authority is displayed.

## Personnel Information Screen One

Use the first Personnel Information screen to record and maintain miscellaneous personnel information for each employee.

**Personnel Information One**

Company H 06/11/2000 Terminal T000 INS

1. Enter miscellaneous comments about the employee.

### **Inquiry**

2. Enter three degrees for the employee; a description of each degree appears.

You set up Degree codes in the Payroll Information function (see page 10-57).

- 
3. Enter the employee's academic major for each degree.
  4. Enter the date of 10 pay changes.
  5. Enter the reason for the pay changes; the pay rate preceding each pay change is displayed in the Old Rate field.
  6. Enter the issue date of 10 pay bonuses.
  7. Enter the reason for the pay bonuses; the amount of the bonus is displayed in the Amount field.

When you save your entries, the second Personnel Information screen appears, or if you did not elect to modify the screen, the Employee selection screen appears.

---

## Personnel Information Screen Two

Use the second Personnel Information screen to record and maintain miscellaneous information for each employee. The fields on this screen are user-defined; the field names are taken from the USRDDxxx table (see page 11-83).

The screenshot shows a window titled "Personnel Information Two" with a menu bar (Commands, Edit, Modes, Other, Help) and buttons for OK and Abandon. The main area displays employee information for Employee ID BOUN001, BOUN001, BOUN001. Below this, there are two columns of date fields. The first column contains License (06/31/2000), Last Phys (12/03/1997), Driver Lic (??), User Date 04 (??), and User Date 05 (??). The second column contains User Date 06 (??), User Date 07 (??), User Date 08 (??), User Date 09 (??), and User Date 10 (??). At the bottom, there is a status bar showing Company H, 06/11/2000, Terminal T000, and INS.

Field	Value
Employee ID	BOUN001
License	06/31/2000
Last Phys	12/03/1997
Driver Lic	??
User Date 04	??
User Date 05	??
User Date 06	??
User Date 07	??
User Date 08	??
User Date 09	??
User Date 10	??

When you save your entries, the Employee selection screen reappears. Enter another employee ID to work with, or use the **Exit (F7)** command to return to the File Maintenance menu.

---

## Employee History

---

Use the Employee History function to enter historical information about employees. The type of information you enter depends on the method you use to set up initial balances (see page 3-22). After your system is set up, use the Employee History function to enter values for fields that are not calculated by the system—Allocated Tips, 100% Use Auto, Cost of GTLI, and so on.

You should not use this function to change earnings or withholding information. Instead, use the Manual Checks function (see page 6-9) to enter adjustments so that you will have an audit trail of the changes.

### Employee History Screen

Select **Employee History** from the File Maintenance menu. The header appears.

<b>Inquiry</b>
<b>Maint</b>

1. Enter the ID of the employee whose history you want to work with. If you use the **Maintenance (F6)** command, the Employees function is temporarily called up.
2. Check the associated box (or enter **Y** in text mode) to select the screens you want to work with.

When you have selected the screens you want, use the **Proceed (OK)** command to go to the first screen you selected.

## Employee Miscellaneous History Screen

Use the Employee Miscellaneous History screen to enter and maintain various payroll information. You can enter and edit information for three months at a time, and view monthly, quarterly, and year-to-date totals.

The Employee Miscellaneous History screen has two windows: Month Totals and Quarter Totals. Month totals can be edited, while quarter totals are for viewing only.

## Month Totals

When you enter the Employee Miscellaneous History screen, the Month Totals window appears.

The screenshot shows the 'Employee Miscellaneous History' window for Employee ID 800001, Employee Name Linda C. The window displays a table with the following data:

	October	November	December	-QTR 4-	-YTD-
Hours Worked	173.330	.000	.000	173.330	173.330
Weeks Worked	12.00	.00	.00	12.00	12.00
Wks Under Last	.00	.00	.00	.00	.00
Paid/Month	Y	N	N	YNN	
Allocated Tips	.00	.00	.00	.00	.00
100% Use Auto	.00	.00	.00	.00	.00
Cost of STU	.00	.00	.00	.00	.00
Cost of DCB	.00	.00	.00	.00	.00
457 Plan	.00	.00	.00	.00	.00
Non-457 Plan	.00	.00	.00	.00	.00
FICA Tips	.00	.00	.00	.00	.00
Adv EIC Payment	.00	.00	.00	.00	.00
Uncol CASDI	.00	.00	.00	.00	.00
Uncol Medicare	.00	.00	.00	.00	.00

At the bottom of the window, there are buttons for 'Enter = edit', 'Next Page', 'Change Quarter', 'Quarter totals', and 'QUITTING'. The status bar at the bottom right shows 'Company H 05/04/2008 Termid T000 QYR'.

## Command Bar

**Enter = edit, Next page, Change quarter, Quarter totals**

To edit a line item, press **Enter**. Then see **Editing a Line Item** below.

To save your entries and move to the next screen you selected to work with, press **N**.

To change the quarter that is displayed, press **C**.

To view the quarter totals and year-to-date totals side by side, press **Q**. Then see **Quarter Totals** below.

### Editing a Line Item

The Hours Worked, Weeks Worked, Wks Under Limit, and Paid/Month fields are updated when you post checks.

You must enter amounts in the Allocated Tips, 100% Use Auto, Cost of GTLI, Cost of DCB, 457 Plan, Non-457 Plan, FICA Tips, Adv EIC Payment, Uncol OASDI, and Uncol Medicare fields.

The quarter totals and year-to-date totals are updated by the sum of the values you enter for the three months.

Field	Description
Hours Worked	Enter the total number of hours the employee worked each month. The precision of these fields is defined in Resource Manager (see the <i>Resource Manager User's Manual</i> ).
Weeks Worked	<p>Enter the number of weeks the employee worked each month.</p> <p>Hourly employees are credited for the full number of weeks in the normal pay period (for example, 1 week for weekly pay periods or 2 weeks for biweekly pay periods) for any pay period they report regular, sick, or vacation time. The system calculates this number by dividing 52 weeks by the number of pay periods in a year (with a maximum of 13 weeks in a quarter).</p> <p>Salaried employees are credited for the number of weeks in the pay period for which a check is cut.</p>
Wks Under Limit	<p>Enter the number of weeks the employee received credit for working but was under the state's minimum number of hours for each month.</p> <p>When you set up the information for each state withholding you entered the minimum number of hours an employee must work to qualify for one week of work. The Weeks Worked fields track the number of weeks the employee was credited for working.</p>

---

Field	Description
Paid/Month	For each month, check the box (or enter <b>Y</b> in text mode) if the employee received a paycheck, or uncheck the box (or <b>N</b> in text mode) if the employee did not receive a paycheck.
Allocated Tips	<p>Additional tips are allocated to an employee when reported tips are less than a fixed percentage of house sales. This tip allocation is required by the government to encourage accurate tip reporting.</p> <p>Enter the dollar amount of tips allocated to the employee each month.</p>
100% Use Auto	If the employee drives a company automobile for personal <i>and</i> business use, enter the monetary value of the use of the automobile each month. (The value in this field is added to W-2s in the appropriate box. Use the federal tax publication <i>Circular E, Employer's Tax Guide</i> for guidelines.)
Cost of GTLI	<p>Enter the cost of group term life insurance attributed to the employee each month.</p> <p>The cost of GTLI is printed on the employee's W-2 and is included in the wages on the W-2, but FICA withholding is not calculated on this amount. (See <i>Circular E</i> for more information.)</p>
Cost of DCB	<p>Enter the cost of dependent care benefits provided for the employee each month.</p> <p>The cost of DCB is printed on the employee's W-2 and is included in the wages on the W-2, but FICA withholding is not calculated on this amount.</p>
457 Plan	<p>Enter the nonqualifying 457 Plan amounts that were distributed to the employee each month.</p> <p>The 457 Plan amount is printed on the employee's W-2 and is included in the wages on the W-2, but FICA withholding is not calculated on this amount.</p>

---

Field	Description
Non-457 Plan	<p>Enter the nonqualifying non-457 Plan amounts that were distributed to the employee each month.</p> <p>The non-457 Plan amount is printed on the employee's W-2 and is included in the wages on the W-2, but FICA withholding is not calculated on this amount.</p>
FICA Tips	<p>Enter the employee's earnings that were subject to FICA withholding each month.</p>
Adv EIC Payment	<p>Enter the amount the employee received in advance EIC payments each month.</p>
Uncol OASDI	<p>Uncollected OASDI is the OASDI withholdings that were not collected from an employee. For example, if an employee receives tips and the OASDI contribution on those tips would reduce the employee's paycheck to a negative value, OASDI is withheld from the check only until the amount is zero. The remainder is stored in these fields. The next time you calculate and print checks, the amount of uncollected OASDI will be deducted from the employee's check.</p> <p>Enter the OASDI withholdings that were not collected from the employee each month.</p>
Uncol Medicare	<p>Uncollected Medicare is the Medicare withholdings that were not collected from an employee. For example, if an employee receives tips and the Medicare contribution on those tips would reduce the employee's paycheck to a negative value, Medicare is withheld from the check only until the amount is zero. The remainder is stored in these fields. The next time you calculate and print checks, the amount of uncollected Medicare will be deducted from the employee's check.</p> <p>Enter the Medicare withholdings that were not collected from the employee each quarter.</p>

## Quarter Totals

When you press **Q** in the Month Totals window to view quarter totals, the Quarter Totals window appears.

The screenshot shows a window titled "Employee Miscellaneous History" with a menu bar (Commands, Modes, Other, Scroll Commands, Help) and a toolbar. The employee information is "Employee ID: 000001" and "Boume, Linda C". The window displays a table with columns for four quarters and year-to-date totals. The data is as follows:

	--QTR 1--	--QTR 2--	--QTR 3--	--QTR 4--	--YTD--
Hours Worked	.000	.000	.000	173.330	173.330
Weeks Worked	.00	.00	.00	13.00	13.00
Wks Under Limit	.00	.00	.00	.00	.00
Paid/Month	NNN	NNN	NNN	YNN	
Allocated Tips	.00	.00	.00	.00	.00
100% Use Auto	.00	.00	.00	.00	.00
Cost of GTU	.00	.00	.00	.00	.00
Cost of DCB	.00	.00	.00	.00	.00
457 Plan	.00	.00	.00	.00	.00
Non-457 Plan	.00	.00	.00	.00	.00
FICA Tips	.00	.00	.00	.00	.00
Adv EIC Payment	.00	.00	.00	.00	.00
Unreal DASC1	.00	.00	.00	.00	.00
Unreal Medicare	.00	.00	.00	.00	.00

At the bottom of the window are buttons: "Enter Field", "Next Page", "Change Quarter", "Quarter Totals", and "Month Totals". The status bar at the bottom right shows "Company H", "06/04/2000", "Terminal T000", and "CVR".

## Command Bar

### Next page, Month totals

To move to the next screen you selected to work with, press **N**.

To view the month totals and quarter-to-date totals side by side, press **M**. Then see **Month Totals** above.

The numbers in the Quarter Totals window are for viewing only and reflect quarters rather than months. For a description of the fields in this window, see **Editing a Line Item** above.

## Employee Earnings History Screen

Use the Employee Earnings History screen to add or edit earnings information for your employees.

The Employee Earnings History screen has two windows: Month Totals and Quarter Totals. Month totals can be edited, while quarter totals are for viewing only.

The earnings history information on both screens is updated when you post checks.

### Month Totals

When you enter the Employee Earnings History screen, the Month Totals window appears.

Employee Earnings History					
Employee ID: 800001 Beane, Linda C.					
Earning Hours					
Code	October	November	December	-QTR 4-	-YTD-

### Command Bar

Tab = Amounts, Enter = edit, Append, Next page, Previous page  
 Goto, Total gross and net pay, Delete Line, Change quarter, Quarter totals

---

To move the prompt between the Earning Hours and Earning Amounts portions of the Month Totals window, press the **Tab** key.

To edit a line item, press **Enter**. To add a line item, press **A**.

Line items in both the Earning Hours and Earning Amounts portions of the screen are identified by earning codes, which are set up in the Earning Codes function (see page 11-9).

When you add or edit earning hours information, you can enter hours for three months. The field masks in the Earning Hours portion of the screen are user-defined; for more information, see the *Resource Manager User's Manual*.

The quarter totals and year-to-date totals are updated by the sum of the values you enter for the three months.

To save your entries and move to the next screen you selected to work with, press **N**. To return to the previous screen you selected, press **P**.

To edit gross and net pay, press **D**.

To change the quarter that is displayed, press **C**.

To view the quarter totals and year-to-date totals side by side, press **Q**. Then see **Quarter Totals** below.

## Quarter Totals

When you press **Q** on the Employee Earnings History screen to view quarter totals, the Quarter Totals window appears.

The screenshot shows the 'Employee Earnings History' window for Employee ID 880001, Linda C. Bourne. It displays two tables: 'Earning Hours' and 'Earning Amounts'. Both tables show data for four quarters (QTR 1-4) and a year-to-date (YTD) total. The 'Earning Hours' table shows zero hours for all categories except VAC, which has 8,500 hours. The 'Earning Amounts' table shows amounts for P01, P03, REG, and VAC. The bottom of the window includes a summary section for Gross Pay and Net Pay, and a set of navigation buttons.

Earning Hours					
Code	--QTR 1--	--QTR 2--	--QTR 3--	--QTR 4--	--YTD--
P01	000	000	000	000	000
P03	000	000	000	000	000
REG	000	000	000	000	000
SIC	000	000	000	000	000
VAC	000	000	000	8,500	8,500

Earning Amounts					
Code	--QTR 1--	--QTR 2--	--QTR 3--	--QTR 4--	--YTD--
P01	.00	.00	.00	750.00	750.00
P03	.00	.00	.00	133.82	133.82
REG	.00	.00	.00	29738.00	29738.00
SIC	.00	.00	.00	.00	.00
VAC	.00	.00	.00	262.00	262.00
Gross Pay	.00	.00	.00	30883.82	30883.82

Navigation buttons: Tab=Hours, Command, Screen, Next page, Previous page, QTR, Earning and net pay, Gross pay, Gross Total, Month Totals. Status bar: Company H, 06/04/2000, Terminal T080, OVR.

### Command Bar

**Tab = Amounts, Next page, Previous page, Month totals**

To move the prompt between the Earning Hours and Earning Amounts portions of the Quarter Totals window, press the **Tab** key.

To move to the next screen you selected to work with, press **N**. To return to the previous screen you selected, press **P**.

To go to a particular line item, press **G** and then enter the earning code, or use the **Inquiry (F2)** command to select the earning code. (This command appears only if there is more than one screen of items.)

To view the month totals and quarter-to-date totals side by side, press **M**. Then see **Month Totals** above.

## Employee Deductions History Screen

The deduction amounts displayed on both the monthly and quarterly screens are updated when you post checks.

## Month Totals

[illegible]

---

**Command Bar**

**Tab = Amounts, Enter = edit, Append, Next page, Previous page, Total gross and net pay, Delete line, Change quarter, Quarter totals**

To edit a line item, press **Enter**. To add a line item, press **A**.

Line items are identified by deductions codes, which are set up in the Deductions function (see page 11-17).

When you add or edit monthly deduction information, you can enter amounts for three months for each deduction. Each field's mask is user- defined.

The quarter totals and year-to-date totals are updated by the sum of the values you enter for the three months.

If the deduction code is excluded from state withholdings (deferred compensation), you must enter the state code. If you leave the State field empty, the system assumes that the withholding is for federal deferred compensation.

To move to the next screen you selected to work with, press **N**. To return to the previous screen you selected, press **P**.

To go to a particular line item, press **G** and then enter the deduction code, or use the **Inquiry (F2)** command to select the deduction codes. (This command appears only if there is more than one screen of items.)

To change the quarter that is displayed, press **C**.

To view the quarter totals and year-to-date totals side by side, press **Q**. Then see **Quarter Totals** below.

## Quarter Totals

When you press **Q** on the Employee Deductions History screen to view quarter totals, the Quarter Totals window appears.

Employee Deduction History

## Command Bar

**Next page, Previous page, Goto, Month totals**

To move to the next screen you selected to work with, press **N**. To return to the previous screen you selected, press **P**. Changes you make are saved and take effect immediately.

To go to a particular line item, press **G** and then enter the earning code, or use the **Inquiry (F2)** command to select the earning code. (This command appears only if there is more than one screen of items.)

To view the month totals and quarter-to-date totals side by side, press **M**. Then see **Month Totals** above.

The numbers in the Quarter Totals window are for viewing only and reflect quarters rather than months.

## Employee Federal Tax History Screen

Use the Employee Federal Tax History screen to add or edit federal tax earnings and tax amount information for your employees.

The Employee Federal Tax History screen has two windows: Month Totals and Quarter Totals. Month totals can be edited, while quarter totals are for viewing only.

The federal earnings and tax amounts are updated when you post checks.

### Month Totals

When you enter the Employee Federal Tax History screen, the Month Totals window appears.

Tab=Tax Amounts Enter=edit append Next page Previous page

Change quarter Quarter Totals Print/Setup

Company H 06/04/2000 Terminal T000 QYH

---

**Command Bar**

**Tab** = Tax, **Enter** = edit, **Append**, **Next page**, **Previous page**  
**Goto**, **Change quarter**, **Quarter totals**

To move the prompt between the Earnings and Tax Amount portions of the Month Totals window, press the **Tab** key.

To edit a line item, press **Enter**. To add a line item, press **A**.

Line items in both the Earnings and Tax Amount portions of the screen are identified by federal tax authority codes, which are set up in the Tax Authority Setup function (see page 11-5).

When you add or edit earnings information, you can enter amounts for three months.

The quarter totals and year-to-date totals are updated by the sum of the values you enter for the three months.

To move to the next screen you selected to work with, press **N**. To return to the previous screen you selected, press **P**. Changes you make are saved and take effect immediately; you do not need to press **N** or **P** to save changes.

To go to a particular line item, press **G** and then enter the federal tax authority code, or use the **Inquiry (F2)** command to select the code. (This command appears only if there is more than one screen of items.)

To change the quarter that is displayed, press **C**.

To view the quarter totals and year-to-date totals side by side, press **Q**. Then see **Quarter Totals** below.

## Quarter Totals

When you press **Q** on the Employee Federal Tax History screen to view quarter totals, the Quarter Totals window appears.

## Command Bar

**Tab** = Tax Amount, **Next page**, **Previous page**, **Goto**, **Month totals**

To move the prompt between the Earnings and Tax Amount portions of the Quarter Totals window, press the **Tab** key.

To move to the next screen you selected to work with, press **N**. To return to the previous screen you selected, press **P**.

To go to a particular line item, press **G** and then enter the federal tax authority code, or use the **Inquiry (F2)** command to select the code. (This command appears only if there is more than one screen of items.)

To view the month totals and quarter-to-date totals side by side, press **M**. Then see **Month Totals** above.

The numbers in the Quarter Totals window are for viewing only and reflect quarters rather than months.

## Employee State Tax History Screen

Use the Employee State Tax History screen to add or edit state tax earnings and contributions information for your employees.

The Employee State Tax History screen has two windows: Month Totals and Quarter Totals. Month totals can be edited, while quarter totals are for viewing only.

The state earnings and tax amounts are updated when you post checks.

### Month Totals

When you enter the Employee State Tax History screen, this window appears.

The screenshot shows the 'Employee State Tax History' window for Employee ID BD0001, Boume, Linda C. The window is divided into two main sections: 'Earnings' and 'Tax Amounts'. Both sections have a table with columns for State, Code, October, November, December, -QTR 4-, and -YTD-. The 'Earnings' table shows values for MN SUI and MN SWH. The 'Tax Amounts' table shows values for MN SUI and MN SWH. At the bottom, there are buttons for 'Tab=Tax Amounts', 'Enter=edit', 'append', 'first page', 'Previous page', 'Change quarter', 'Quarter Totals', and 'Month Totals'. The status bar at the bottom indicates 'Company H', '06/04/2008', and 'Terminal 1000 (TVR)'.

State	Code	October	November	December	-QTR 4-	-YTD-
MN	SUI	28969.05	.00	.00	28969.05	28969.05
MN	SWH	28969.05	.00	.00	28969.05	28969.05

State	Code	October	November	December	-QTR 4-	-YTD-
MN	SUI	459.20	.00	.00	459.20	459.20
MN	SWH	2043.61	.00	.00	2043.61	2043.61

---

**Command Bar**

**Tab** = Tax Amount, **Enter** = edit, **Append**, **Next page**, **Previous page**  
**Goto**, **Change quarter**, **Quarter totals**

To move the prompt between the Earnings and Tax Amount portions of the Month Totals window, press the **Tab** key.

To edit a line item, press **Enter**. To add a line item, press **A**.

Line items in both the Earnings and Tax Amount portions of the screen are identified by state and state tax authority codes. State tax authority codes are set up in the Tax Authority Setup function.

When you add or edit earnings information, you can enter amounts for three months; each field's mask is user-defined. When you add or edit tax amount information, you can enter amounts for three months; each field's mask is user-defined.

Once you enter a state line, you cannot change the state code that withholding is for. If you need to enter a different state, press **A**.

The quarter totals and year-to-date totals are updated by the sum of the values you enter for the three months.

To move to the next screen you selected to work with, press **N**. To return to the previous screen you selected, press **P**. Changes you make are saved and take effect immediately; you do not need to press **N** or **P** to save changes.

To go to a particular line item, press **G** and then enter the state tax authority code, or use the **Inquiry (F2)** command to select the code. (This command appears only if there is more than one screen of items.)

To change the quarter that is displayed, press **C**.

To view the quarter totals and year-to-date totals side by side, press **Q**. Then see **Quarter Totals** below.

## Quarter Totals

When you press **Q** on the Employee State Tax History screen to view quarter totals, the Quarter Totals window appears.

Employee ID: B00001 Bureau, Linda C

## Command Bar

### Tab, Next page, Previous page, Goto, Month totals

To move the prompt between the Earnings and Tax Amount portions of the Quarter Totals window, press the **Tab** key.

To move to the next screen you selected to work with, press **N**. To return to the previous screen you selected, press **P**. Changes you make are saved and take effect immediately.

To go to a particular line item, press **G** and then enter the state tax authority code, or use the **Inquiry (F2)** command to select the code. (This command appears only if there is more than one screen of items.)

To view the month totals and quarter-to-date totals side by side, press **M**. Then see **Month Totals** above.

The numbers in the Quarter Totals window are for viewing only and reflect quarters rather than months.

## Employee Local Tax History Screen

Use the Employee Local Tax History screen to add or edit local tax earnings and contributions information for your employees.

The Employee Local Tax History screen has two windows: Month Totals and Quarter Totals. Month totals can be edited, while quarter totals are for viewing only.

The local earnings and tax amounts are updated when you post checks.

### Month Totals

When you enter the Employee Local Tax History screen, this window appears.

The screenshot shows the 'Employee Local Tax History' window. At the top, it displays 'Employee ID: 001001' and 'Beane, Linda C.'. Below this is a table for 'Earnings' with columns for State, Ls, Code, October, November, December, -QTR 4-, and --YTD--. The first row shows 'MN 01 LWH' with values 28969.05, .00, .00, 28969.05, and 28969.05. Below the earnings table is a section for 'Tax Amounts' with similar columns. The first row shows 'MN 01 LWH' with values 421.04, .00, .00, 421.04, and 421.04. At the bottom, there are buttons for 'Tab=Tax Amounts', 'Enter=edit', 'append', 'Next page', 'Previous page', 'Change quarter', 'Quarter Totals', and 'Month Totals'. The status bar at the bottom indicates 'Company: H 06/08/2008 Terminal: T000 OnVR'.

---

**Command Bar**

**Tab** = Tax Amount, **Enter** = edit, **Append**, **Next page**, **Previous page**  
**Goto**, **Change quarter**, **Quarter totals**

To move the prompt between the Earnings and Tax Amount portions of the Month Totals window, press the **Tab** key.

To edit a line item, press **Enter**. To add a line item, press **A**. Once you enter a state and locality, you cannot change the state code that withholding is for. If you need to enter a different state and locality, press **A**.

Line items in both the Earnings and Tax Amount portions of the screen are identified by state, locality, and local tax authority codes. Local tax authority codes are set up in the Tax Authority Setup function.

When you add or edit earnings information, you can enter amounts for three months; each field's mask is user-defined. When you add or edit earnings information, you can enter amounts for three months; each field's mask is user-defined.

The quarter totals and year-to-date totals are updated by the sum of the values you enter for the three months.

To return to the Employee History screen, press **N**. To return to the previous screen you selected, press **P**. Any changes you make are saved and take effect immediately; you do not need to press **N** or **P** to save changes.

To go to a particular line item, press **G** and then enter the local tax authority code, or use the **Inquiry (F2)** command to select the code. (This command appears only if there is more than one screen of items.)

To change the quarter that is displayed, press **C**.

To view the quarter totals and year-to-date totals side by side, press **Q**. Then see **Quarter Totals** below.

## Quarter Totals

When you press **Q** in the Employee Local Tax History screen to view quarter totals, the Quarter Totals window appears.

The screenshot shows the 'Employee Local Tax History' window with the 'Quarter Totals' tab selected. The window displays two tables: 'Earnings' and 'Tax Amounts'. The 'Earnings' table has columns for State, Lc, Code, and four quarters (QTR 1-4) plus a YTD total. The 'Tax Amounts' table has similar columns. The data for the first row is as follows:

State	Lc	Code	QTR 1	QTR 2	QTR 3	QTR 4	YTD
MIN	01	LWH	.00	.00	.00	20969.05	20969.05

State	Lc	Code	QTR 1	QTR 2	QTR 3	QTR 4	YTD
MIN	01	LWH	.00	.00	.00	421.04	421.04

At the bottom of the window, there are buttons for 'Tab=Tax Amounts', 'Enter/P', 'Accept', 'Next page', 'Previous page', 'Goto', 'Change quarter', 'Quarter Totals', and 'Month Totals'. The status bar at the bottom shows 'Company H 06/08/2008 Terminal T000 QTR'.

## Command Bar

### Tab, Next page, Previous page, Goto, Month totals

To move the prompt between the Earnings and Tax Amount portions of the Quarter Totals window, press the **Tab** key.

To return to the Employee History screen, press **N**. To return to the previous screen you selected, press **P**. Any changes you make are saved and take effect immediately; you do not need to press **N** or **P** to save changes.

To go to a particular line item, press **G** and then enter the local tax authority code, or use the **Inquiry (F2)** command to select the code. (This command appears only if there is more than one screen of items.)

---

To view the month totals and quarter-to-date totals side by side, press **M**. Then see **Month totals** above.

The numbers in the Quarter Totals window are for viewing only and reflect quarters rather than months.

## Audit Log

The preferred way to change a field on a history screen is to enter a payroll transaction or a manual check, and then post the item. If you manually change a history field and then exit from the screen, the following message appears: **An Employee Maintenance Audit Log exists. You must print it or send it to a file before you leave this function.**

Select the output device.

A sample Employee History Audit Log is at the end of this section.

After the log is produced, the File Maintenance menu appears.

## Employee History Audit Log

08/26/2001 10:17 AM	Builders Supply Employee History - Audit Log	Page 1

## Leave Adjustments

---

Use the Leave Adjustments function to make positive and negative adjustments to an employee's sick and vacation pay. Any changes you make here will update the PAHVxxx (Payroll Leave Adjustment History) file.

### Leave Adjustments screen

Select **Leave Adjustments** from the File Maintenance menu. The function screen appears.

#### Inquiry

1. Enter the ID of the employee. The employee's name appears.
2. Enter the leave type you want to adjust: sick or vacation.
3. Enter a description for the adjustment. For example, you may want a reason for the adjustment in the file.

---

4. Enter the date you make the adjustment.

**Inquiry**

5. Enter an earning code with an earning type of **V** for vacation or **S** for sick.

6. Enter the amount of the adjustment, using a “+” sign to add hours and a “-” sign to subtract hours.

When you save the adjustment, the cursor returns to the Earning Code field. Enter another earning code, or exit to the File Maintenance menu.

---

## Departments

---

Use the Departments function to add department and division records during installation and when new departments are created, change descriptive data about departments and divisions that are in the file, track pieces and hours worked, and delete department and division records you no longer use. Department information is stored in the PADPxxx (Department) file.

Along with transactions, manual or calculated checks also affect department records. Do not use the Departments function to change the dollar amounts in a department record. Instead, use the Payroll Transactions function or the Manual Checks function to make adjustments so that you have an audit trail of the changes.

### Department Records

Department records store expenses posted from time tickets, salaries, vacation and sick pay, FICA expense, SUI and FUTA accruals and other pay. Department records also store employer withholdings and deductions calculated by the system. This information updates expense accounts in General Ledger when you run the Post Expense to GL function (see page 9-7).

Time tickets update the department in which the employee worked. Employer withholdings and deductions are updated in either the home department or the department in which the employee worked, depending on which option you selected in the Resource Manager Options and Interfaces function.

### Divisions

Divisions are used to group some departments together for the purpose of analysis and reporting. For example, division records summarize groups of departments in the Department Report (see page 9-3).

If you use divisions, each department ID must begin with the two-character division ID. For example, if the ID of the sales division is SA, departments in the sales division could be identified as SA001 or SACITY.

Departments Screen

Select **Departments** from the File Maintenance menu. The function screen appears.

Hour	GL Account	GL Period	Quarter	Year
Pleases		.00	.00	544.750
Overtime Pay	520000	.00	.00	218.15
Bonus	520000	.00	.00	447.50

Field

Description

**Inquiry**

Department ID

Enter the ID of the department or division whose record you want to add or change. If you use divisions, each department ID must begin with the two-character division ID.

To delete a department or division record, enter the ID of the department or division and then use the **Delete (F3)** command.

You cannot delete department records that have amounts in the GL Period column. If you try to delete a department record that has balances, an error message appears.

**Inquiry**

Copy From

This field appears if you entered an ID in the previous field that is not on file. Enter the ID of the department or division record you want to copy, or press **Enter** to skip this field.

---

Field	Description
Name	Enter a department or division name.  If you enter a division name, approve the entry. Then enter the ID of another department or division you want to work with, or exit to the File Maintenance menu.

Use the **Proceed (OK)** command to move from the header region of the screen to the Line Item Scroll Region.

### Line Item Scroll Region

General Ledger period-to-date balances are amounts accumulated since the last time you posted expenses to General Ledger. Quarter- and year-to-date balances are amounts accumulated since the last time you did quarter- and year-end maintenance.

The mask for these fields is defined in Resource Manager; for more information, see the *Resource Manager User's Manual*.

The GL Period, Quarter, and Year fields accumulate numbers posted to the department from time tickets.

### Command Bar

#### **Enter = Edit, Append, Goto, Delete department**

To edit a line item, press **Enter**. Then see **Editing a Line Item** below.

To add a line item, press **A**. Then see **Appending a Line Item** below.

To go to a particular line item, press **G** and then enter the line item number, or use the **Inquiry (F2)** command to select the line item number. (This command appears only if there is more than one screen of items.)

To delete a department, press **D**. You cannot delete a department or an account in a department if it has a general ledger balance.

**Editing a Line Item**

When you press **Enter** on the command bar to edit a line item, the line item is activated.

	Field	Description
<b>Inquiry</b>	GL Account	Enter the general ledger account number associated with this line item. The <b>Maintenance (F6)</b> and <b>Inquiry (F2)</b> commands are available if Payroll is interfaced with General Ledger.
<b>Maint</b>	GL Period	Enter the amount accumulated since you posted expenses to General Ledger.
	Quarter	Enter the quarter-to-date amount for the line item.
	Year	Enter the year-to-date amount for the line item.

Your changes are saved as you enter them. Use the **Abandon (F5)** command to return to the Department ID field, or the **Exit (F7)** command to return to the File Maintenance menu.

Appending a Line Item

When you press **A** on the command bar, a window appears.

Field	Description
Type	Enter <b>D</b> if the line item is a deduction, <b>E</b> if the line item is an earning, or <b>W</b> if the line item is a withholding.
Withholding Type	<p>This field is active only if you entered W in the Type field.</p> <p>Enter <b>F</b> if the withholding type is federal, <b>S</b> if the withholding type is state, or <b>L</b> if the withholding type is local.</p>
<div>Inquiry</div> State Code	<p>This field is active only if you entered W in the Type field and S or L in the Withholding Type field.</p> <p>Enter the state tax authority ID for the line item.</p>
<div>Inquiry</div> Local Code	<p>This field is active only if you entered W in the Type field and L in the Withholding Type field.</p> <p>Enter the local tax authority ID for the line item.</p>
<div>Inquiry</div> Code	<p>If you entered D in the Type field, enter the deduction code for the line item.</p> <p>If you entered E in the Type field, enter the earning code for the line item.</p>

	Field	Description
		If you entered W in the Type field, enter the withholding code for the line item.
<b>Inquiry</b>	GL Account	Enter the general ledger account number associated with the line item. The <b>Maintenance (F6)</b> and <b>Inquiry (F2)</b> commands are available if Payroll is interfaced with General Ledger.
<b>Maint</b>		
	GL Period	Enter the amount accumulated since you posted expenses to General Ledger.
	Quarter	Enter the quarter-to-date amount for the line item.
	Year	Enter the year-to-date amount for the line item.

When you save your entries, the prompt returns to the Line Item Scroll Region.

---

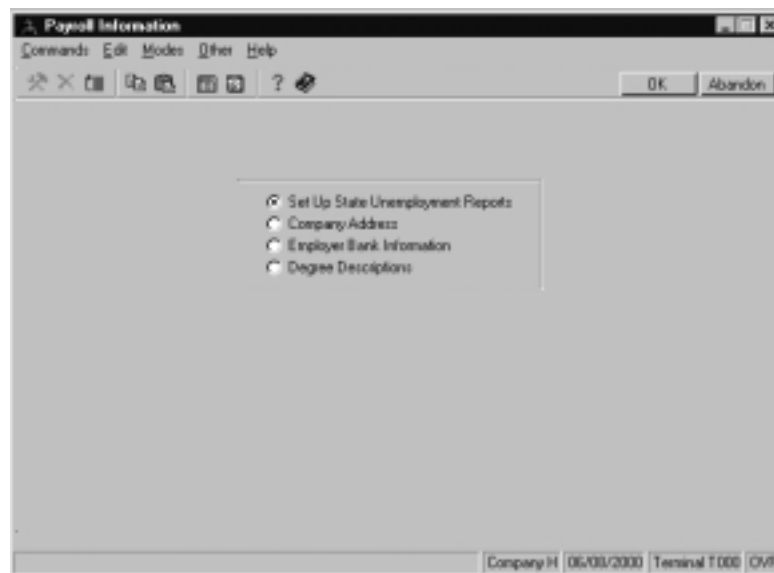

## Payroll Information

---

Use the Payroll Information function to set up and maintain state unemployment reports, company address information for use in report headers, employer bank information, and degree descriptions for use in employee personnel information records. Changes you make here update the PAINxxx (Payroll Information) file.

### Payroll Information Screen

Select **Payroll Information** from the File Maintenance menu. The function screen appears.

Select the type of the information you want to work with. You can set up or maintain the state unemployment report formats, the company name and address to use in report headings, your employer bank information, or the degree descriptions for use in employee personnel information records.

## Set Up State Unemployment Reports Screen

Use the Set Up State Unemployment Reports screen to define customized Quarterly State Unemployment Reports.

Field	Description
<b>Inquiry</b>	State  Enter the code for the state tax authority. This code is verified against the PACO (Codes) file. You can enter report formats for as many states as you need.
Self-Adjusting SUI Month	State unemployment insurance (SUI) withholdings are calculated on a yearly basis. Most states that change the SUI rate during the year require that the next check run self-adjust for the entire year, based on the new percentage. Some states require that you adjust the SUI withholdings only back to the month that the rate changed.  Enter the number of the month that the change takes effect. The SUI withholding amount will be calculated with the new rate from this month forward, but the limit will still be calculated from the beginning of the year.

---

Field	Description
Print Employees with Zero Earnings?	If you want to exclude employees with no pay from the State Unemployment Report, check the box (or enter <b>Y</b> in text mode); if not, uncheck the box (or enter <b>N</b> in text mode).
Sort Report By:	Select the order in which you want to print the report. You can organize the report by employee last name or by employee social security number.

### Arranging the Report

The Quarterly State Unemployment Report has seven columns. To indicate the order of the columns, enter a number from **1** through **7** in each of the fields. If you do not want the column to be in the report, enter **0**.

Social Security No	employee's social security number
Name	employee's name
Total QTD Wages	total SUI wages paid to the employee for the quarter
Excess QTD Wages	quarter-to-date wages minus the limit for SUI wages for the state
Taxable QTD Wages	total SUI wages paid for the quarter, up to the state's SUI limit
Weeks Worked	number of weeks the employee worked, which is taken from the number of quarter-to-date weeks worked in the PAEHxxx (Employee History) file
Hours Worked	number of hours the employee worked, which is taken from the number of quarter-to-date hours worked in the PAEHxxx (Employee History) file

When you save your entries, the cursor returns to the State field. Enter the code for the next state you want to work with, or use the **Exit (F7)** command to return to the Payroll Information menu.

---

## Company Address Screen

Use the Company Address screen to define the company address as you want it to appear in reports.

Payroll Information

Commands Edit Modes Other Help

Company Address

Buildings Supply

Addr 1 1151 Valley Park Dr

Addr 2 Suite 105

Addr 3

City Shakopee St MN Zip 55379

Company H 06/04/2008 Terminal T000 QVR

1. Enter the company address as you want it to appear in reports.

**Inquiry**

2. Enter the city, state, and zip code your company is in. The **Inquiry (F2)** command is available in the state field.

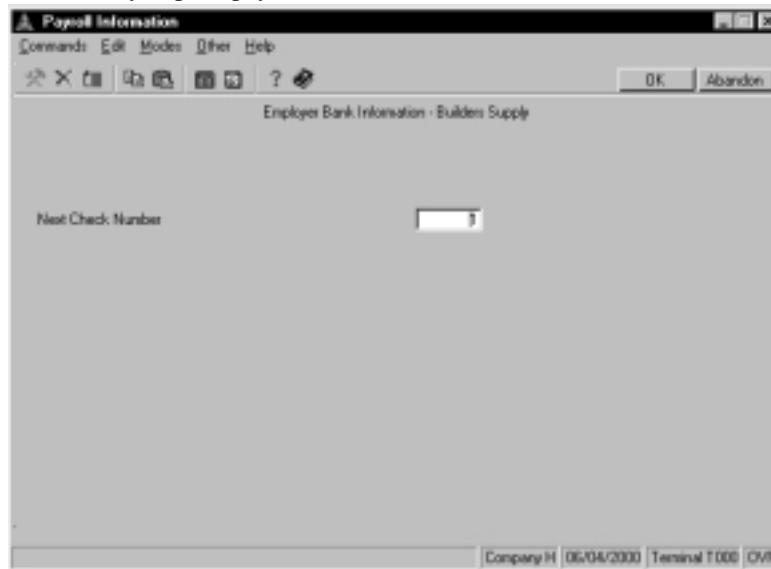

When you save your entries, the Payroll Information menu appears.

---

## Employer Bank Information Screen

Use the Employer Bank Information screen to set up the next check number to be used when you print payroll checks.

**Inquiry**

1. Enter the number you want to use for the next check you print.

When you save your entry, the Payroll Information menu appears.

---

## Degree Descriptions Screen

Use the Degree Descriptions screen to set up degree codes and their descriptions for use on the first Personnel Information screen in the Employees function. Degree codes identify various educational degrees: a high school diploma, a B.A., and so on.

The screenshot shows a window titled "Payroll Information" with a menu bar (Commands, Edit, Modes, Other, Help) and a toolbar. The main area is titled "Degree Descriptions" and contains two input fields: "Degree" and "Description". The "Degree" field has a small icon to its right. At the bottom of the window, there is a status bar showing "Company H", "06/04/2008", "Terminal T000", and "0VR".

**Inquiry**

1. Enter the degree code you want to add, change, or delete.
2. Enter a description of the degree code.

When you save your entries, the cursor returns to the Degree field. Enter the next degree you want to work with, or use the **Exit (F7)** command to return to the Payroll Information menu.

## Recurring Entries

Use the Recurring Entries function to set up or change recurring time tickets for an employee.

## Recurring Entries Screen

Select **Recurring Entries** from the File Maintenance menu. The function screen appears.

**Processing Entries**

**Inquiry**

Maint

- Inquiry**

**Maint**

  1. Enter the employee's ID. The employee's name, department, cutoff date, class, and pay rate appear.

If you use the **Maintenance (F6)** command, the Employees function is temporarily called up.

2. Use the commands on the command bar to perform the function you want.

- Enter = edit, Add trans, Employee, First, Last, Next, Prev, Totals**

---

To edit a displayed recurring entry, move the cursor to the line you want to edit and press **Enter**. Then see **Editing a Recurring Entry** below.

To add a recurring entry, press **A**. Then see **Adding a Recurring Entry** below.

To enter a recurring entry for a different employee, press **E**. Then enter the employee ID.

To look at the first employee record on file, press **F**.

To look at the last employee record on file, press **L**.

To look at the next employee record on file, press **N**.

To look at the previous employee record on file, press **P**.

To look at transaction totals for the employee, press **T**. Then see **Viewing Transaction Totals** later in this section.

Editing a Recurring Entry

When you press **Enter** on the Recurring Entries screen for a recurring entry, the Edit Recurring Entries window appears.

	Field	Description
<div><div>Inquiry</div><div>Maint</div></div>	Tax Group	Press <b>Enter</b> to accept the displayed tax group, or enter a different tax group ID.
<div><div>Inquiry</div></div>	Dept	Press <b>Enter</b> to accept the displayed department ID, or enter a different department ID. The department name is displayed.
<div><div>Inquiry</div><div>Maint</div></div>	Job	If Payroll is interfaced with Job Cost, press <b>Enter</b> to accept the displayed job ID, or enter a different job ID.
<div><div>Inquiry</div><div>Maint</div></div>	Phase	If Payroll is interfaced with Job Cost, press <b>Enter</b> to accept the displayed phase ID, or enter a different phase ID.
<div><div>Inquiry</div><div>Maint</div></div>	Cost Code	If Payroll is interfaced with Job Cost, press <b>Enter</b> to accept the displayed cost code, or enter a different cost code.

Field	Description
<div data-bbox="315 541 456 590">Inquiry</div> <div data-bbox="315 590 456 638">Maint</div>	Class Press <b>Enter</b> to accept the employee's displayed labor class, or enter a different labor class.
Seq No	If you want to produce multiple paychecks for the employee, enter the recurring entries for the first paycheck under sequence number 0. Then enter the recurring entries for the second paycheck under sequence number 1, and so on.
Note	Enter a description of the entry.
Run Code	Press <b>Enter</b> to accept the displayed run code, or enter a different run code.
Cutoff Date	Press <b>Enter</b> to accept the displayed cutoff date, or enter a different cutoff date.
<div data-bbox="315 1024 456 1073">Inquiry</div> <div data-bbox="315 1073 456 1121">Maint</div>	Earn Code/Deduction If you are entering a recurring time ticket, press <b>Enter</b> to accept the employee's displayed earning code, or enter a different earning code.  If you are entering a recurring deduction, enter the deduction code.
Hours	Press <b>Enter</b> to accept the displayed number of hours the employee worked or that the deduction is based on, or enter a different number of hours.
Rate	If you are entering a recurring time ticket, press <b>Enter</b> to accept the employee's displayed pay rate, or enter a different pay rate.
Amount	If you are entering a recurring time ticket, the amount of the time ticket is displayed. If you change this figure, the rate is recalculated and displayed.  If you are entering a recurring deduction, enter the amount of the deduction.

Field	Description
Pieces	If you are entering a recurring time ticket and the employee did piece work, the number of pieces the employee produced is displayed. Press <b>Enter</b> to accept it, or enter a different number.

To save your entries and exit to the Recurring Entries screen, use the **Proceed (OK)** command.

Adding a Recurring Entry

When you press **A** on the Recurring Entries screen, the Enter Recurring Entries window appears.

Field	Description
<div><div>Inquiry</div><div>Maint</div></div> Employee ID	Press <b>Enter</b> to accept the employee ID displayed, or enter a different employee ID for the recurring time ticket. The employee name appears.

	Field	Description
<div>Inquiry</div> <div>Maint</div>	Tax Group	Accept or enter the employee's tax group code.
	Run Code	Accept or enter the run code for the recurring time ticket. The system uses this field to determine which groups of recurring entries to copy when you use the Copy Recurring Entries function. You can set up run codes for different groups of employees for whom you want to copy recurring time tickets, such as seasonal or part-time employees.
	Cutoff	Accept or enter the cutoff date for the recurring time ticket. This date determines which recurring time tickets are copied when you use the Copy Recurring Entries function.
<div>Inquiry</div>	Dept	Accept or enter the employee's department ID. The department name appears.
<div>Inquiry</div> <div>Maint</div>	Job	If Payroll is interfaced with Job Cost, accept or enter the job ID.
	Phase	If Payroll is interfaced with Job Cost, accept or enter the phase ID.
<div>Inquiry</div> <div>Maint</div>	Cost Code	If Payroll is interfaced with Job Cost, accept or enter the cost code.
	Class	Accept or enter the employee's labor class code.
<div>Inquiry</div> <div>Maint</div>	Sequence No	If you want to produce multiple paychecks for the employee, accept or enter the recurring entries for the first paycheck under sequence number 0. Then enter the recurring entries for the second paycheck under sequence number 1, and so on.

---

	Field	Description
	Pieces	If the employee does piece work, accept or enter the number of pieces he or she produced.
	Salary/Rate	The default information is displayed. You can change the salary and rate for hourly employees, but not for salaried employees.
<b>Inquiry</b>	Earn Code	Accept or enter the employee's earning code.
<b>Maint</b>	Note	Accept the description of the displayed earning code.
	Hours	Accept or enter the number of hours the employee worked.
	Rate	If the employee is hourly, enter the pay rate. If the employee is salaried, accept the displayed rate.
	Amount	Accept the amount paid for the time ticket. If you change the calculated amount, the rate is recalculated.
<b>Inquiry</b>	Deduction	Accept the code for the deduction.
	Note	If you want, enter a note about the deduction.
	Hours	Enter the number of hours associated with the deduction.
	Amount	Enter the amount to be deducted.

After you save the information, enter another recurring time ticket or use the **Exit (F7)** command to the Recurring Entries screen.

## Viewing Transaction Totals

When you press **T** on the Recurring Entries screen, the Employee Transaction Totals window appears.

[illegible]

The posted, unposted, and total hours and pay are displayed for each earning code assigned to the employee. If there are more earning codes than fit on one screen, you can scroll up and down to view additional earning codes.

Deductions, reported tips, and pieces are displayed at the bottom of the screen.

When you are finished viewing employee transaction totals, press any key to return to the Recurring Entries screen.

When you are finished with the recurring entries for this employee, press **E** and enter another employee ID to add recurring entries for, or use the **Exit (F7)** command to return to the File Maintenance menu.

---

## Tables

---

Use the Tables function to set up and maintain the Payroll system tables.

Tables store information about the system, data, options, and default settings for other applications.

The following tables are related to Payroll:

- ADJMNxxx
- FREQxxx
- GLDEPxxx
- GLPAYxxx
- MAXVSxxx
- PACTLxxx
- SICccxxx
- TCALCxxx
- USRDDxxx
- USRDFxxx
- VACccxxx

For information about each of these tables, see their individual descriptions in this section.

For information about shareable and unshared tables, (see page 3-13).

---

<b>Note</b>
-------------

The OPTxxx and OP2xxx (Options) tables store options and interfaces settings. Maintain the information stored in this table through Payroll system functions, not through the table itself.

---

---

## Tables Screen

Select **Tables** from the File Maintenance menu. A blank tables screen appears.

1. To add or change a table, enter the table ID. To set up a company-specific table, enter the table ID plus the one- to three-character company ID. To set up a terminal-specific table, enter the table ID plus the four-character terminal ID. To delete the table, use the **Delete (F3)** command.
2. If you entered a new table ID, the Copy From field appears. To copy a company- or terminal-specific table, enter the table ID plus the company ID and terminal ID.

A set of tables comes with the sample company, Builders' Supply. You can copy the sample tables for a company and then change the appropriate fields. To copy a sample table, enter the table ID.

3. Press **Enter** to accept the displayed description of the table, or enter a different description.

The number of columns, the length of the columns, and the type of characters you can enter—alphanumeric (A), numeric with two decimal places (N), numeric with three decimal places (3), or numeric with four decimal places (4)—are displayed.

## ADJMNxxx Table

The ADJMNxxx table stores the earning code that is used when adjusting an employee's pay to meet federal minimum wage standards.

The screenshot shows a software window titled 'PATB' with a menu bar (Commands, Edit, Modes, Other, Help) and a toolbar. Below the toolbar, there are input fields for 'Table ID' (set to 'ADJMN'), 'Description' (set to 'Adjust to Minimum Wage Earning Code'), 'Number of Cols' (set to '1'), 'Column Length' (set to '12'), and 'Type' (set to 'A'). There are 'OK' and 'Abandon' buttons. Below these fields is a table with a header 'Adjusst: Code' and a single column containing the value 'B00'. The bottom status bar shows 'Company H', '06/04/2000', 'Terminal T000', and 'CVR'.

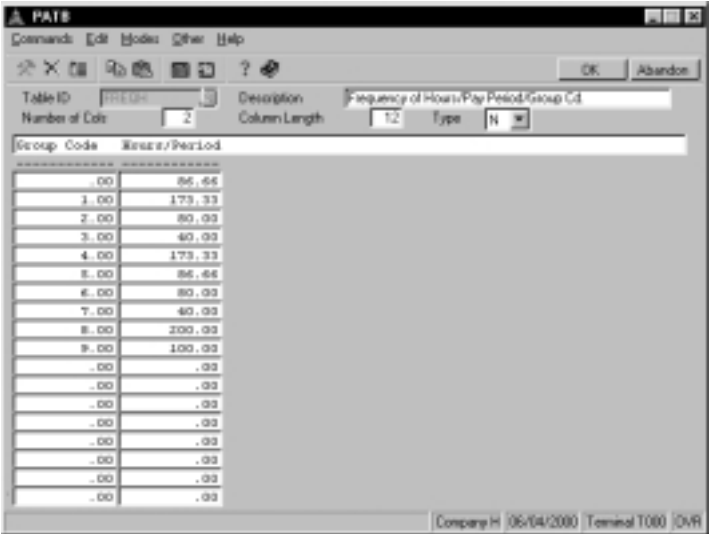

When you enter the table ID, the rest of the ADJMNxxx table appears.

Enter the earning code that will be used to adjust an employee's pay to meet federal minimum wage standards.

FREQxxx Table

The FREQxxx table stores the number of hours in a pay period for each group code for salaried employees.

When you enter the table ID, the rest of the FREQxxx table appears.

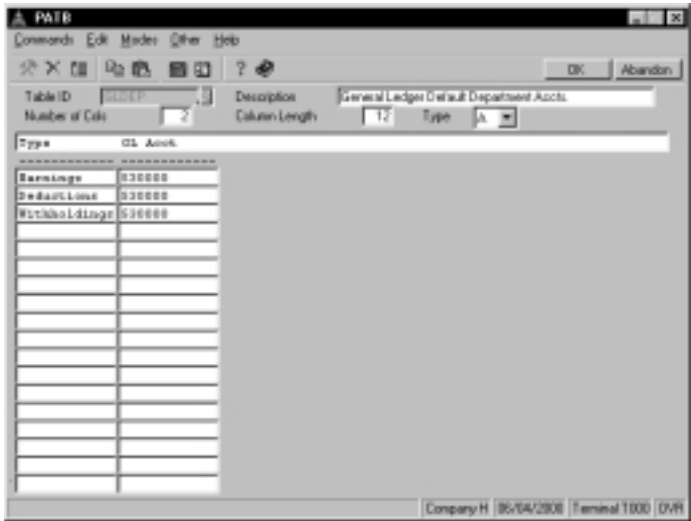

Field	Description
Group Code	Valid group codes are 0 through 9.  Do not change, delete, or rearrange the codes. The system looks for the codes by their position in the table; it assumes that group code 0 is on the first line, group code 1 is on the second line, and so on.
Hours/Period	For each group code, enter the number of hours that are in a pay period.

GLDEPxxx Table

The GLDEPxxx table stores the default general ledger accounts for earnings and employer-paid deductions and withholdings used when new expenses for a department are added by posting transactions or checks. If you post new transactions or checks to the PADPxxx (Department) file that do not have a specified GL account, they are posted to the default GL account, which you can edit, in the Departments function.

If Payroll is not interfaced with General Ledger, you must still build this table because the account numbers appear in the posting report.

When you enter the table ID, the rest of the GLDEPxxx table appears.

Field	Description
Type	The three types of accounts are displayed.  Do not change, delete, or rearrange the types. The system looks for the types by their position in the table; it assumes that Earnings is on the first line, Deductions is on the second line, and Withholdings is on the third line.
GL Acct	Enter the default general ledger account for each type.

## GLPAYxxx Table

The GLPAYxxx table stores the general ledger cash and advance EIC account numbers used by Payroll. It is used when checks are posted to the GLJRXxx (Journal) file.

If Payroll is not interfaced with General Ledger, you must still build this table because the account numbers appear in the posting report.

If Payroll is interfaced with Bank Reconciliation, however, the Cash account is assigned from the bank account in Bank Reconciliation.

When you enter the table ID, the rest of the GLPAYxxx table appears.

### Field

### Description

Description

Enter a description for the accounts that cash disbursed and advance EIC payments made, or press **Enter** to use the description that is displayed.

GL Number

Enter the numbers of the accounts you use for these purposes.

## MAXVSxxx Table

The MAXVSxxx table stores the maximum number of hours an employee can accrue for vacation or sick hours remaining.

You must set up a MAXVSxxx table for each company that uses the table.

When you enter the table ID, the rest of the MAXVSxxx table appears.

[illegible]

Field	Description
Accrual Type	<p>Enter the accrual type, either vacation or sick.</p> <p>Do not change the order of the rows in the table. The system expects vacation to be first and sick to be second.</p>
Max Hours	<p>Enter the maximum number of hours an employee can accrue for remaining vacation and sick time. Hours accrue until this number is reached; then no more can be accrued until the employee uses some vacation and sick time. If you set this field to zero, an employee can accrue vacation or sick hours indefinitely.</p>

---

## PACTLxxx Table

The PACTLxxx table stores the current quarter, payroll number, and current year.

When you enter the table ID, the rest of the PACTLxxx table appears.

Description	Value
CURRENT QTR	4
PAYROLL #	43
CURRENT YEAR	2000

Field	Description
Description	The descriptions of the information you can enter in the table are displayed.  Do not delete lines or rearrange the descriptions. The system looks for the descriptions by their position in the table; it assumes that the current quarter is on the first line, the payroll number is on the second line, and the current year is on the third line.
Value	On the first line, enter the number of the current quarter. This value is updated when you do quarter- or year-end maintenance.

---

**Field****Description**

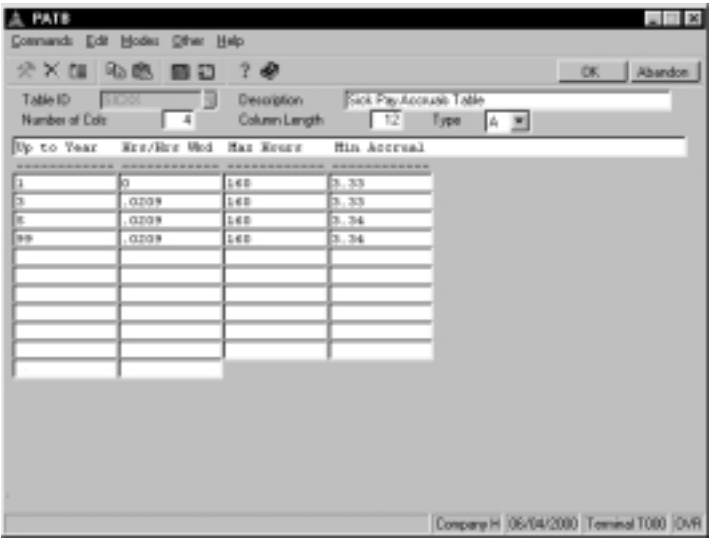

On the second line, enter the payroll number. This value is updated when you post checks and is reset to 1 when you do year-end maintenance.

On the third line, enter the current calendar year. This value is updated when you do year-end maintenance.

SICccxxx Table

The SICccxxx table (cc represents the sick code abbreviation) is used to calculate the accrual rate of sick days for employees, based on the number of years worked. If no time ticket hours are entered or manual checks are issued, salaried employees accrue the minimum number of sick and vacation days. Salaried employees' sick hours are assigned from their group code in the FREQxxx table.

When you enter the table ID, the rest of the SICccxxx table appears.

Field	Description
Up to Year	Enter the number of years worked by the employees that the entries affect. For example, enter <b>1</b> for employees with 1 year of employment, <b>3</b> for employees with up to 3 years of employment, and so on.
Hrs/Hrs Wkd	The system multiplies the number in this field by the number of hours worked to calculate the total hours accrued.

---

Field	Description
Max Hours	Enter the maximum number of hours an employee can work to calculate the accrual amounts for each pay period.
Min Accrual	The number in this field is the minimum number of vacation hours an employee can accrue for each pay period. If the number in the Hrs/Hrs Wkd field is less than the number in this field after calculation, the number in this field is used. If the calculation of the accrual amount is less than the minimum accrual, the minimum accrual is used.

## TCALCxxx Table

The TCALCxxx table determines the setting for the time card calculator in the Payroll Transactions function.

When you enter the table ID, the rest of the TCALCxxx table appears.

### Field

### Description

Description

Enter **Week** if you want overtime to be calculated by the week. Enter **Day** if you want overtime to be calculated on a day-by-day basis.

Value

Enter the number of regular hours reached before overtime is automatically calculated.

If overtime is calculated, a message notifies you that overtime has been calculated, and the dollar amount of the overtime is displayed. You should enter the overtime code as the next earning code.

# USRDDxxx Table

The USRDDxxx table holds the user-defined labels that appear on the second Personnel Information screen and the Key Date Report.

When you enter the table ID, the rest of the USRDDxxx table appears.

A screenshot of the PATB software interface. The window title is 'PATB'. The menu bar includes 'Commands', 'Edit', 'Modes', 'Other', and 'Help'. The toolbar contains icons for file operations and a help icon. The main form has fields for 'Table ID' (set to 'USRDD'), 'Description' (set to 'User Defined Dates for Personnel Info'), 'Number of Cds' (set to '1'), 'Column Length' (set to '12'), and 'Type' (set to 'A'). Below these fields is a 'Label' input field. A list of labels is displayed on the left side of the window, including 'License', 'Last Name', 'Person ID', and several 'User Date' entries from 04 to 10. The status bar at the bottom shows 'Company H', '06/04/2000', 'Terminal T000', and 'OVR'.

Enter up to ten date labels.

---

## USRDFxxx Table

The USRDFxxx table holds the user-defined labels that appear on the Employees General Information screen and the first Personnel Information screen.

When you enter the table ID, the rest of the USRDFxxx table appears.

The screenshot shows a window titled "PAFB" with a menu bar (Commands, Edit, Modes, Other, Help) and a toolbar. Below the toolbar, there are fields for "Table ID" (set to "USRDF"), "Description" (set to "User Defined Fields for Emp. Screen"), "Number of Cols" (set to "1"), "Column Length" (set to "12"), and "Type" (set to "A"). There are "OK" and "Abandon" buttons. Below these fields, a list of labels is displayed, including "User Def Fld", "Ins. Coverage", "User Label 2", "User Label 3", "Comments 1", "Comments 2", and "Comments 3". The list is scrollable, and the first three labels are highlighted. The status bar at the bottom indicates "Company H 06/04/2000 Terminal T000 048".

Six entries are displayed.

The first three appear on the Employees General Information screen. Enter the labels you want to appear on the screen.

The last three appear on the first Personnel Information screen. Enter the labels you want to appear on the screen.

VACccxxx Table

The VACccxxx (cc represents the vacation code abbreviation) table is used to calculate the accrual rate per pay period of vacation time for employees based on the number of years worked.

When you enter the table ID, the rest of the VACccxxx table appears.

Up to Year	Hrs/Hrs Wkd	Max Hours	Min Accrual
1	.0417	168	6.67
3	.0626	168	10.016
5	.0834	168	13.336
99	.0834	999	13.336

Field	Description
Up to Year	Enter the number of years worked by the employees that the entries affect. For example, enter 1 for employees with 1 year of employment, 3 for employees with up to 3 years of employment, and so on.
Hrs/Hrs Wkd	The system multiplies the number in this field by the number of hours worked to calculate the total hours accrued.
Max Hours	Enter the maximum number of hours an employee can work to calculate the accrual amounts for each pay period.

---

Field	Description
Min Accrual	The number in this field is the minimum number of vacation hours an employee can accrue for each pay period. If the number in the Hrs/Hrs Wkd field is less than the number in this field after calculation, the number in this field is used. If the calculation of the accrual amount is less than the minimum accrual, the minimum accrual is used.

---

## Tax Tables

---

Use the Tax Tables function to set up and maintain the Payroll system tax tables. The tax tables are used to calculate state, federal, and local tax withholding and are stored in the PATX (Tax Tables) file. Tax tables are preset in the system.

Because the tax tables vary, depending on the state(s) the company's employees live and work in, the tables are not dealt with in detail in this manual.

### Federal Tax Tables

The following federal tax tables are used in the Payroll system:

- The EIC table stores the percentages that are used to calculate the advance earned income credits for eligible employees.
- The FEDM and FEDS tables store the earnings base, tax base, and percentage figures that are used to calculate federal tax.
- The FICA table stores the percentage and maximum earnings limit for employee and employer FICA calculations and the current federal minimum wage. It also stores the DCB limit.
- The FUTAxXX table stores percentage and maximum earnings limit for the employer FUTA calculations.
- The W2CODE table stores the code and the first four characters of the description of the deferred compensation deductions to be printed in box 13 on employees' W-2 forms.
- The W2CODE2 table stores the first four characters of the deductions to be printed in box 14 on employees' W-2 forms.

### State Tax Tables

The following state tax tables are used in the Payroll system:

- 
- The STXssm tables (*ss* represents the state abbreviation; *m* represents marital status) store the earnings base, tax base, and tax percentages for each state where withholding is required.
  - The SUTssxxx table stores the percentage and earnings limits that are used to calculate employer state unemployment tax.
  - The STSss tables (*ss* represents the state abbreviation) store special fields that appear on the Employees Tax Information screen and are required to calculate state withholding.
  - The SOTss tables (*ss* represents the state abbreviation) are used to calculate other state employee withholdings such as disability insurance.

## Local Tax Tables

- The LTXsslmm table stores the earning base, tax base, earnings limit, and tax percentages for the locality where the withholding is required.

## A Note on Tax Tables

The last entry in the first column of a tax table must be 99999999.99, because the Tables function goes to the next higher entry than the amount it is looking for and then goes back one line.

---

## Formula Maintenance

---

Use the Formula Maintenance function to set up and maintain the formulas needed to calculate deductions and withholdings. (For a detailed explanation of formulas and a list of valid variables, functions, and operations, see appendix C.)

Once a formula has been set up, you can also edit it through the Employees Salary Information (see page 11-3), Deductions (see page 11-17) or Withholdings (see page 11-23) functions. Changes you make here update the PAFMHDR (Formula Definitions) and PAFMLIN (Formula Line Detail) files.

---

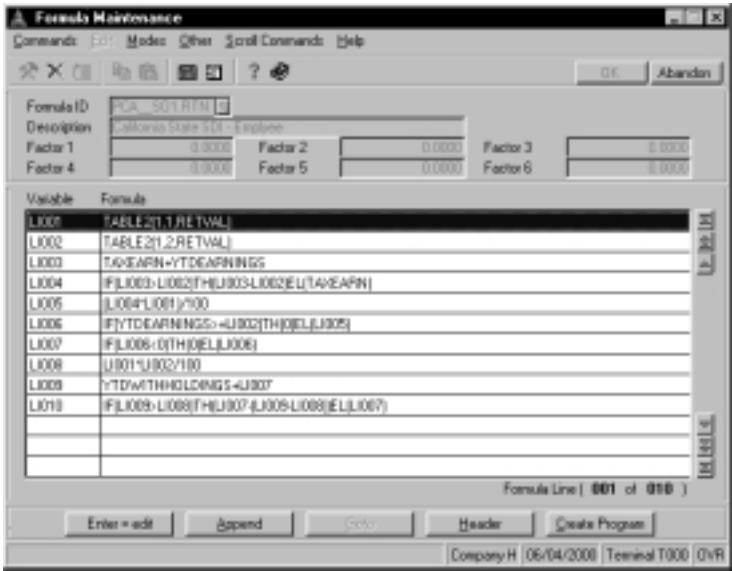

### Note

If you build a formula while you are in the sample data path to test it, the system stores the formula in the program directory, destroying the formula that was created with your live data. If you try to do this, the following warning appears: **Building formula in sample data will erase live formula. Y/N?** Select **Yes** (or enter **Y** in text mode) to replace the existing formula.

---

Formula Maintenance Screen

Select **Formula Maintenance** from the File Maintenance menu. The function screen appears.

Header Region

Field

Description

**Inquiry**

Formula ID

If you are entering the Formula Entry screen through the Employees Salary Information, Deductions, or Withholdings functions, the formula ID is displayed; if not, enter the formula ID.

The .RTN extension is not automatically appended to the formula ID. You should add this extension to the withholding formula names, and you *must* add it to the deduction formula names.

---

Field	Description
	Names for federal formulas should be in this format: PFED_OAS.RTN, where OASDI withholding would be used, for example.
	Names for state formulas should be in this format: PMN_ _SUI.RTN, where <i>MN</i> would be the state and <i>SUI</i> would be Employer State Unemployment Insurance, for example.
	Names for local formulas should be in this format: PMNyyLWH.RTN, where <i>MN</i> would be the state and <i>yy</i> would be the local code.
Copy From	This field appears if you entered a new formula ID. Enter the ID of the formula you want to copy information from, or press <b>Enter</b> to skip this field.
Description	Enter a description of the formula.
Factors 1–6	Formula factors are variables used to change the base rate in a formula without changing the actual formula. Each formula can have six factors.  Enter up to six formula factors.

When you save your entries, the cursor moves to the scroll region.

## Command Bar

### **Enter = edit, Append, Header, Goto, Create program**

To edit a line, press **Enter**. To add a line, press **A**. Then see **Editing or Adding a Line** below.

To return to the header region of the screen, press **H**.

To go to a particular line, press **G** and then enter the formula line number. (This command appears only if there is more than one screen of items.)

When you are done entering or editing a formula, press **C** to convert the formula to a program.

Use the **Create Program** command anytime you enter or edit a formula. If you do not use the **Create Program** command before exiting from the Formula Maintenance function, the system automatically executes the command when you use the **Exit (F7)** command to return to the File Maintenance menu. If you use the **Abandon (F5)** command to return to the header region of the screen, your changes are not saved and the formula is not compiled into a program.

### Editing or Adding a Line

When you press **Enter** or **A** on the command bar, the following window appears:

Each line in a formula can be 100 characters long. You enter the line in two “segments”. When you press **Enter** to leave the Line Entry window, the two lines join to form one longer line, only the first 50 characters of which are displayed on the Formula Maintenance screen. To delete one line at a time, use the **Delete (F3)** command.

See appendix C for a detailed explanation of how formulas work and for a list of valid variables, functions, and operations.

When you are finished entering or editing a formula, use the **Exit (F7)** command to save your changes (and create a program) and return to the File Maintenance menu.

## Features

To produce a list of fields changed, use the Print Log feature. A sample of the log appears on page 10-97.

The screen contains 3 sections. The top, or *Header*, section, which includes the Field ID and Print Log? fields, is where you select the code or ID to change, and whether or not you want to produce the printed log. The lower left, or *Values*, section is where you will build a list of the values you want to change by specifying the old value and the new value. The lower right, or *Files*, section contains a list of the files that will be changed in the applications you have installed on your system.

## Field Definitions—Header

Field Name	Description
<b>Inquiry</b> Field ID	Enter the Field ID you want to change. You can change only Payroll fields from the Payroll menu. To change IDs and codes from other applications, run the Change Fields function in the respective application.
Print Log?	Select the Print Log field to print a list of the files that are changed.

After you enter the field ID and indicate your preference for printing the log, use the **Proceed (OK)** command to begin entering field values to change.

## Field Definitions—Values

Field Name	Description
Original Value	Enter the current field value that you want to change.
New Value	Enter the new value that you want to use for this field.

## Command Bar

Command	Description
Tab = tag	Press <b>Tab</b> to switch to the Files section of the screen.
Enter = edit	Press <b>Enter</b> to edit the current line.

---

Command	Description
Append	Press <b>A</b> to append another value to change to the list.
Begin code change	Press <b>B</b> to begin the change field process.
Header	Press <b>H</b> to return to the header section to change the selection you made for printing the log.
Goto	Press <b>G</b> to go to a particular entry.
Field ID	Press <b>F</b> to choose a new field ID (this will abandon any field changes you have entered, but not yet made).

Continue entering old values and new values until you have specified all of the values you want to change. If you want to change the files that will be changed, you can use the **Tab** command to jump to that section. If you are satisfied with your selections, press **B** to begin the change process.

## Field Definitions—Files

Field Name	Description
File Description	The files that contain the Field ID you selected appear.
Time	This field gives you an idea of the relative time it will take to change the field in a given file. Files where this code or ID are a part of the key to the file can be changed more quickly than files where each record in the file must be scanned for the code or ID. Each file is rated as <b>Short</b> or <b>Long</b> to denote the estimated time required to change the field.
Tag	This field denotes whether the file will be affected by the copy process. Tag the file to change fields in the file.

---

## Command Bar

Command	Description
Tab = value	Press <b>Tab</b> to return to the Values screen section.
Enter = Tag/Untag	Press <b>Enter</b> to toggle a file as included or excluded from the copy process.
All	Press <b>A</b> to tag all of the files.
None	Press <b>N</b> to untag all of the files.
Begin	Press <b>B</b> to begin the change field function.
Header	Press <b>H</b> to return to the header section to change the selection you made for printing the log.
Goto	Press <b>G</b> to go to a particular entry.
Field ID	Press <b>F</b> to choose a new field ID (this will abandon any field changes you have entered, but not yet made).

When you have tagged the files you want to change, press **B** to begin the change process. When the changes are complete, the log will print if you elected to produce it.

Enter a new field ID to change, or use the **Exit (F7)** command to return to the File Maintenance menu.

## **Codes Maintenance**

---

# **11**

Labor Classes	11-3
Tax Authority Setup	11-5
Earning Codes	11-9
Earning Types	11-13
Deductions	11-17
Withholdings	11-23
Tax Groups	11-27

---

## Labor Classes

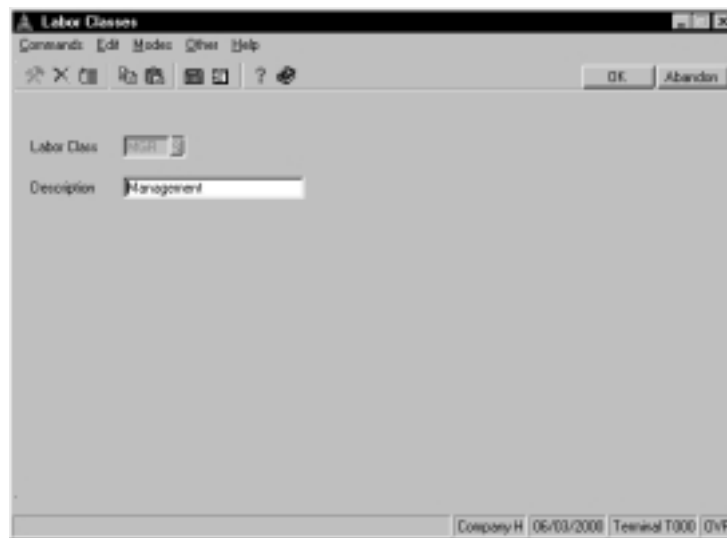

---

Use the Labor Classes function to set up and maintain labor classes. Labor classes can be used to group types of employees. For example, you might set up labor class EXM for executive managers, MIM for mid-level managers, and so on. The classes you set up can be useful for report sorting.

Labor classes are stored in the PALCxxx (Labor Class) file and are used in the Employees function.

### Labor Classes Screen

Select **Labor Classes** from the Codes Maintenance menu. The function screen appears.

#### **Inquiry**

1. Enter the labor class code.
2. Enter a description of the labor class code.

---

When you save the labor class code, the cursor returns to the Labor Class field. Enter another labor class code, or use the **Exit (F7)** command to return to the Codes Maintenance menu.

---

# Tax Authority Setup

---

Use the Tax Authority Setup function to enter and maintain withholding codes for federal, state, and local tax authorities that employees need withholdings for. You can also set up the necessary formula names and tax table IDs associated with each code. Changes you make here update the PACO (Codes) file.

You can enter 15 employee and employer withholding codes for each federal, state, and local tax authority.

## Tax Authority Setup Screen

Select **Tax Authority Setup** from the Codes Maintenance menu. The function screen appears.

The screenshot shows the 'Tax Authority Setup' window. At the top, there's a menu bar with 'Commands', 'Edit', 'Modes', 'Other', 'Scroll Commands', and 'Help'. Below the menu bar is a toolbar with icons for back, forward, and other navigation functions. The main area is divided into several sections. On the left, there are input fields for 'Tax Authority' (set to 'Federal'), 'State Code' (set to 'N/A'), 'Local Code' (set to 'N/A'), and 'Description' (set to 'Federal Withholdings'). Below these fields are two tables. The first table is titled 'Employee Withholding Codes' and has columns for 'No.', 'Code', 'Formula', and 'Table ID'. It contains four rows of data: 1. PWH, PFED\_PWH.RTN, FEDIN; 2. GAS, PFED\_GAS.RTN, FICA; 3. MED, PFED\_MED.RTN, FICA; 4. SIC, PFED\_SIC.RTN, SIC. The second table is titled 'Employer Contribution Codes' and has columns for 'No.', 'Code', 'Formula', and 'Table ID'. It contains three rows of data: 1. EDA, PFED\_EDA.RTN, FICA; 2. EME, PFED\_EME.RTN, FICA; 3. PUT, PFED\_PUT.RTN, PUTA. At the bottom of the window, there are buttons for 'Tab=switch to employer withholdings', 'Enter=edit', 'Append', and 'Quit'. The status bar at the very bottom shows 'Company H', '05/03/2008', 'Terminal T000', and '0xR'.

No.	Code	Formula	Table ID
1	PWH	PFED_PWH.RTN	FEDIN
2	GAS	PFED_GAS.RTN	FICA
3	MED	PFED_MED.RTN	FICA
4	SIC	PFED_SIC.RTN	SIC

No.	Code	Formula	Table ID
1	EDA	PFED_EDA.RTN	FICA
2	EME	PFED_EME.RTN	FICA
3	PUT	PFED_PUT.RTN	PUTA

---

Field	Description
Tax Authority	Enter <b>F</b> to work with federal tax authority codes, <b>S</b> to work with state tax authority codes, or <b>L</b> to work with local tax authority codes.
<b>Inquiry</b> State Code	This field is active only when you are working with state or local tax authorities.  Enter the state code you want to set up or adjust.
<b>Inquiry</b> Local Code	This field is active only when you are working with local tax authorities.  Enter the local code you want to set up or adjust.
Description	Enter a description of the tax authority. For example, if you are working with a federal tax authority, enter the name of the withholding.

To move to the scroll region, use the **Proceed (OK)** command.

## Command Bar

### Tab, Enter = edit, Append, Goto

To move the prompt between the Employee and Employer Withholding Codes portions of the screen, press the **Tab** key.

To edit a line item, press **Enter**. To add a line item, press **A**. Then see **Adding or Editing a Line Item** below.

To go to a particular line item, press **G** and then enter the line item number, or use the **Inquiry (F2)** command to select the line item number. (This command appears only if there is more than one screen of items.)

---

### Adding or Editing a Line Item

You can add or edit 15 tax authority withholding codes for both employees and employers.

Field	Description
Number Code	<p>The line number of the withholding code is displayed.</p> <p>Enter the code for the withholding tax. FWH, SWH, and LWH must be the first employee withholdings.</p>
Formula	<p>Enter the name of the formula that will be used when calculating the withholding. You must add the extension <b>.RTN</b> to the formula name so that the system will not overwrite part of itself.</p>
Table ID	<p>Enter the ID of the tax table that will be used when calculating the withholding. If you are working with FWH, SWH, or LWH, these withholdings usually depend on marital status. They can be overridden from the Employees Tax Information screen (page 10-16).</p> <p>If the table must be company-specific (for example, FUTA and SUI), the last character of the table ID must be a lowercase <i>x</i>. To accommodate the full three-character company ID, you must limit the table ID to five characters.</p> <p>If the system cannot locate the company-specific table, the generic table is the default.</p>

Your work is automatically saved as you enter it. When you are finished, use the **Abandon (F5)** command to return to the Tax Authority field, or use the **Exit (F7)** command to return to the Codes Maintenance menu.

---

## Earning Codes

---

An earning code stores pay rate information, the GL account number, the earning type, and other information for a particular kind of work. If you enter an earning code and the number of hours the employee worked when you enter time tickets or manual checks, the system calculates the employee's pay, based on the information you enter here. You can have an unlimited number of earning codes. Changes you make here update the PAECxxx (Earning Codes) file.

You can set up earning codes for types of work (for example, for assembly and packaging) and for overtime and double-time work that automatically multiplies or adds amounts to the base pay.

Earning Codes Screen

Select **Earning Codes** from the Codes Maintenance menu. The function screen appears.

	Field	Description
<div>Inquiry</div>	Earning Code	Enter the earning code.
	Description	Enter a description of the earning code. The description you enter here will appear when you enter or edit time tickets.
	Include in Net Pay	<p>If the pay should be included in the employee’s paycheck, check the box (or enter <b>Y</b> in text mode); if not, uncheck the box (or enter <b>N</b> in text mode).</p> <p>Including or excluding the pay from net pay does not affect taxable income. To exclude an earning code from taxable income, use the exclusion switches in your federal, state, and local withholding records.</p>

Field	Description
Fixed Withholding	<p>If you use a fixed percentage for all withholding (specified in the federal, state, and local withholding formulas), check the box (or enter <b>Y</b> in text mode); if not, uncheck the box (or enter <b>N</b> in text mode).</p> <p>If you do not use a fixed percentage, withholding is calculated according to the regular federal, state, and local tax routines.</p>
<div data-bbox="264 793 410 840" data-label="Text"> <div>Inquiry</div> </div> Earning Type	<p>Enter an earning type for the earning code. Each earning code must be assigned an earning type. (For more information, see page 11-14).</p> <p>An earning code of type <i>T</i> has special meaning (<i>Tips</i>) to the system. Tip amounts are accumulated in the FICA Tips field for government reporting.</p> <p>An earning code of type <i>F</i> also has special meaning (<i>Fringe</i>) to the system. Any earning code of type <i>F</i> that an employee receives throughout the year is accumulated and printed as <i>fringe</i> on an employee's W-2 form.</p> <p>Earning codes of type <i>V</i> or <i>S</i> are used to determine the amount of vacation and sick time taken throughout the year.</p> <p>Any earning codes that use a user-defined type are treated as regular pay, using the Multiplier and Add to Base fields to determine pay.</p>
<div data-bbox="264 1335 410 1381" data-label="Text"> <div>Inquiry</div> </div> <div data-bbox="264 1381 410 1428" data-label="Text"> <div>Maint</div> </div> GL Account	<p>Enter the number of the general ledger account the earning code is posted to. The <b>Maintenance (F6)</b> and <b>Inquiry (F2)</b> commands are available if Payroll is interfaced with General Ledger.</p> <p>The GL account is debited when you post checks for the earning code you selected. That account is credited in the department when you post expense to GL.</p>

---

Field	Description
Multiplier	<p>The number you enter in this field will be multiplied with the employee's base hourly pay rate. For example, you enter an earning code with a multiplier of 1.2500. Then you enter a time ticket for an employee whose base hourly pay rate is \$10 per hour and you use the aforementioned earning code. The employee's pay rate will be \$12.50 per hour.</p> <p>You must enter a value in this field. If you do not want the multiplier to modify the employee's base hourly pay, enter <b>1</b>.</p>
Add to Base	<p>The number you enter in this field will be added to the employee's base hourly pay rate. For example, you enter an earning code with an Add to Base factor of 0000.50. Then you enter a time ticket for an employee whose base hourly pay rate is \$10 per hour and you use the aforementioned earning code. The employee's pay rate will be \$10.50 per hour.</p> <p>If both a Multiplier and an Add to Base factor exist for the earning code, the Add to Base factor is added to the employee's base pay rate first. This new base pay rate is then multiplied.</p>

After you approve the entries, enter another earning code, or use the **Exit (F7)** command to return to the Codes Maintenance menu.

---

## Earning Types

---

Use the Earning Types function to create groups of earning codes. The Payroll system has nine preset earning types:

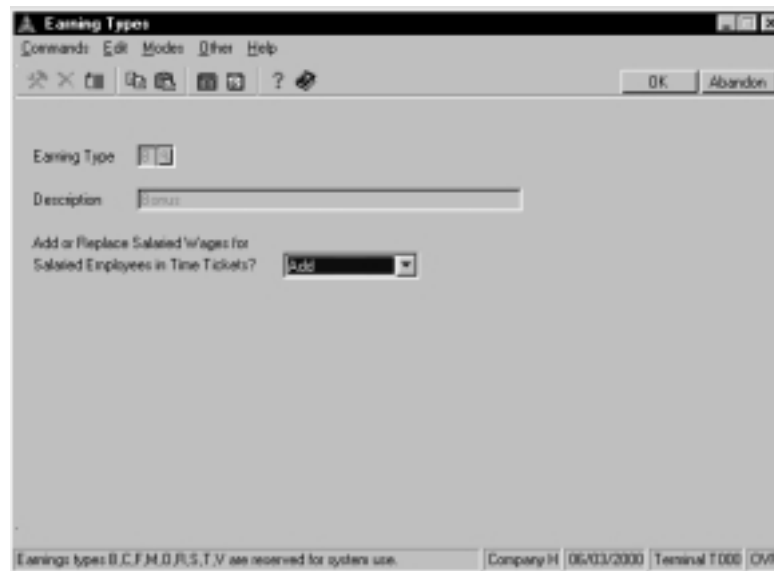

- Bonus
- Commission
- Fringe
- Miscellaneous
- Overtime
- Regular Earnings
- Sick
- Tips Reported as Federal Earnings
- Vacation

You cannot change or delete the preset earning types, but you can set up additional earning types. When you set up earning codes (see page 11-9), you specify which earning type the code belongs to. For example, you might have four kinds of bonus pay. You set up each kind of bonus pay as an earning code and group them all under one earning type. Changes you make here update the PAETxxx (Earnings Types) file.

---

## Earning Types Screen

Select **Earning Types** from the Codes Maintenance menu. The function screen appears.

**Inquiry**

1. Enter the ID of the earning type you want to add or change.

Earning type *T* has special meaning (*Tips*) to the system. Tip amounts are accumulated in the FICA Tips field for government reporting.

Earning type *F* also has special meaning to the system. Any earning types *F* that an employee receives through the year are accumulated and printed as *fringe* on an employee's W-2 form.

Earning types *V* and *S* are used to determine the amount of vacation and sick time taken throughout the year.

Any other earning types that use a user-defined type are treated as regular pay, using the Multiplier and Add to Base fields to determine pay.

- 
2. Enter a description of the earning type.
  3. To add or replace this earning type for salaried employees' wages, press **A** or **R**.

When you save the earning type, the cursor returns to the Earning Type field. Enter the next earning type you want to work with, or use the **Exit (F7)** command to return to the Codes Maintenance menu.

---

## Deductions

---

Use the Deductions function to set up, change, or delete deductions from the Payroll system. Deductions are assigned codes, which can then be referenced when you set up employees in the Employees function. You can set up 999 deduction codes. Changes you make here update the PADDxxx (Deductions) and PADXxxx (Deduction Exclusion) files.

### Deductions Screen

Select **Deductions** from the Codes Maintenance menu. The function screen appears.

The screenshot shows the 'Deductions' window with a menu bar (Commands, Edit, Modes, Other, Scroll Commands, Help) and buttons (OK, Abandon). The main area is titled 'Deduction Codes' and contains a table with the following columns: No, Description, Engr?, Liability Acct, Acct Ded Acct, Def Comp, and Calc On. The table lists 11 deduction codes, with the first one being 'Medical Ins' with a liability account of 525000 and calculated on 'Gross Pay'. Below the table, it says 'Deduction ( 001 of 011 )'. At the bottom, there are buttons for 'Enter = edit', 'Append', 'Goto', 'Formula', 'Exclude Earnings', and 'Copy Deduct'. The status bar at the very bottom shows 'Company H', '06/03/2000', 'Terminal T000', and 'CVR1'.

No	Description	Engr?	Liability Acct	Acct Ded Acct	Def Comp	Calc On
1	Medical Ins	<input checked="" type="checkbox"/>	525000		<input checked="" type="checkbox"/>	Gross Pay
2	Dental Ins	<input type="checkbox"/>	525000		<input type="checkbox"/>	Gross Pay
3	United Way	<input type="checkbox"/>	204000		<input type="checkbox"/>	Gross Pay
4	Credit Union	<input type="checkbox"/>	999900		<input type="checkbox"/>	Gross Pay
5	Dues	<input type="checkbox"/>	999900		<input type="checkbox"/>	Gross Pay
6	401K	<input type="checkbox"/>	205000		<input type="checkbox"/>	Gross Pay
7	Risk Plan	<input type="checkbox"/>	200000		<input type="checkbox"/>	Gross Pay
8	Parking	<input type="checkbox"/>	801000		<input type="checkbox"/>	Gross Pay
9	Cash Advance	<input type="checkbox"/>	101000		<input type="checkbox"/>	Gross Pay
10	Stock Plan	<input type="checkbox"/>	205000		<input type="checkbox"/>	Gross Pay
11	Uniform	<input type="checkbox"/>	801000		<input type="checkbox"/>	Gross Pay
		<input type="checkbox"/>			<input type="checkbox"/>	
		<input type="checkbox"/>			<input type="checkbox"/>	

### Command Bar

**Enter = edit, Append, Goto, Formula, Exclude earnings, Copy Deduction**

To edit a deduction code, press **Enter**. To add a deduction code, press **A**. Then see **Editing or Adding a Line Item** below.

To go to a particular line item, press **G** and then enter the deduction code, or use the **Inquiry (F2)** command to select the code. (This command appears only if there is more than one screen of items.)

To edit deduction formulas from this screen, press **F**. The Formula Maintenance screen appears. (For information about formulas, see page 10-89, and appendix C.)

To exclude earning codes from deductions, press **E**. Then see **Earnings Exclusions** below.

To copy a deduction, move the prompt to the deduction you want to copy and press **C**. Then see **Copying deductions** below.

## Editing or Adding a Line Item

To edit or add a line item, follow these steps:

1. Enter a description of the deduction.

If you this is a deferred compensation deduction, the first four characters of the description you enter are used as the deferred compensation description on W-2 forms.

If the deduction is for a 401(k) program, you must enter **401K**. If the deduction is for dependent care benefits, you must enter **DCB**.

2. If the deduction is employer-paid, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).

**Inquiry**

**Maint**

3. Enter the number of the liability account the deduction is credited to. The **Maintenance (F6)** and **Inquiry (F2)** commands are available if Payroll is interfaced with General Ledger.

Inquiry

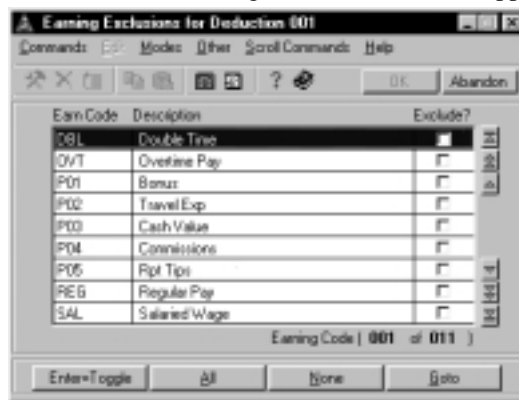

Maint

4. If the deduction is employer-paid, enter the expense account number. The **Maintenance (F6)** and **Inquiry (F2)** commands are available if Payroll is interfaced with General Ledger.
5. If the deduction is deferred compensation or any other pretax deduction that should be reported on employees' W-2 forms, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).
6. Enter **G** if the deduction is calculated on gross pay, or **N** if it is calculated on net pay.

## Earning Exclusions

You can exclude earning codes from a deduction. For example, you might set up a pay deduction for uniforms that applies to workers in a store and then exclude particular earning codes for warehouse workers so that their pay is not deducted for uniforms.

When you press **E** on the Deductions screen to exclude earning codes from deductions, the Earning Exclusions window appears.

### Command Bar

**Enter = toggle, All, None, Goto**

To change the exclusion status of an earning code for the deduction, press **Enter**. The exclusion status alternates between YES and NO.

To exclude all earning codes for the deduction, press **A**.

To exclude no earning codes for the deduction, press **N**.

To go to a particular earning code, press **G** and then enter the earning code, or use the **Inquiry (F2)** command to select the earning code. (This command appears only if there is more than one screen of earning codes.)

Your changes are saved automatically as you enter them. When you are finished with the Earning Exclusions window, use the **Exit (F7)** command to return to the line item scroll region of the Deductions screen.

## Copying Deductions

When you press **C** on the Deductions screen to copy a deduction, the Copy Deduction window appears.

### Field

### Description

#### Inquiry

Employee ID From/  
Thru

Enter the range of employees whose records you want to copy the deduction to.

	Field	Description
	Group Code From/ Thru	Enter the range of group codes you want the deduction to apply to.
<b>Inquiry</b>	Department	Enter the department you want the deduction to apply to. Leave this field blank if you want the deduction to apply to all departments.
	Part-time/Full-time/ Both	Enter <b>P</b> to apply the deduction to part-time employees, <b>F</b> to apply the deduction to full-time employees, or <b>B</b> to apply the deduction to both types of employees.
	Married/Single/Both	Enter <b>M</b> to apply the deduction to married employees, <b>S</b> to apply the deduction to single employees, or <b>B</b> to apply the deduction to both types of employees.
<b>Inquiry</b>	State	Enter the state code you want the deduction to apply to.
	Period Code Flags	Enter the period codes you want the deduction to apply to.
	Dollar/Percent to be copied	Enter the dollar amount or the percentage of the deduction you want to copy.
	Balance	If the deduction has a declining balance, enter the amount.
	Overwrite existing deduction?	If you want to replace any existing deduction information with the same number in your employee files, check the box (or enter <b>Y</b> in text mode). If you want to leave existing deduction information as it is, uncheck the box (or enter <b>N</b> in text mode).

When you have finished entering information for the deduction you want to copy, select the output device.

A sample Copy Deductions log is at the end of this section.

When you are finished entering and editing deductions, use the **Exit (F7)** command to return to the Codes Maintenance menu.

## Copy Deductions Log

# Withholdings

Use the Withholdings function to set up and maintain federal, state, and local withholding tax information for employees. You can exclude particular deductions and earning codes from withholding, and you can maintain formulas from within the Withholdings function. Changes you make here update the PAWIxxx (Withholdings) and PAWXxxx (Withholding Exclusion) files.

## Withholdings Screen

Select **Withholdings** from the Codes Maintenance menu. The function screen appears.

The screenshot shows the 'Withholdings' screen with the following fields and tables:

**Fields:**

- Tax Authority: Federal (dropdown)
- State Code: N/A
- Local Code: N/A
- Withholding Code: 001 (dropdown)
- Description: Earned Income
- Liability Acct: 100000
- Accrued Taxes Acct: (empty)
- Fired Percent: 7.00
- Tax ID: (empty)
- Weeks Worked Limit: 00

**Deduction Table:**

Deduction	Description	Exclusion?
001	Medical Ins	<input checked="" type="checkbox"/>
002	Dental Ins	<input type="checkbox"/>
003	United Way	<input type="checkbox"/>
004	Credit Union	<input type="checkbox"/>

### Field

### Description

**Inquiry**

Tax Authority

Enter **F** to work with federal withholdings, **S** to work with state withholdings, or **L** to work with local withholdings.

Field	Description
<b>Inquiry</b> State Code	<p>This field is active only if you entered S or L in the Tax Authority field.</p> <p>The state code must be defined in the Tax Authority Setup function (see page 11-5) before you set up the state/locality withholding.</p> <p>Enter the code for the state tax authority. If you use the <b>Maintenance (F6)</b> command, the Tax Authority Setup function is temporarily called up.</p>
<b>Inquiry</b> Local Code	<p>This field is active only if you entered L in the Tax Authority field.</p> <p>Local codes must be defined in the Tax Authority Setup function before you set up the state/locality withholding.</p> <p>Enter the code for the local tax authority. In employee records, code 00 means that there is no local tax. If you use the <b>Maintenance (F6)</b> command, the Tax Authority Setup function is temporarily called up.</p>
Withholding Code	<p>Enter one of the taxation codes displayed at the bottom of the screen. The kind of tax code you can enter depends on whether you are working with the federal, state, or local tax authority. These codes are reserved by the system and should not be modified in the Tax Authority Setup function.</p> <p><b>EIC</b> Earned Income Credit  <b>EOA</b> Employer OASDI  <b>EME</b> Employer Medicare  <b>FUT</b> FUTA  <b>FWH</b> Federal Withholding  <b>MED</b> Medicare  <b>OAS</b> OASDI Withholding  <b>SUI</b> Employer State Unemployment Insurance  <b>SWH</b> State Withholding  <b>LWH</b> Local Withholding</p>
Description	Enter a description of the withholding tax you entered.

<div>Inquiry</div> <div>Maint</div>	Liability Acct	Enter the number of the liability account the withholding is posted to. The <b>Maintenance (F6)</b> and <b>Inquiry (F2)</b> commands are available if Payroll is interfaced with General Ledger.
<div>Inquiry</div> <div>Maint</div>	Expense Acct	<p>This field is active only if the withholding tax is employer-paid.</p> <p>Enter the number of the general ledger expense account the withholding is posted to. The <b>Maintenance (F6)</b> and <b>Inquiry (F2)</b> commands are available if Payroll is interfaced with General Ledger.</p>
	Fixed Percent	<p>This field is active only if the withholding tax is employer-paid.</p> <p>If you are working with a FWH, SWH, or LWH record, enter the percentage of pay to be withheld.</p>
	Tax ID	<p>If you are working with a FWH record, enter the employer's federal tax ID you want to print on W-2 forms. Only the first 10 characters will be used.</p> <p>If you are working with a SWH or LWH record, enter your state or local tax ID, respectively.</p> <p>If you are entering a SUI record, enter the tax ID you want to print in the Quarterly State Unemployment Report.</p>
	Weeks Worked Limit	<p>This field is active only if you entered a state withholding tax in the Tax Code field.</p> <p>Enter the minimum number of hours an employee can work to qualify for one week of work, or enter <b>00</b> if the state has no minimum.</p> <p>If an employee works less than the minimum number of hours you enter here, the Weeks Under Limit field in the employee's history record is updated.</p>

When you save the entries, the cursor moves to the scroll region.

---

## Command Bar

### **Enter = toggle, All, None, Goto, Tab, Formula**

To change the exclusion status of a deduction or an earning code, press **Enter**. The status alternates between YES and NO.

To exclude all deductions or earning codes, press **A**.

To exclude no deductions or earning codes, press **N**.

To go to a particular line item, press **G** and then enter the deduction or earning code, or use the **Inquiry (F2)** command to select the deduction or earning code. (This command appears only if there is more than one screen of items.)

To move between the deductions and earning codes scroll regions, press the **Tab** key.

To edit the withholding formula for the withholding you are working with, press **F**. The Formula Maintenance screen appears. (For information about formulas, see page 10-89, and appendix C.)

Your changes are automatically saved as you make them. When you are finished in the scroll region, use the **Abandon (F5)** command to return to the Tax Authority field and enter another tax authority to work with, or use the **Exit (F7)** command to return to the Codes Maintenance menu.

## Tax Groups

## Tax Groups Screen

[illegible]

**Inquiry**

- For the selected tax group ID, a description appears. If you are entering a new tax group, enter a description.

## Command Bar

### Append, Delete Tax Group, Tax Group

To add a line item, press **A**. Then see the **Append Tax Groups Screen** below.

Press **D** to delete the selected Tax Group.

Press **T** to change the Tax Group you want to work with.

## Append Tax Groups Screen

	Field	Description
<b>Inquiry</b>	State	Enter the state for the employee's withholding code.
<b>Inquiry</b>	Locality	Enter the local withholding code, if any, for the employee.
<b>Inquiry</b>	Withholding Code	Enter the withholding code needed for the employee.

Press **Proceed (OK)** save your entries and to redisplay the Tax Groups screen.

When you are finished entering and editing deductions, use the **Exit (F7)** command to return to the Codes Maintenance menu.

## Employee Detail List

---

The Employee Detail List shows the information that is on file for each employee, from basic personal data to quarter-to-date and year-to-date earnings and deductions. The information in the list comes from the PAEGxxx (Employee General Information), PADExxx (Employee Deductions), and PAESxxx (Employee Federal/State/Local Withholdings) files. If you print history, the following additional files are used: PAEDxxx (Employee Deduction History), PAEExxx (Employee Earnings History), PAEMxxx (Employee Miscellaneous History), and PAEWxxx (Employee Withholding History).

### Employee Detail List Screen

Select **Employee Detail List** from the Master File Lists menu. The function screen appears.

#### **Inquiry**

1. Enter the range of employees you want to include in the list.

- 
2. Select the order in which you want to organize the list.
  3. Select the information you want to include in the list. You can include active employees, terminated employees, or both.
  4. If you want the list to include employee history, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).

If you include employee history, the list will take up to three pages for each employee. If you do not include employee history, the list will take only one page for each employee.

5. Select the output device.

A sample Employee Detail List is at the end of this section.

After the list is produced, the Master File Lists menu appears.

## Employee Labels

---

Use the Employee Labels function to print mailing labels for checks, notices, newsletters, and so on, or to print the names and addresses of employees in a reference list. Information printed on labels comes from the PAEGxxx (Employee General Information) file.

### Employee Labels Screen

Select **Employee Labels** from the Master File Lists menu. The function screen appears.

#### Inquiry

1. Enter the range of employees for which you want to produce labels.
2. Select the information you want to include in the labels. You can include all employees or only current employees.
3. Select the label size. The larger label size includes the third address line.

- 
4. If you are printing mailing labels, make sure that they are mounted in the printer. When you press **Enter**, a test pattern is printed.
  5. If the labels are aligned, select **Yes** (or enter **Y** in text mode); if not, adjust the printer and select **No** (or enter **N** in text mode) to print the test pattern again.

A sample employee list is at the end of this section.

After the labels are produced, the Master File Lists menu appears.

## Tables List

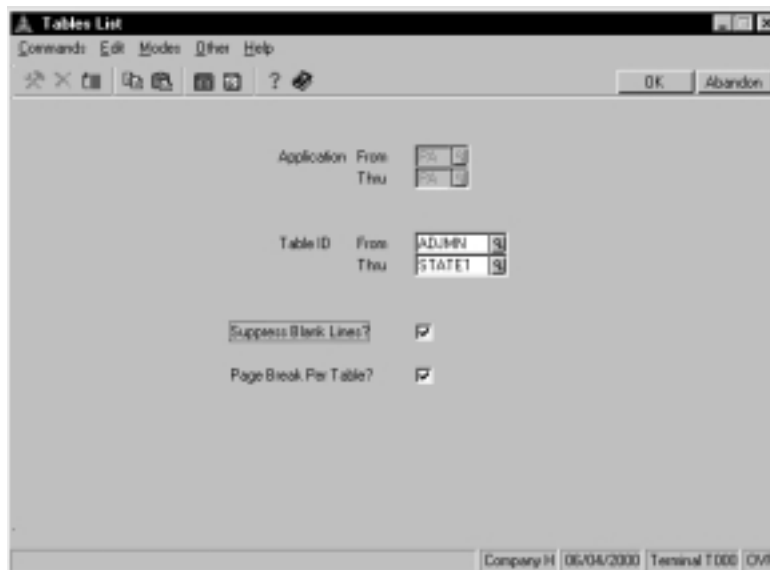

---

The Tables List shows the number of columns, column length and type, and data for any or all Payroll tables.

Use the Tables List to review information entered into the Payroll tables through the Tables function and stored in the PATBxxx file.

### Tables List Screen

Select **Tables List** from the Master File Lists menu. The function screen appears.

The default in the Application From/Thru fields is PA. You cannot produce a Tables List for other applications from this function in Payroll. To produce a Tables List for another application, refer to the appropriate user's manual or see the *Resource Manager User's Manual*.

#### Inquiry

1. Enter the range of tables you want to include in the list.

- 
2. If you want blank lines to be printed in the list, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).
  3. If you want to print each table on a separate page, check the box (or enter **Y** in text mode); if not, uncheck the box (or enter **N** in text mode).
  4. Select the output device.

A sample Tables List is at the end of this section.

After the list is produced, the Master File Lists menu appears.

## Deductions List

---

The Deductions List shows the deduction codes and descriptions stored in the PADExxx (Employee Deductions) file. You set up deductions in the Deductions function. Use the list as a reference or to check your entries.

### Deductions List Screen

Select **Deductions List** from the Master Codes Lists menu. The function screen appears.

#### Inquiry

1. Enter the range of deductions you want to include in the list.
2. Select the order in which you want to print the list.
3. Select the items you want to include in the list.
4. Select the output device.

A sample Deductions List is at the end of this section.

After the list is produced, the Master Codes Lists menu appears.

08/24/2001 2:36 PM		Builders Supply Deductions List By Deduction Number All Deductions				Page 1
Number	Description	GL Account	Liability Acct	Deferred Comp.?	Employer Paid?	Calculate On?
1	Medical Ins	535000		NO	NO	Gross Pay
2	Dental Ins	535000		NO	NO	Gross Pay
3	United Way	204000		NO	NO	Gross Pay
4	Credit Union	999900		NO	NO	Gross Pay
5	Dues	999900		NO	NO	Gross Pay
6	401K	205000		YES	NO	Gross Pay

# System Messages

---

## A

Messages on the screen or in a report indicate an error or tell you how to enter data or what is happening in the function you are using. Self-explanatory messages are not listed.

**A bank account is required.**

You must enter a bank account ID if Payroll is interfaced with Bank Reconciliation.

**Access to File Maintenance denied.**

Your access code is not set up to use the **Maintenance (F6)** command in this field. You must be set up to access the File Maintenance function associated with this field.

**Bank account ID xxxxxx not found.**

The bank account ID you entered (if Payroll is interfaced with Bank Reconciliation) is not on file. Enter a different ID, or use the **Inquiry (F2)** command to look up and select the ID from the list that appears.

**Basic Error = nn LINE = nnn Program = xxxxx**

A serious error has occurred. Write down the information that is displayed and get help from a support technician.

**Cannot define file.**

The Payroll system cannot create the work file it needs for magnetic media production. Make sure that enough disk space is available and that the directory you specified exists. If the problem persists, get help from a support technician.

---

**Cannot delete during inquiry.**

The functions on the Employee Inquiry menu are read-only. To delete employee records, you must have access to the appropriate File Maintenance functions.

**Cannot delete employee with history.**

Before you can delete an employee record that has quarter-to-date and/or year-to-date balances in reported earnings or tax withholdings, you must change the balances to zero through the Employees function (page 10-3). Print W-2s for the employee before you delete the record.

Records of terminated employees are deleted automatically during year-end processing.

**Cannot find last-year files for this company. You must run the year-end maintenance function.**

There are no last-year data files for the company. Press **Enter** to return to the Main menu. Then do periodic maintenance (page 9-51).

**Cannot find *(table name)* table.****Cannot find *(table name)* tax table.**

The system cannot find the table shown in this message. Use the Tables (page 10-71) or the Tax Tables (page 10-87) function to set up the tables.

**Check has already been voided from Bank Reconciliation. Cannot void.**

If you have not posted, you can remove the voided check from Bank Reconciliation.

**Check history is not implemented.**

You cannot print the Check History Register or use the Void Checks function because you did not elect to save check history in the Resource Manager Options and Interfaces function; the file contains no history. Use the Options and Interfaces function to elect to save check history.

**Check was not found in BRTRx file. Cannot void.**

If Payroll is interfaced with Bank Reconciliation, the check you want to void must be in the BRTRx (Transactions) file before it can be voided.

**Checks file is empty.**

You cannot print payday reports if the PACHxxx (Checks) file is empty. Return to the Payday Work menu and select the Calculate Checks function.

**Code is not set up in PACO file.**

Federal, state, and local tax codes must be set up in Tax Authority Setup function (page 11-5).

**Cost code has a type other than labor.**

You must enter a cost code with a type of *labor* for the job and phase if Payroll is interfaced with Job Cost.

**Diskette contains file(s), directory, or label.**

The diskette you want to use for W-2 magnetic media has some files on it or contains a disk label. Use a blank, formatted disk that does not have a label. See page 9-31 for instructions and information about accepted formats.

**Division ID not allowed.**

You must enter a department ID, not a division ID, for the employee.

**Drive not available.**

The disk drive ID you entered is not available on your system. Press **Enter** and enter a different drive ID. If this message appears when you enter the correct drive ID, get help from a support technician.

---

**Employee (ID) not found.**

Before you can enter history for an employee, you must use the Employees function (page 10-3) to set up a record for the employee.

**FICA table not found in PATX table.**

You must build this table in the Tax Tables function (page 10-87).

**(file name) for version 4.x could not be found. Unable to continue with conversion. (filename) source file not found. Unable to continue with conversion.**

Check the directory you are working in and copy the necessary file into the new directory. See chapter 2 for more information about conversion.

**FWH record missing from PAWIX file. Cannot assign employer tax ID.**

These codes must be entered in the Withholdings function (page 11-23).

**GL account xxxxxxxxxxxx is not on file.**

If Payroll is interfaced with General Ledger, you must enter the correct account number or add the account to General Ledger.

**GLDEPx table was not found in xxxxxx.**

You have posted new entries to the PADPxxx (Department) file, but no general ledger account has been specified with the department. If the new entries do not exist in the department, entries are posted to a default general ledger account. If you do not want entries posted to the default account, you must select a different account.

**Invalid period conversion table.**

The CNVTxxx table for the company is invalid (for example, because you are on a quarterly system and you have not updated the table with corresponding data for the next quarter). Use the Resource Manager Period Setup function to make corrections.

**Invalid quarter in PACTLx table.**

The current quarter you entered in the PACTLxxx table is invalid. Use the Tables function (page 10-71) to correct the table. Valid quarters are 1, 2, 3 or 4.

**Job has phases.**

If you try to add a payroll transaction for an employee and use the **Inquiry (F2)** command to select a job, you must enter the phase associated with that job.

**Last-year data files not found for company X.**

The last-year data files have been erased manually or by closing them.

**Must build (*table name*) table first.**

You must build the table shown in this message before you can use this function.

**No check on file for employee xxxxxx.**

You must calculate checks before printing. Use the Calculate Checks (page 6-3) or the Manual Checks (page 6-9) function.

You might also see this message if you try to edit an accrual for an employee who does not have a check on file. You must use the Calculate Checks or the Manual Checks function.

**No tax information located for this employee.**

You must enter this information on the Employees Tax Information screen (page 10-16).

**NOTE: Check history is not implemented for this company. The record of federal tax liability might be incorrect.**

The PAHCxxx (Check History) file may not be present; it is required to provide complete information in 941 reports.

---

**Option for Transaction History is not in use. Transactions will not be re-created in Transaction file.**

You did not elect to save payroll transaction history in the Resource Manager Options and Interfaces function.

**Quarter-end processing not valid in quarter 4. Use year-end processing instead.**

You cannot use the Quarter-End Maintenance function if the current quarter in the PACTLxxx table is 4.

**Record is in use.**

Someone else is using the record you are trying to access. Press **Enter** to try again.

**SUI record for state xx not found.**

The SUI record in the PAINxxx (Payroll Information) file is not on file for the selected state. Build the table through the Payroll Information function (page 10-57) or restore it from a backup, and try again.

**The federal tax authority was not found in the PACO file.**

You must enter this information in the Tax Authority Setup function (page 11-5).

**This function is not allowed with last-year data files.****Switch to current-year files first.**

If you are trying to use a function that cannot be used with last-year data files, switch to the current-year files.

**Transaction history is not implemented.**

You cannot print the Transaction History Report if you did not elect to save history in the Resource Manager Options and Interfaces function. Use the Options and Interfaces function to elect to save transaction history.

**Unable to create sort file.**

You may not have permission set up on your network.

---

**Unable to find original transactions in transaction history. Transactions will not be re-created in Transaction file.**

If the original transactions are not found in the PATHxxx (Transaction History) file on a calculated check, transactions will not be re-created.

**User-defined field record 'USRDD' not found in PATB file.  
User-defined field record 'USRDF' not found in PATB file.**

These user-defined files must be set up in the Tables function (page 10-71).

**Warning: GLDEPx table was not found in PATB. New department entries needing GL accounts will not have GL accounts.**

You must build this table in the Tables function. (See page 10-71 for information about the GLDEPxxx table.)

**W2CODE was not found in PATB.**

You must set up this table in the Tables function (page 10-71) before you print W-2s.

**Year-end processing not valid in quarters 1 - 3.**

You can use the Year-End Maintenance function only if the current quarter in the PACTLxxx table is 4.

**You must set up codes for federal withholdings first.**

You must set up federal withholdings codes in the Tax Authority Setup function (page 11-5).

**You must set up TCALCx table before using time card calculator.**

You must set up this table in the Tables function.

---

# Common Questions

---

# B

These commonly asked questions about the Payroll system are divided into the following categories: Installation and Setup, Daily Work, Payday Work, and Periodic Processing.

## Installation and Setup

### How do I set up worker's compensation codes?

Follow these steps to set up worker's compensation codes:

1. In the Tax Authority Setup function (see page 11-5), enter **State** as the tax authority.
2. Enter the state code.
3. Press the **Tab** key to move to the Employer Contribution Codes screen.
4. Press **A** to append the code you will use (for example, WKC).
5. Enter the formula name you will use (for example, PMN\_ \_WKC.RTN. The formula name must follow this format and have the extension .RTN.
6. Enter the table ID, if necessary (for example, WKCMN).
7. Use the **Exit (F7)** command to return to the File Maintenance menu.
8. In the Withholdings function, select the state tax authority and the tax code you entered for worker's compensation. (See page 11-23 for information on how to proceed with setting up the withholding.) When you have finished setting up the withholding, exit to the File Maintenance menu.

- 
9. In the Formula Maintenance function, use the formula ID name you used in the Tax Authority Setup function. (See page 10-89 for information on how to proceed with setting up the formula.)

There are many ways to calculate worker's compensation. Depending on your state, the formula could be based on labor class or sex. Contact your state tax authorities for more information.

**How do I use multistate or multilocal taxes?**

Use the Tax Information screen in the Employees function (see page 10-3) to add states and localities for which the employee may need withholdings. When you enter or edit transactions in the Payroll Transactions function (see page 5-3), specify the states and localities for the employee's withholding. If you use the Manual Checks function (see page 6-9) to calculate checks, specify the states and localities on the first and third manual checks screens.

**Why are my departments and my employee history blank?**

You have not posted to departments or employee history. You can set up entries for employees and departments, but the system automatically adds entries in the Post Transactions and Post Checks functions.

**How can I set up a 401(k) match?**

In the Deductions function, enter the employer deduction code. Then use the Employees Salary Information screen (see page 10-3) to add the deduction code. (For information on deductions, see page 11-17.)

**How can I exclude earning codes from deductions?**

In the Deductions function, select the appropriate deduction number and then select the earning code(s) you want to exclude.

---

**I have an employee (for example, a minister) whom I need to exclude from withholdings. How do I handle that?**

In the Employees function (see page 10-3), select the employee you want to exclude from withholdings. On the Tax Information screen, use the Withholding setup command and select the withholdings you want to exclude.

**Daily Work****Can I enter time tickets for a salaried employee?**

Yes, in the Payroll Transactions function (see page 5-3). You cannot enter a time ticket that will exceed a salaried employee's wage. The system warns you if a posted or unposted amount exceeds the employee's wage.

**Can I enter one day in the time card calculator and have that day repeat for the rest of the week?**

Yes. In the Payroll Transactions Time Card Entry window (see page 5-3), you can enter an employee's time in and time out five times.

**Can I pay an employee a vacation and a bonus check in the same pay period?**

Yes. If you need separate checks, you can change the sequence number in time ticket entry or enter separate manual checks. The system accounts for multiple checks in the PACHxxx (Checks) file when calculating withholdings and declining balance deductions.

**Payday Work****How can I void a check?**

You can void only checks that have been posted. If the check has already been posted, use the Void Checks function (see page 6-33).

To void a manual check that you have not posted, you must delete the check through the Manual Checks function (see page 6-9).

---

To void a calculated check, you must post checks (see page 6-63). Then use the Void Checks function to void it, or enter negative time tickets in the Calculate Checks function (see page 6-3) and recalculate checks.

You cannot delete a calculated check because those earnings have already been posted to the departments.

**Can I void a check from a previous version of Payroll?**

No, because this version of Payroll contains additional information that previous versions of Payroll did not have.

**What happens if I delete or void a separate bonus check for an employee? Is the other check recalculated?**

The other check is not recalculated, but you can use the Calculate Checks function (see page 6-3) or the Manual Checks function (see page 6-9) to recalculate the deductions and withholdings on the check.

**Periodic Processing****How do I print periodic quarterly reports for previous quarters?**

On the report function screen, enter the quarter number for which you want to produce the report.

**Why aren't federal withholdings printing on my W-2s?**

If you have multistate employees or if you have additional deferred compensation or local withholdings that will not fit on one W-2 form, a second W-2 form might be printed. Federal guidelines specify that the federal earnings information be printed on only one W-2 form.

---

# About Formulas

---

## C

The Payroll system uses formulas to calculate deductions and withholdings based on earnings and/or tables. You can use variables for numbers such as year-to-date amounts, gross earnings, and so on, which you can manipulate using operations and functions, much like a spreadsheet program. You can also look up tax rates and other variable factors in tax tables.

A summary of valid variables, operations, and functions is below. If you are new to formulas or if you need to review them, you will find several examples at the end of this appendix.

The fields and commands available on the Formula Maintenance screen are described on page 10-90.

## Summary of Variables, Operations and Functions

Below is a summary of the variables, operations, and functions you can use in setting up deductions and withholdings.

### Variables

You can use positive or negative numbers (constants) in formulas. You can also use these variables in place of the numbers:

Variable	Description
ADJEARN	Adjusted earnings for net pay deductions. <sup>1</sup>
ADJHR	Adjusted hours (minus exclusions).
ADJMIN\$	Adjust to minimum wage flag.

---

Variable	Description
ADJSUIEARN	Total SUI earnings before the Self Adjust Month changed.
ADJSUIWITH	Total SUI withholdings before the Self Adjust Month changed.
DEDEXCL	Total amount of deductions exclusions.
DEDUCTIONTOT	Total deductions for the current check.
EARNEXCL	Total amount of earnings excluded.
EICCODE\$	EIC code for each employee (N, E, or B).
EMPFICAWH	Employee FICA Contribution (OASDI and Medicare).
EXEMPTIONS	Number of exemptions per employee; taken from the PAESxxx file.
EXTRAWH	Extra withholdings for the employee; taken from the PAEGxxx file.
FEDWITH	Total employee federal withholdings (including OASDI, Medicare, and EIC).
FIXEDEARN	Total fixed earnings for the employee; taken from the earning codes.
FIXEDPCT	Fixed percent for the withholding; taken from the PAWIxxx file.
FIXEDWH	Fixed withholding amount; taken from the PAEGxxx file.
FWHWITH	Employee federal withholdings (not including OASDI, Medicare, and EIC).
GRANDTOTEARN	Total gross earnings, not including earnings that are not included in net pay.
GRANDTOTGROSS	Total gross earnings, including all earnings.
HOURS	Total hours worked.
LOCALWITH	Total employee local withholdings.
MINWAGE	Minimum wage.

---

Variable	Description
PAYPERIODS	Total pay periods for the year; taken from the PAEGxxx file.
PERIODCODE	Current deduction run code for the group code the current employee is in.
REGHRS	Regular hours worked, not including sick and vacation hours.
STATEWITH	Total employee state withholdings.
TAXEARN	Taxable earnings per tax authority (total earnings minus all exclusions).
TIPS	Tips accumulated for the employee.
TOTEARN	Total earnings.
UNCOLMED	Year-to-date uncollected Medicare.
UNCOLOASDI	Year-to-date uncollected OASDI.
YTDEARNINGS	Year-to-date earnings for the withholding.
YTDFICATIPS	Year-to-date FICA tips (used in employee OASDI to figure FICA tips).
YTDTIPS	Year-to-date tips deemed as wages (used in employer OASDI adjustments).
YTDWITHHOLDINGS	Year-to-date withholdings for the withholding.

1. For Gross, ADJERN is set to the same amount as GRANDTOTGROSS, minus any earning code exclusions that may exist for that deduction. For Net, ADJERN is set to GRANDTOTEARN. Then DEDUCTIONTOT, FEDWITH, STATEWITH, and LOCALWITH are subtracted to account for all withholdings up to that point. So if you have two net pay deductions, the first one is calculated and that amount is added to DEDUCTIONTOT. The second deduction will follow the same process, with DEDUCTIONTOT having the updated deduction total from the previous net pay deduction.

### Formula Factors

Formula factors are variables used to change the base rate in a formula without changing the formula. Each formula can have six factors. Factors can be used in formula lines by entering **FC $n$** , where  $n$  is the number of the factor.

For example, you can set up a formula that multiplies taxable earnings by a percentage. The formula can be one line long: TAXEARN \* FC1. If you set factor one to .05, the employee's taxable earnings will be multiplied by five percent. Later you can change the factor or override it in the employee record.

Formula factors can be overridden for deductions on the Employees Salary Information screen (see page 10-3) or for withholdings on the Employees Tax Information screen (see page 10-87).

### Formula Lines

Each line of a formula sets the value of a variable **L $nnn$**  ( $nnn$  is the line number). Lines are calculated in sequential order: line LI001 is calculated before LI002 and so on. You can use the results of previous lines with other variables in later formula lines. The result of the entire formula is the result of the last line you defined.

## Operations

Formulas are calculated line by line. Calculations in a line proceed according to the standard order of mathematical operations: numbers are multiplied, then divided, then added, and finally subtracted.

Below is a table of the valid operations and the order in which they are performed (1 = performed first, 5 = performed last).

Operator	Priority	Description
–	1	Negative Sign
^	2	Exponentiation
*	3	Multiplication

---

Operator	Priority	Description
/	3	Division
+	4	Addition
–	4	Subtraction
=	5	Equal to
<>	5	Not equal to
>	5	Greater than
<	5	Less than
>=	5	Greater than or Equal to
<=	5	Less than or Equal to

Calculations are performed in the order listed in the table above, from left to right. To change the calculation order, use parentheses to group parts of the formula together. Calculation is done from the innermost set of parentheses to the outermost set.

## Functions

You can use two types of functions when constructing formulas: Tables Lookup and Conditionals. Both are explained below.

### Tables Lookup

Use the TABLE and TABLE2 functions to look up items in tax tables.

Use the TABLE function to look up information in a tax table that is arranged gradationally. The format for the command is **TABLE (x, y, RETVAL)**, where *x* is the line (or gradation) in the tax table and *y* is the column number. (RETVAL is a BB<sup>x</sup> command and must be included in a TABLE function.) The tax table the TABLE function goes to is specified in the Tax Authority Setup function (see page 11-5).

---

For example, you set up withholding SWH for the state of Minnesota. The withholding has a formula assigned to it and refers to tax table STXMNM. In the formula, you use the command **TABLE (30000, 2, RETVAL)**. The system looks at the first column of the tax table until it finds a gradation greater than 30000. It then goes to the line *before* that one and returns the value found in the second column of that line.

You can also use variables in table lookups. You can, for example, use a variable calculated in a previous line to find the gradation in a tax table—for example, **TABLE (LI002, 2, RETVAL)**.

You can use only one table lookup for a formula line.

Use the **TABLE2** function to look up information in a tax table that is *not* arranged gradationally. The format for the command is **TABLE2 (x, y, RETVAL)**, where *x* is the row in the tax table and *y* is the column number. (RETVAL is a BB<sup>x</sup> command and must be included in a TABLE2 function.) The tax table the TABLE2 function goes to is specified in the Tax Authority Setup function.

For example, you set up withholding SUI for the state of Minnesota. The withholding has a formula assigned to it and refers to tax table SUTMN. In the formula, you use the command **TABLE2 (1, 2, RETVAL)**. The system returns the value found in the first row and second column of the tax table.

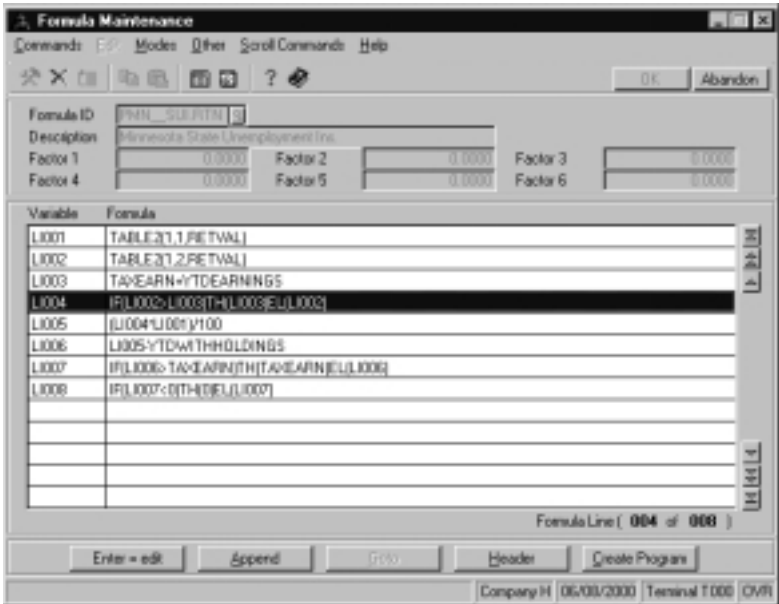

You can also use variables in table lookups. You can, for example, use a variable calculated in a previous line to specify a location in a tax table—for example, **TABLE2 (1, LI002+2, RETVAL)**.

You can use only one table lookup for a formula line.

Conditionals

You can use the IF(x)TH(y)EL(z) function (If-Then-Else) to evaluate formulas conditionally

In the example above, lines LI001, LI002, and LI003 establish values. Line LI004 then uses the If-Then-Else function to evaluate and select the value to use in the rest of the formula.

Formula Examples

To get an idea of how formulas and tables work together, read the examples below.

Federal Withholding

When you establish federal tax authorities in the Tax Authority Setup function, you specify both the formula ID and tax table ID associated with the federal withholding code.

The federal withholding formula PFED\_FWH.RTN uses the tax table FEDM:

The screenshot shows the PATX Federal Income Tax Married Table (FEDM) window. The window has a menu bar (Commands, Edit, Modes, Other, Help) and a toolbar. The Table ID is FEDM, and the Description is Federal Income Tax Married Table. The Number of Cols is 3, and the Column Length is 12. The Type is N. The table has 10 rows of data, with the last row showing a base of 2800.00 and a percentage over of 0.00.

Over	Base	% Over
.00	.00	.00
6450.00	.00	15.00
48450.00	6152.50	28.00
101050.00	21020.00	31.00
166050.00	41170.00	36.00
232350.00	86854.50	39.60
9999999.99	2800.00	.00
.00	.00	.00
.00	.00	.00
.00	.00	.00
.00	.00	.00
.00	.00	.00
.00	.00	.00
.00	.00	.00

Variable

Formula

LI014

IF(LI013<0)TH(0)EL(LI013)

LI015

IF(EXEMPTIONS=99)TH(0)EL(LI014)

FormulaLine ( 014 of 015 )

1. The table lookup checks the first column of the FEDM tax table until it finds a number larger than 99999999.99. Because there can be no larger number, the table returns the value found in the second column of the last line: 2800. Variable LI001 is equal to 2800.
2. Variable LI002 is the product of LI001 times the value of the variable EXEMPTIONS (the number of federal exemptions claimed by the employee; this information is taken from the PAEGxxx file).

- 
3. Line LI003 employs a conditional function. If the value of the variable `FIXEDEARN` (the total fixed earnings for the employee) is greater than zero, that value is multiplied by the value of `FIXEDPCT` (the fixed percentage for the withholding tax), and then divided by 100. Variable LI003 is equal to a fixed withholding dollar amount.
  4. Fixed earnings are subtracted from taxable earnings.
  5. Variable LI004 is multiplied by the total number of pay periods. Variable LI002 is then subtracted from the product.
  6. If the value of LI005 is less than zero, zero is used. Otherwise, the value of LI005 is used.
  7. The table lookup uses LI006 to find the appropriate line of tax table FEDM; it then returns the value from column 1, which is LI007.
  8. The table lookup uses LI006 to find the appropriate line of tax table FEDM; it then returns the value from column 2, which is LI008.
  9. The table lookup uses LI006 to find the appropriate line of tax table FEDM; it then returns the value from column 3, which is LI009.
  10. LI007 is subtracted from LI006. This number is then multiplied by LI009. The product is divided by 100.
  11. LI010 is added to LI008; the sum is divided by the number of pay periods.
  12. LI011 is added to LI003 and the value of `EXTRA WH` (the employee's extra withholdings, if any).
  13. Line LI013 is equal to one of two values. If the employees fixed withholding amount is greater than zero, it is equal to that number. If the employees fixed withholding amount is zero, LI013 is equal to the value of LI012.
  14. If the value of LI013 is less than zero, the value of LI014 is zero. Otherwise, the value of LI014 is equal to LI013.
  15. The result of the entire formula is the result of its last line. In this case the result is based on a conditional. If the number of federal exemptions is 99, the result of the formula is zero; if not, the result of the formula is equal to LI014.

State Unemployment Insurance

When you establish state tax authorities in the Tax Authority Setup function, you specify both the formula ID and tax table ID associated with the withholding code.

The Minnesota state employer-side unemployment withholding formula PMN\_\_SUI.RTN uses tax table SUTMN.

The screenshot shows the PATX software window with the SUTMN tax table selected. The interface includes a menu bar (Commands, Edit, Modes, Other, Help), a toolbar, and a main data area. The 'Table ID' is SUTMN, 'Description' is Minnesota State Unemployment - Employer, 'Number of Cols' is 2, 'Column Length' is 12, and 'Type' is 3. The data table has two columns: Percent and State. The first row shows 9.100 for Percent and 19000.000 for State. Subsequent rows show 0.000 for Percent and 0.000 for State. The status bar at the bottom indicates Company H, 06/01/2000, Terminal T000, and OVR1.

Percent	State
9.100	19000.000
.000	.000
.000	.000
.000	.000
.000	.000
.000	.000
.000	.000
.000	.000
.000	.000
.000	.000
.000	.000
.000	.000
.000	.000
.000	.000
.000	.000
.000	.000
.000	.000
.000	.000
.000	.000
.000	.000
.000	.000

The following formula is used to calculate Minnesota state employer-side unemployment withholding taxes:

The screenshot shows the 'Formula Maintenance' window with the following details:

- Formula ID:** MN\_UNEMP\_TN
- Description:** Minnesota State Unemployment Tax
- Factor 1:** 0.0000, **Factor 2:** 0.0000, **Factor 3:** 0.0000, **Factor 4:** 0.0000, **Factor 5:** 0.0000, **Factor 6:** 0.0000
- Variable:** L1001
- Formula:**

Variable	Formula
L1001	TABLE2(1,1,RETVAL)
L1002	TABLE2(1,2,RETVAL)
L1003	TAXEARN+YTDEARNINGS
L1004	IF(L1002>L1003)TH(L1003)EL(L1002)
L1005	(L1004*L1001)/100
L1006	L1005-YTDWITHHOLDINGS
L1007	IF(L1006>TAXEARN)TH(TAXEARN)EL(L1006)
L1008	IF(L1007<0)TH(0)EL(L1007)

Formula Line: 001 of 008

Buttons: Enter = edit, Append, OK, Header, Create Program

Footer: Company H | 06/08/2000 | Terminal T000 | OVR

1. The TABLE2 function looks for the value in line 1, column 1 of the tax table, which in this case equals 9.10.
2. The TABLE2 function looks for the value in line 1, column 2 of the tax table, which in this case equals 19000.
3. TAXEARN (taxable earnings) is added to YTDEARNINGS (year-to-date earnings for that withholding).
4. Line 4 of the formula employs the conditional function; in this case the result is the smaller of L1002 or L1003.
5. The value established in L1004 is multiplied by L1001; the product is divided by 100.
6. YTDWITHHOLDINGS (year-to-date withholdings) is subtracted from L1005.

- 
7. The conditional function is used to determine the value of LI007. If LI006 is greater than TAXEARN, LI007 is equal to TAXEARN; if not, LI007 is equal to LI006.
  8. The result of the entire formula is the result of its last line. In this case the result is based on a conditional. In this case if LI007 is less than zero, the result of the formula is zero. If LI007 is greater than zero, that is the result of the formula.
